

KPMG Clara

Reimagining your audit experience

KPMG Clara is our single biggest ever investment in audit technology. Built by auditors, for auditors – and used in all our locations around the world – it is a cloud-based platform that gives you the full range of our audit technology solutions in one place.

As technology changes what is possible

By taking advantage of modern cloud and Artificial Intelligence (AI) capabilities, KPMG Clara was built and improved with our long-term alliance partners including Microsoft. KPMG Clara future-proofs how we connect with you, how we understand your risks, and how we carry out your audit. It helps us to deliver on the evolving role of audit by harnessing the power of technology as it redefines what is possible. It enables us to reimagine your audit experience through data and address new risks that arise from your own finance transformation, including the growing use of automation and AI.

...KPMG Clara is the next chapter in a technology-enabled audit

KPMG Clara contains KPMG Clara workflow, or KCw. Driven by auditing standards and our proprietary audit methodology, it helps ensure we consistently deliver high quality anywhere in the world. KCw is designed specifically to push regular updates to our teams as standards evolve. So that everyone is kept informed and is best equipped to design their audit to provide a robust, technology-driven challenge to financials.

Open lines of communication within our teams and with you are key when delivering any audit. This is why we have developed a specific collaboration solution, KPMG Clara for Clients, or KCfC. It allows you to view the status of your audit in real-time, share data with us simply and securely, log and track issues, and access the results of our data and analytics work delivered through KPMG Clara analytics, or KCa. Its value is difficult to overstate, because if there's one thing all our clients have in common, it's that they dislike surprises.

...continually evolving to bring you the right blend of solutions and human insight

Our auditors are data scientists as well as accountants, who know when to deploy which solution, how to deal with complexity, how to get the best and most efficient audit evidence, and how to apply the right judgements.

In short, we have rebuilt our audit approach to put technology at its heart and innovation throughout - but always blending human insight with latest technological advances to give you the best of both worlds. Delivered by KPMG Clara, a truly global platform that is scalable for any environment or IT system.

The result is an audit that is future fit, applied consistently around the world, and provides the most robust assurance possible.

KPMG Clara gives you:

Greater transparency, including 24/7 access to the status of your audit

Data-driven insights through KPMG Clara analytics

Enhanced efficiency and early detection of issues

Globally consistent execution and quality

Best practice insights from our global technology alliance partners
