

Seeing is believing

What comes next is powered by KPMG
kpmg.com/au/powerenterprise

KPMG Powered Enterprise is the outcome-driven transformation solution that prepares your business for the future.

This is where deep industry and process knowledge, global delivery capability and cloud technology combine to drive sustainable change, rising performance and lasting value. KPMG’s continuing investment in cloud applications, target operating models, processes and tools can give you instant access to leading practices and predictable outcomes. The breadth, depth and quality of this solution must be seen to be believed – and we mean that literally. To understand the power of the solution, you need to see what it can do for you.

- Transform the way you run your business
- Build agile functions that evolve as you grow
- Help your people to adopt and embrace change
- Exploit new technologies for value and performance
- Drive future success with the latest leading practice

All power to the enterprise

This is not just about migrating finance or the supply chain into the cloud. From evidence-based HR to customer-centric business models, Powered Enterprise can unleash new levels of agility, insight, efficiency and performance. The value is multiplied when you join the dots across the business.

TOM changes everything

Successful, sustainable transformation requires an understanding of how business change plays through every level and layer of the company. KPMG’s Target Operating Model (TOM) aligns the power of new and emerging technologies with the real-world challenges of organisational change.

This is the legacy you don’t discard in five years’ time: what you build today creates the context for what you need tomorrow. Also, KPMG teams understand the human factors involved in business transformation, so we can help inspire and empower your people to embrace a new reality.

What's in the box?

Powered Enterprise provides a formidable combination of leading practices and processes, proven technology solutions and a next-generation delivery framework. This is a truly integrated solution: every component has a role to play in extracting the maximum value from technology and helping to achieve the outcomes you need.

When all this comes together, backed by the business knowledge and experience of KPMG teams, the results are impressive. Although the solution is based on proven, pre-built assets, the real benefits go beyond speed to value or risk-controlled implementation – important as these are. Powered Enterprise is really about the future agility of your business. Now you can embrace transformation as a positive state rather than a disruptive event and you can be ready for whatever is coming next. And the KPMG team will be on your side, all the way.

It's not what you put into the cloud that matters, but what you get out of it.

- A jump start to your digital transformation
- Immediate access to leading practices and processes
- Validated solutions with proven real-world usability
- High-touch change management and employee experience
- Reduced implementation risks and enhanced ROI
- A solid platform for continuing evolution and progress

And that's not all...

Powered Enterprise is the culmination of sustained investment and decades of experience in the solution of real-world business challenges. The investment and the learning continue. Ongoing collaboration with our member firm clients and key industry players helps to align advances in technology with the evolving needs of the modern business. It's not just about access to technical upgrades or value-adding services, but owning your future.

Some people are nervous about what that future might hold, but we believe the prospects are genuinely exciting. We are not alone, either. Our research¹ indicates that 65 percent of organisations see technological disruption as an opportunity rather than a threat. Cognitive technologies could spur growth in jobs overall and transform the enterprise into an engine of unconstrained innovation.

'Rise of the Humans' (2017).
