How to build resilience in a changing enterprise landscape.

Microsoft and KPMG

The seismic shift of 2020

A rapid rise in cyber threats

Regional readiness

Security starts with identity

New workstyles, new threats, new priorities

Final thoughts

Microsoft and KPMG

An alliance that fuses technology and business expertise

To help organizations on their digital transformation journey, Microsoft and KPMG have a strategic alliance that brings together leading-edge technologies with a business-first consultancy approach.

Microsoft offers a broad portfolio of integrated technology capabilities that avoids the challenge of managing different vendors.

KPMG has extensive cross-industry expertise in delivering strategic business outcomes.

Together, we build relevant, value-based solutions to address our clients' most complex problems – with a focus on the following key areas:

Cybersecurity

We help create a more resilient cloud environment by centralizing your security monitoring and incident response capabilities. Combining KPMG's strengths in cyber defense and data governance with advanced Microsoft security technologies such as Azure Security Center, we can help you to reduce your security risks while maintaining control over data.

Cloud Services

Cloud is transforming business and operating models, enabling organizations to reap many cost and flexibility benefits. Together, KPMG and Microsoft can build highly tailored cloud solutions based on Microsoft Azure, which incorporate security, privacy and compliance features to give you a higher level of protection.

Microsoft Business Solutions

Through a combination of KPMG's design-and-build expertise, plus advanced business solutions such as Microsoft Dynamics 365, we can drive more efficiency into front- and back-office operations and enhance your customer interactions.

Data & Analytics

KPMG and Microsoft offer an enterprise-grade data and analytics platform that provides a navigational tool for business transformation, helping organizations convert data into actionable insights that drive growth, savings and strategic value, while also reducing risk.

Final thoughts

In this executive briefing, we explore the cybersecurity impact that the COVID-19 pandemic is having on enterprise organizations across the Middle East and Africa.

We will consider how enforced workplace restrictions have accelerated digital transformation, cloud adoption, and remote working—and how the rapid rise of new cyber threats requires organizations to refocus their security strategies around identity.
