Personal Tax Rates 1

Quebec Non-Refundable Tax Credit Rates and Amounts for 2022

Notes

- (1) In order to determine the credit value, each dollar value must be multiplied by Quebec's tax credit rate. For example, the basic personal credit amount of \$16,143 is multiplied by 15% to determine the credit value of \$2,421.

The unused portion of all non-refundable credits may be transferred from one spouse/partner to another, but only after all credits have been taken into account in the calculation of the individual's income tax otherwise payable.

- (2) Quebec indexes its tax credits each year by using an inflation factor that is calculated based on the provincial rate of inflation, excluding changes in liquor and tobacco taxes. The Quebec inflation factor is 2.64% for 2022. For the purpose of calculating the basic personal amount and personal tax credits, Quebec's tax legislation stipulates automatic indexation.
- (3) This credit is available for a dependent child who is under the age of 18 and is engaged in full-time professional training or post-secondary studies for each completed term, to a maximum of two semesters per year per dependent. It is also available for infirm dependents who are engaged in such activities part-time.
- (4) An eligible student is able to transfer to either parent an amount related to the unused portion of their basic personal amount for the year (transfer mechanism for the recognized parental contribution). Each taxation year, the amount that can be transferred must not exceed the limit applicable for that particular year (\$11,081 for 2022).
- (5) This credit is available if a dependent, other than a spouse, is related to the taxpayer by blood, marriage or adoption and ordinarily lives with the taxpayer. In order to be eligible for the tax credit, the taxpayer must also not have benefited from a transfer of the recognized parental contribution from this dependent.
- (6) The total of the credits for being 65 years of age or over, for living alone or with a dependent, and for receiving pension income is reduced by 18.75% of the amount by which net family income exceeds \$36,590.
- (7) The basic amount is available if the individual lives in a self-contained domestic establishment that he/she maintains and in which no other person, other than himself/herself, a minor person, or an eligible student lives of whom the individual is either the father, mother, grandfather or grandmother, or the great-grandfather or great-grandmother.
- (8) If an individual (i.e., father or mother) is living with an eligible student (i.e., a person who is 18 or over and is a post-secondary or vocational training student who transferred or could have transferred an amount to the single-parent (see note (4)), the individual may be able to add an amount for a single-parent family of \$2,284 to the basic amount for a person living alone (see note (7)).
- (9) For 2022, this credit is available for workers who are 60 years of age or older. For workers aged 60 to 64, the credit applies at a 15% rate to \$10,000 of "eligible work income" in excess of \$5,000. For workers aged 65 and over, the credit applies at a 15% rate to \$11,000 of "eligible work income" in excess of \$5,000. The credit for workers aged 60 and over is reduced by 5% of "eligible work income" over \$36,590. "Eligible work income" includes salary and business income, but excludes taxable benefits received for a previous employment as well as amounts deducted in computing taxable income, such as the stock option deduction.

Any unused portion of the tax credit may not be carried forward or transferred to the individual's spouse.

Personal Tax Rates 2

Quebec Non-Refundable Tax Credit Rates and Amounts for 2022

- (10) Quebec offers first-time home buyers a non-refundable tax credit of up to \$5,000 and worth up to \$750 ($\$5,000 \times 15\%$) for a housing unit located in Quebec and that is acquired after December 31, 2017. To qualify, the individual or his or her spouse has to intend to inhabit the home as a principal place of residence no later than one year after the time of acquisition and neither the individual nor his or her spouse can have owned and lived in another home in the calendar year of the new home purchase or in any of the four preceding calendar years.
- (11) The credit for union and professional dues is calculated based on the annual fees paid in the year. The portion of professional dues relating to liability insurance is allowed as a deduction from income and therefore not included in calculating the credit amount.
- (12) The tuition credit is calculated based on tuition, professional examination and mandatory ancillary fees paid for the calendar year. Tuition fees qualify for an 8% non-refundable credit for Quebec tax purposes. The student may transfer the unused portion of the tuition credit to either one of his/her parents or grandparents. The portion of this credit that is not transferred will be available for future use by the student.
- (13) A tax credit at a rate of 20% may be claimed for interest paid on student loans. Interest not claimed in a particular year may be carried forward indefinitely.
- (14) The medical expense credit is calculated based on qualified medical expenses in excess of 3% of family income. Family income is the total income of both spouses/partners. A tax credit at a rate of 20% may be claimed for eligible medical expenses and eligible expenses to obtain medical care not provided in the region where an individual lives.
- (15) Charitable donations made by both spouses/partners may be totalled and claimed by either person. The maximum amount of donations that may be claimed in a year is 100% of net income. However, all donations may be carried forward for five years (or 10 years for certain particular donations) if they are not claimed in the year made.
- Quebec's tax credit for donations is 20% on the first \$200 of eligible gifts in the year and 25.75% to the extent the donor's income exceeds \$112,655 in 2022. All remaining donations are eligible for a 24% tax credit.
