How do I know that my users only have the “appropriate level” of access?
Am I comfortable that the accounts of leavers are disabled in a timely manner?
Am I comfortable that system access is clearly segregated?
How am I managing internal, external and customer identities?
How do I demonstrate to the regulators and auditors that at all times, I am in control of who has access to systems?

Increasingly organizations are challenged to manage the risk and optimize the opportunity surrounding the digital economy. On the one hand, they need to build technology systems to protect information assets against the threats of cyber security and to control access. On the other, they are being driven by consumer expectations to open the business and encourage access in order to improve customer experience and generate new business. Identity management underpins both of these opposing forces. Managing access to your information assets can help protect your organization’s value and reputation, and avoid regulatory pitfalls.

KPMG provides services around the planning, design, delivery and support of comprehensive enterprise, consumer and citizen Identity and Access Management (IAM) programs to help you mitigate risk, improve compliance and prosper in the digital economy. Innovation and rapidly changing market conditions have caused a shift to ‘best of breed’ software products, disrupting the older model of a single vendor IAM suite and the level of assurance promised through a one-supplier relationship. Beyond technology, our clients benefit from the wealth of management consulting and industry experience across KPMG as IAM is a confluence of technology, people and process.

Major drivers for IAM investments

**Risk Management**
- Detective and preventative policy enforcement
- Discovery and remediation of Rogue/Orphan/Privileged Accounts
- Mitigation of risks associated with BYOD, Cloud and SaaS adoption

**Mergers, Acquisitions & Divestitures**
- Improve access and reduce risk during times of high staff churn

**Digital Transformation**
- Improved customer experience
- Security, preference and privacy management

**Regulatory Compliance**
- 360° view of user access and activity
- Compliance-driven reporting and user access certifications
- Protection of sensitive information assets

**Operational Efficiency**
- Automated provisioning and password management capabilities
- Closed-loop attestation and remediation
- Streamlined identity lifecycle processes (i.e., joiners, movers, leavers)

**Cloud**
- Access governance of cloud resources

**Mobility**
- Increase productivity and accessibility
- Support BYO and CYO initiatives
- Device independent, single user view

**Digital Transformation**
- Improved customer experience
- Security, preference and privacy management

**Major Drivers for IAM Investments**
KPMG Identity & Access Management Consulting Services

KPMG’s well-established consulting capabilities can help avoid the pitfalls common to IAM programs, positioning clients for success from strategy through to operations. We provide comprehensive guidance as well as broad array of tools, accelerators and templates that our practitioners leverage in delivering IAM programs. Our SailPoint and CyberArk alliances combine exceptional technology platforms with KPMG’s transformation and implementation capabilities.

Why KPMG?

- KPMG combines deep solution insight with true vendor independence. We create solutions that mitigate risk and meet regulatory requirements while reducing time-to-market, effort and cost.
- KPMG’s Identity & Access Management (IAM) methodology offers a comprehensive approach to delivering value with IAM that is focused on business transformation.
- We can help establish a well-organized and high quality IAM program by aligning your requirements with the stages of our IAM methodology (Plan – Insight – Design – Implement – Monitor).
