

What is a Tax Report?

Multishore Tax Reporting

International bank clients are subject to complex tax declaration requirements under the tax laws applicable in their home countries.

For compliance purposes, they need country-specific tax reports that show all the tax-relevant transactions, income and – if applicable – assets.

What is covered in a tax report?

1. Taxable income and – if relevant – the tax value of assets from investments (for wealth tax purposes), etc.
2. Income and – if relevant – wealth, etc. as required according to the country-specific tax forms
3. Tax reports need to be updated every year to cover newest changes in tax law
4. Supplementary explanations and notes in the accompanying document on the approach and tax assessment customized for the needs of each country

KPMG's experienced and international team in Zurich generates high-quality tax reports with the help of our specially developed KPMG software (Multishore Tax Reporting, MTR).

Banking clients like the MTR Tax Reports because they make tax declaration easy.
