## KPMG Baltics AS

Transparency Report 2020  
January 2021

# 1 Message from the local Senior Partner

Welcome to the 2020 KPMG Baltics AS (KPMG, KPMG in Latvia or we<sup>1</sup>) Transparency Report, covering the financial year to 30 September 2020.

We recognise transparency is key if we are to pursue our ongoing ambition for better public understanding of audit effectively. How an audit is conducted is as important as the final result. Effective and efficient audits are dependent on the demonstration of certain behaviours. We focus on these behaviours during the performance of the audit, through education sessions and coaching, and via our review processes. Audit is the cornerstone of our business and the basis on which KPMG was founded. That is why audit quality is absolutely paramount to us: our strategy begins with a relentless focus on quality and further guides us to continuously improve quality and consistency.

Our approach to audit quality relies on people with questioning minds demonstrating professional scepticism. Our people need to be supported by industry-leading technology to create greater consistency in performance and to strengthen monitoring. We are in the process of updating our audit methodology and embedding it in our 'smart' audit platform, known as KPMG Clara, which unites our data and analytics capabilities, new technologies, and collaboration capabilities to improve data flows between the audit team and our clients.

We have also commenced working to implement the International Standard of Quality Management (ISQM) 1, which is expected to become mandatory in 2022. ISQM 1 has created an opportunity to refresh our Audit Quality Framework.

Of course, COVID-19 has affected our audit function this year and, in recognition of this, we have included in this report a special COVID-19 response summary.

One thing COVID-19 has not affected, however, is our KPMG values. KPMG refreshed Values in the 150th year, right across the international network. Each of our five Values of Integrity, Excellence, Courage, Together and For Better is designed to work alongside the others. Our Values help us to do the right thing, especially when we're under pressure. They bind us together, across our different backgrounds and cultures and are common to each of us.

We stay committed to working closely with regulators, audit committees, investors and businesses to meet the expectations of stakeholders and welcome ongoing dialogue as we strive for continuous improvement.

This Transparency Report for KPMG Baltics AS is produced in accordance with the requirements set by Article 33<sup>1</sup> of the Law on Audit Services effective in the Republic of Latvia.

Riga, 31 January 2021

Armine Movsisjana  
Senior Partner  
KPMG Baltics AS

---

<sup>1</sup> Throughout this document, "KPMG" ("we," "our," and "us") refers to KPMG Baltics AS. KPMG Baltics AS is a member firm of KPMG International Limited and is a separate legal entity. KPMG International Limited is a private English company limited by guarantee and does not provide services to clients.

**KPMG Baltics AS**  
Transparency Report 2020  
January 2021

## **2 Who we are**

### **2.1 Our business**

KPMG Baltics AS is a professional services firm that delivers Audit, Tax and Advisory services. We operate out of one office in Riga, Latvia and had an average of 176 partners and employees in the year to 30 September 2020 (2019: 162).

Our audit services in Latvia are delivered through KPMG Baltics AS. Full details of the services offered by KPMG Baltics AS can be found on our website [kpmg.com/ly](https://kpmg.com/ly).

### **2.2 Our strategy**

Our strategy is set by the Management of KPMG Baltics AS and demonstrates a commitment to quality and trust. Our focus is to invest significantly in priorities that form part of the multi-year collective strategy implementation that is taking place across our entire global organization.

## **3 Our structure and governance**

### **3.1 Legal structure**

KPMG Baltics AS is a Latvian Joint Stock Company, with its registered head office in Riga, Vešetas iela 7. KPMG Baltics AS has 2 categories of shares. KPMG AB, the Swedish member firm owns 100% of non-voting category A shares and 100% of voting category B shares.

KPMG Baltics AS is governed by the legislation of the Republic of Latvia and it is a registered audit firm. During the year to 30 September 2020, the firm had an average of 8 certified auditors (2019: 8).

Also, there is KPMG Law Firm operating in Latvia from its registered head office in Riga, Vešetas iela 7, providing legal services.

### **3.2 Name, ownership and legal relationships**

KPMG is the registered trademark of KPMG International and the name by which the member firms are commonly known. The rights of member firms to use the KPMG name and marks are contained within agreements with KPMG International.

Member firms are generally locally owned and managed. Each member firm is responsible for its own obligations and liabilities. KPMG International and other member firms are not responsible for a member firm's obligations or liabilities.

Member firms may consist of more than one separate legal entity. If this is the case, each separate legal entity will be responsible only for its own obligations and liabilities, unless it has expressly agreed otherwise.

### **3.3 Responsibilities and obligations of member firms**

Pursuant to their membership agreements with KPMG International, member firms are required to comply with KPMG International's policies, procedures and regulations including quality standards governing how they operate and how they provide services to clients to compete effectively. This includes having a firm structure that ensures continuity and stability and being able to adopt global strategies, share resources (incoming and outgoing), service multi-national clients, manage risk, and deploy global methodologies and tools.

Each member firm takes responsibility for its management and the quality of its work.

Member firms commit to a common set of KPMG Values (Refer to [Section 11](#)).

KPMG International's activities are funded by a annual payment paid to it by member firms. The basis for calculating such amounts is approved by the Global Board and consistently applied to the member firms. A firm's status as a KPMG member firm and its participation in the KPMG organization may be terminated if, among other things, it has not complied with the policies, procedures and regulations set by KPMG International or any of its other obligations owed to KPMG International.

## 3.4 Governance structure

KPMG Baltics AS applies high standards of corporate governance.

### *The Board*

The Board of KPMG Baltics AS met four times during the year ended 30 September 2020. The agenda of Board meetings included matters of fundamental importance to the company such as commitment to quality, operating and financial performance, annual business plans and budgets, marketing, technology development, recruitment and retention, remuneration and legislative compliance.

Appointments to the Board are made by the Chairperson after consultation with KPMG AB. The members of the Board as at the date of this report were:

- Armine Movsisjana (Chairperson)
- Inga Lipšāne
- Irēna Sarma
- Valda Užāne

### *Governance*

The network appoints partners who are responsible for the governance of the member firm. During the year to 30 September 2020, there were 4 partners in KPMG Baltics AS (2019: 4 partners).

- Armine Movsisjana (Senior Partner)
- Evija Miežite
- Rainers Vilans
- Steve Austwick

The partners meet on a regular basis and are responsible for compliance of the strategy, operations, quality of service and financial performance of KPMG Baltics AS with the Board's decisions and the goals and values of the KPMG network.

## 4 System of quality control

### 4.1 Overview

Tone at the top, leadership, and a clear set of Values and conduct are essential to set the framework for quality. However, these are required to be backed up by a system of quality control that ensures our performance meets the highest professional standards.

To help all audit professionals concentrate on the fundamental skills and behaviours required to deliver a quality audit, KPMG has developed the Audit Quality Framework, based on International Standards on Quality Control (ISQC 1), issued by the International Auditing and Assurance Standards Board (IAASB) and on the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants (IESBA), which apply to professional services firms that perform audits of financial statements.

KPMG International has quality control policies that apply to all member firms. These are included in KPMG's Global Quality & Risk Management Manual (GQRMM) which applies to all KPMG personnel. KPMG Baltics AS is required to establish and maintain a system of quality control and design, implement and test the operating effectiveness of quality controls.

KPMG Baltics AS is required to implement KPMG International policies and procedures and also adopts additional policies and procedures that are designed to address rules and standards issued by Latvian Association of Certified Auditors and other relevant regulators as well as applicable legal and regulatory requirements.<sup>2</sup>

Quality control and risk management are the responsibility of all KPMG Baltics AS partners and employees. This responsibility includes the need to understand and adhere to firm policies and associated procedures in carrying out their day-to-day activities. The system of quality control applies to all KPMG partners and employees wherever they are based.

We are implementing our program to adopt the new international standard on quality management (ISQM 1), which was approved by the IAASB in September 2020 and is expected to be effective from December 2022. ISQM 1 requires each KPMG firms to design, implement and operate a system of quality management to consistently deliver quality audits, and to evaluate the effectiveness of the system on an annual basis.

While this Transparency Report summarizes KPMG's approach to audit quality, it may also be useful for stakeholders interested in member firms' Tax and Advisory services, as many KPMG quality control procedures and processes are cross-functional, and apply equally to all services offered.

#### *Audit quality framework*

At KPMG Baltics AS, audit quality is not just about reaching the right opinion, but about how that opinion is reached. It is about the processes, thought, and integrity behind the auditors' report. The outcome of a quality audit is the delivery of an appropriate and

---

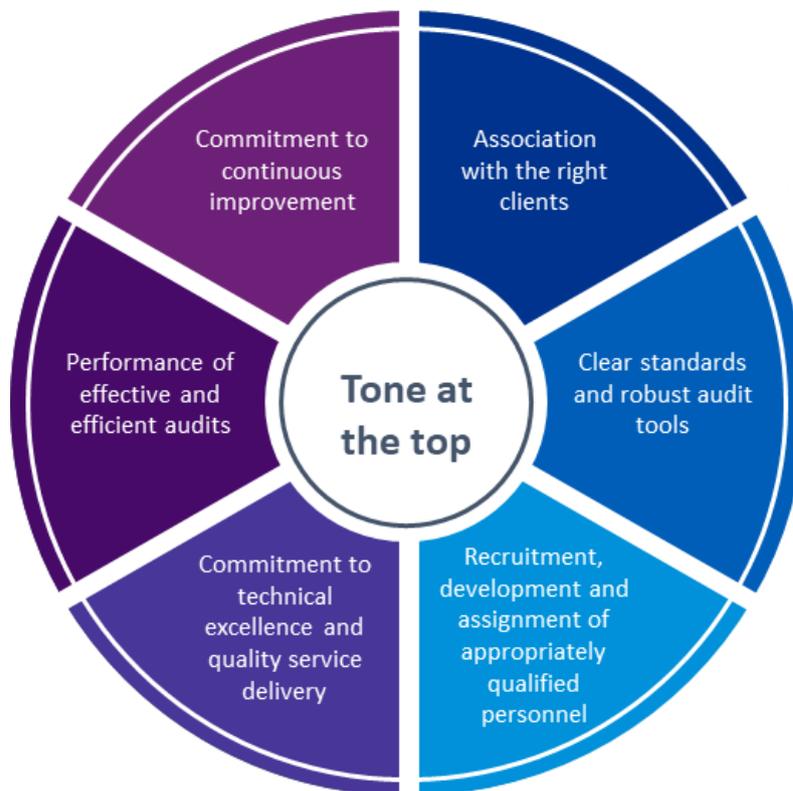

<sup>2</sup> All the references to 'KPMG policies' or 'our policies' refer to the KPMG International policies and to the additional KPMG Baltics AS policies together.

independent opinion in compliance with the relevant professional standards and applicable legal and regulatory requirements.

To help all audit professionals concentrate on the fundamental skills and behaviours required to deliver a quality audit, KPMG International has developed the Audit Quality Framework.

KPMG's audit quality framework introduces a common language that is used by all KPMG firms to describe what drives audit quality and to help highlight to their audit professionals how they contribute to its delivery.

Tone at the top sits at the core of the Audit Quality Framework's seven drivers of audit quality and helps ensure that the right behaviours permeate all KPMG firms. All of the other drivers create a virtuous circle because each driver is intended to reinforce the others.

## 4.2 Tone at the top

KPMG's global leadership, working with regional and member firm leadership, plays a critical role in establishing our commitment to quality and the highest standards of professional excellence. A culture based on quality, integrity and ethics is essential in an organization that carries out audits and other services on which stakeholders rely.

## KPMG Baltics AS

Transparency Report 2020  
January 2021

At KPMG Baltics AS we promote a culture in which consultation is encouraged and recognized as a strength.

Tone at the top means that KPMG Baltics AS' leadership demonstrates commitment to quality, ethics and integrity and communicates its commitment to clients, stakeholders, and society at large to earn public trust.

The KPMG Values are set out in [Section 11](#).

Outlined in KPMG's Global Code of Conduct are the responsibilities all KPMG personnel have to each other, our clients, and the public. It shows how our Values inspire our greatest aspirations and guide all of our behaviours and actions. It defines what it means to work at and be part of KPMG, as well as our individual and collective responsibilities.

Our Values lie at the heart of the way we do things. To do the right thing, the right way. Always. They drive our daily behaviours, guide our decisions, and shape our admissions. They form the foundation of a resilient culture ready to meet challenge with integrity, so we never lose sight of our principal responsibility to protect the public interest. And they propel us forward — through our work and the example we set — as we inspire confidence and empower change throughout the world.

Everyone at KPMG is required to comply with the Global Code of Conduct and to confirm their compliance with the Code. Everyone at KPMG is also required to take regular training covering the Code. We are committed to holding ourselves accountable for behaving in a way that is consistent with the Code.

Individuals are encouraged to speak up if they see something that makes them uncomfortable or that is inconsistent with our Values.

Moreover, everyone at KPMG is responsible for reporting — and is required to report — any activity that could potentially be illegal or in violation of our Values, KPMG policies, applicable laws, regulations or professional standards.

To safeguard this, each KPMG firm is required to have procedures and established channels of communication so that anyone working there can report suspected ethical and quality issues or concerns.

In addition, [the KPMG International hotline](#) is a mechanism for KPMG personnel, clients and other third parties to confidentially report concerns they have relating to certain areas of activity by any KPMG International entity, activities of KPMG firms or KPMG personnel.

All KPMG firms and personnel are prohibited from retaliating against individuals who have the courage to speak up in good faith. Retaliation is a serious violation of the Code, and any person who takes retaliatory action will be subject to their firm's disciplinary policy.

At KPMG Baltics AS, we regularly monitor the extent to which our people feel that the firm lives the KPMG Values, through the Global People Survey.

### 4.2.1 Leadership responsibilities for quality and risk management

KPMG Baltics AS demonstrates commitment to quality, ethics and integrity, and communicates our focus on quality to clients, stakeholders and society. Our leadership plays a critical role in setting the right tone and leading by example — demonstrating an

## **KPMG Baltics AS**

Transparency Report 2020

January 2021

unwavering commitment to the highest standards of professional excellence and championing and supporting major initiatives.

Our leadership team is committed to building a culture based on quality, integrity and ethics, demonstrated through their actions – written and video communications, presentations to teams and one-to-one discussions.

The following individuals have leadership responsibilities for quality and risk management at KPMG Baltics AS.

### *Senior Partner*

In accordance with the principles in ISQC 1, our Senior Partner Armine Movsisjana has assumed ultimate responsibility for the system of quality control at KPMG Baltics AS. She is responsible for firm-wide risk management, all professional practice matters, regulatory relationships, approval of all new service offerings and development of all methodologies and tools.

### *Risk Management Partner (RMP)*

The Risk Management Partner (RMP) Steve Austwick is responsible for setting overall professional risk management and quality control policies and monitoring compliance for the firm. The RMP has a direct reporting line to the Senior Partner. The RMP consults with the appointed Area Quality and Risk Management Leader.

### *Ethics and Independence Partner (EIP)*

The Ethics and Independence Partner Steve Austwick has primary responsibility for the direction and execution of ethics and independence policies and procedures in KPMG Baltics AS and reports on ethics and independence issues to the Senior Partner or member firm leadership.

### *The Audit, Tax and Advisory functions – Function Heads*

The three heads of the client service functions (Audit, Tax and Advisory) are accountable to the Senior Partner for the quality of service delivered in their respective functions. They are responsible for the execution of the risk management, quality assurance and monitoring procedures for their specific functions within the framework set by the Risk Management Partner. These procedures make it clear that at the engagement level, risk management and quality control is ultimately the responsibility of all professionals in the firm.

KPMG Baltics AS Head of Audit is responsible for leading a sustainable high quality audit practice. This includes:

- setting the right ‘tone at the top’ by demonstrating an unwavering commitment to the highest standards of professional excellence, including scepticism, objectivity, and independence;
- developing and implementing strategies to monitor and maintain knowledge and skills required of partners and employees to fulfil their professional responsibilities; and
- working with the Risk Management Partner to monitor and address audit quality and risk matters as they relate to the audit practice, including an annual evaluation of activities considered to be key to audit quality.

### ***Investing in continuous improvement***

KPMG continues to invest significantly in audit quality across the global organization. KPMG International is building on its sound audit quality foundations, both in terms of how it manages the member firms and how it executes the audit engagements.

This means ongoing investment in the system of quality management, global monitoring of audit quality, enhanced support, and providing best-in-class technology and tools for engagement teams.

KPMG International's global audit quality program supports consistent deployment of investments to enhance and drive a common approach.

## **4.3 Association with the right clients**

### **4.3.1 Acceptance and continuance of clients and engagements**

Rigorous global client and engagement acceptance and continuance policies are vital to being able to provide high-quality professional services.

KPMG has engagement acceptance and continuance policies and processes designed to identify and evaluate any potential risks prior to accepting or continuing a client relationship, or performing a specific engagement.

KPMG firms are required to evaluate whether to accept or continue a client relationship, or perform a specific engagement. Where client/engagement acceptance (or continuance) decisions pose significant risks, additional approvals are required.

### **4.3.2 Prospective client and engagement evaluation process**

#### ***Client evaluation***

KPMG Baltics AS undertakes an evaluation of every prospective client. This involves obtaining sufficient information about the prospective client, its key management and significant beneficial owners and then properly analysing the information to be able to make an informed acceptance decision. This evaluation includes completion of a questionnaire to assess the client's risk profile and obtaining background information on the client, its key management, directors and owners. In addition, we obtain additional information required to satisfy our local legal and regulatory requirements.

#### ***Engagement evaluation***

Each prospective engagement is also evaluated to identify potential risks in relation to the engagement. A range of factors is considered as part of this evaluation including potential independence and conflict of interest issues (using Sentinel™, KPMG's conflicts and independence checking system), intended purpose and use of engagement deliverables, public perception, as well as factors specific to the type of engagement. For audit services, these include the competence of the client's financial management team and the skills and experience of partners and employees assigned to staff the engagement. The evaluation is made in consultation with other senior KPMG Baltics AS

partners (and employees) and includes review by quality and risk management leadership as required.

Where audit services are to be provided for the first time, the prospective engagement team is required to perform additional independence evaluation procedures, including a review of any non-audit services provided to the client and of other relevant business, financial and personal relationships.

Similar independence evaluations are performed when an existing audit client becomes a public interest entity or additional independence restrictions apply following a change in the circumstances of the client.

Depending on the overall risk assessment of the prospective client and engagement, additional safeguards may be introduced to help mitigate the identified risks. Any potential independence or conflict of interest issues are required to be documented and resolved prior to acceptance.

A prospective client or engagement will be declined if a potential independence or conflict issue cannot be resolved satisfactorily in accordance with professional standards and our policies, or if there are other quality and risk issues that cannot be appropriately mitigated.

#### 4.3.3 Continuation process

KPMG Baltics AS undertakes an annual re-evaluation of all its audit clients. The re-evaluation identifies any issues in relation to continuing association and any mitigating procedures that need to be put in place (this may include the assignment of additional professionals such as an Engagement Quality Control (EQC) reviewer or the need to involve additional specialists on the audit).

Recurring or long running non-audit engagements are also subject to re-evaluation.

In addition, clients and engagements are required to be re-evaluated if there is an indication that there may be a change in their risk profile, and as part of the continuous independence evaluation process, engagement teams are required to identify if there have been any changes to previously identified threats or if there are new threats to independence. The threats are then evaluated and, if not at an acceptable level, are eliminated or appropriate safeguards are applied to reduce the threats to an acceptable level.

#### 4.3.4 Withdrawal process

Where KPMG Baltics AS comes to a preliminary conclusion that indicates that we should withdraw from an engagement or client relationship, we consult internally and identify any required legal, professional and regulatory responsibilities. We also communicate as necessary with those charged with governance and any other appropriate authority.

#### 4.3.5 Client portfolio management

KPMG Baltics AS leadership appoints engagement partners and directors who have the appropriate competence, capabilities, time and authority to perform the leading role for each engagement.

We review each audit partner's client portfolio in individual discussions with the audit partner. The reviews consider the industry, nature and risk of the client portfolio as a whole along with the competence, capabilities and capacity of the partner to deliver a quality audit for every client.

## **4.4 Clear standards and robust audit tools**

All professionals of KPMG Baltics AS are expected to adhere to KPMG International and KPMG Baltics AS policies and procedures (including independence policies) and are provided with a range of tools and guidance to support them in meeting these expectations. The KPMG Baltics AS policies and procedures set for audit engagements incorporate the relevant requirements of accounting, auditing, ethical and quality control standards, and other relevant laws and regulations.

### **4.4.1 KPMG's commitment to audit quality during the COVID-19 pandemic**

The COVID-19 pandemic has forced us all to think differently, we continue to respond to and embrace this challenge. Most organizations are likely to be impacted by the COVID-19 pandemic, either directly or indirectly, and the increased economic uncertainty and risk may have significant financial reporting implications. Issues including going concern, asset impairments and valuations will require careful judgment as organizations deal with a high degree of uncertainty and market volatility. KPMG firms' role as auditors is to evaluate these judgements.

Since the start of the pandemic we have maintained an online COVID-19 | Financial reporting resource centre to assist companies and other stakeholders understand potential accounting and disclosure implications.

KPMG International has issued extensive guidance to assist teams in addressing the various accounting, financial reporting and audit related matters arising from the impacts of the COVID-19 pandemic including going concern, asset impairments, valuations and related disclosures, materiality, risk assessment, group audits, inventory, subsequent events, audit evidence communications with Those Charged With Governance, and considerations for remote working environments.

KPMG's guidance has been continually updated throughout the pandemic as other significant auditing, accounting and reporting issues have been identified.

KPMG is a technology-enabled organization, with all audit technical accounting and auditing resources, guidance and audit platforms and tools available electronically, enabling the conversion to a remote working environment.

Communication has been increasingly important to everyone during the COVID-19 pandemic. We have leveraged our investments in technology to provide KPMG firms with more regular updates, including virtual meetings to share best practices and guidance.

#### 4.4.2 Bringing consistency through our methodology

Our audit methodology, tools and guidance are:

- globally consistent and fully compliant with the applicable standards, including International Standard on Auditing (ISA), Public Company Accounting Oversight Board (PCAOB) and the American Institute of CPAs (AICPA) and are supplemented to comply with local auditing standards and regulatory or statutory requirements by member firms
- inclusive of KPMG methodology interpretations that drive consistency in areas where the applicable standards are not prescriptive in the approach to be followed
- centered on identifying risk, focusing on risks of material misstatements and the necessary audit response
- made available to all KPMG audit professionals and required to be used, where necessary
- applied even where local auditing standards may be less demanding than the ISAs

The KPMG audit methodology is set out in KPMG's Audit Manual (currently used with eAudit) and the KPMG Audit Execution Guide (for use with the KPMG Clara workflow) and includes additional requirements that go beyond the ISAs, which we believe enhance audit quality.

The methodology emphasizes applying appropriate professional scepticism in the execution of audit procedures and requires compliance with relevant ethical requirements, including independence.

Enhancements to the audit methodology, guidance and tools are made regularly to maintain compliance with standards, and address emerging auditing areas of focus and audit quality results (internal and external). For example, as a result of the COVID-19 pandemic, many companies are experiencing significant financial uncertainty. We have issued guidance to our auditors conducting audit procedures in a remote-working environment, raising awareness of key audit risks such as going concern and impairments and provided reminders of the importance of exercising professional scepticism taking appropriate actions if information is identified that is unexpected or unusual and may be indicative of potential management bias, a fraud risk or fraud.

KPMG firms may add local requirements and/or guidance in the Audit Manual to comply with additional professional, legal, or regulatory requirements.

#### 4.4.3 Delivering through our current audit workflow

The current KPMG audit is enabled through eAudit, an activity-based workflow and electronic audit file used by all KPMG member firms. eAudit is KPMG's audit documentation workflow that allows professionals to complete quality and consistent audits. eAudit integrates KPMG's audit methodology, guidance and industry-specific, and the tools needed to execute and document the audit work performed.

eAudit can be "scaled" to present the relevant requirements and guidance, depending on the nature of the entity to be audited and in accordance with professional standards and applicable legal and regulatory requirements. It provides direct access to KPMG's audit guidance, professional standards and documentation templates.

#### 4.4.4 Investing for the future

While our current audit workflow and methodology are robust and consistent with all auditing standards' requirements, the changes we are making will enable us to execute on our objective of a relentless focus on audit quality and provide us with the platform to build in continuous enhancements as the power of new technologies develops.

We have laid the groundwork for this already with the launch of our smart audit platform, KPMG Clara, in 2017.

#### 4.4.5 Audit solutions for today's world

We recognize that in order to deliver quality audits, we need to continually evolve and develop our technology solutions to keep pace with today's digital world.

That is why we embarked on a process of reimagining our audit platform, workflow and methodology to provide enhanced consistency and support to our audit engagement teams, deliver more detailed insights to our clients, and future-proof our systems for the expected continued development of new technologies such as robotic process automation, machine learning and cognitive technologies.

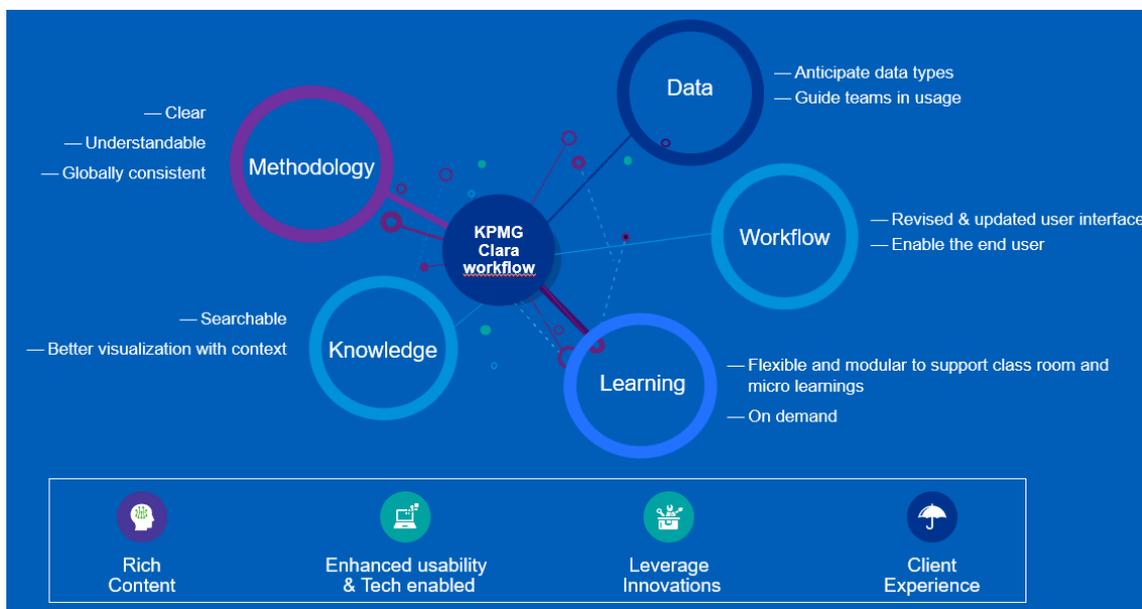

The continuation of this process will see a new workflow and revised audit methodology embedded into the KPMG Clara platform. Limited deployment of the new "KPMG Clara workflow" took place during 2019, and full deployment globally started in 2020, and is expected to be completed by the end of 2022.

The release of the KPMG Clara workflow and revised audit methodology is an important milestone in KPMG's journey to innovate, digitalize and transform the audit experience for our people.

It is significant investment that underlines our commitment to audit quality, consistency and innovation.

#### 4.4.6 Bringing it all together in KPMG Clara

The KPMG Clara smart audit platform brings together KPMG's digital audit capabilities, innovative new technologies, collaboration capabilities and our new KPMG Clara workflow.

### *Creating the new KPMG Clara Workflow*

The new KPMG Clara workflow will be used by our audit teams to execute and document KPMG audits. It will guide audit teams through a series of steps in a logical sequence aligned to the applicable auditing standards, with a clear display of information, visuals, and guidance available at the moment of need, and with embedded advanced digital audit capabilities. The workflow and revised audit methodology will also be scalable – adjusting the requirements to the size and complexity of the audit engagement. This globally-driven project will significantly overhaul and redesign the execution of an audit by KPMG professionals and clearly drive audit quality and global consistency.

Through the use of data mining and tracking of relevant engagement level data indicators, the KPMG Clara workflow will also facilitate member firms’ monitoring of audit execution at the engagement level. Once the KPMG Clara Workflow has been fully deployed our predecessor audit workflow tool, eAudIT, will be retired.

### *Strategically embedding the use of data through digital audit capabilities*

KPMG Clara also allows us to more seamlessly build digital audit capabilities into our audits. Digital audit routines are capable of interrogating and analysing vast quantities of data.

KPMG’s audit is designed to:

- **enhance audit quality**; by providing a deeper understanding of data populations, giving focus to higher risk transactions;
- **be secure**; by restricting access to data both in transit and within KPMG’s IT environments; and
- **be transparent**; by facilitating detailed analysis to uncover the reasons behind, and root causes of, outliers and anomalies and provide increased visibility into higher risk transactions and process areas.

Digital audit capabilities and routines are built on principles and professional standards underlying an audit and do not relieve auditors of their responsibilities.

Current capabilities in this area facilitate the performance of planning and risk assessment activities and substantive procedures, and include capabilities that:

- enable the analysis of account balances and journal entry data
- automate ‘period on period’ balances comparison and ‘time series’ evolution information
- enable the analysis of sub-ledger, transactional data over certain business processes and accounts.

Together with our KPMG Clara platform, we are significantly investing in digital audit capabilities and paving the way for the increasing use of emerging technologies such as robotic process automation and machine learning — which will take the power of technology applied in the audit to an even greater level.

#### 4.4.7 Independence, integrity, ethics and objectivity

##### *Overview*

Auditor independence is a cornerstone of international professional standards and regulatory requirements.

KPMG International has detailed independence policies and procedures, incorporating the requirements of the IESBA Code of Ethics. These are set out in KPMG’s GQRMM, which applies to all KPMG member firms. Automated tools, which are required to be used for every prospective engagement to identify potential independence and conflict of interest issues, facilitate compliance with these requirements.

These policies and processes cover areas such as firm independence (covering, for example, treasury and procurement functions), personal independence, firm financial relationships, post-employment relationships, partner rotation and approval of audit and non-audit services.

The Partner-in-Charge of the Global Independence Group is supported by a core team of specialists to help ensure that robust and consistent independence policies and procedures are in place at KPMG member firms, and that tools are available to help the firms and their personnel to comply with these requirements.

KPMG Baltics AS has a designated Ethics and Independence Partner (EIP) who has primary responsibility for the direction and execution of ethics and independence policies and procedures in KPMG Baltics AS. The EIP is responsible for communicating and implementing KPMG global policies and procedures and ensuring that local policies and procedures are established and effectively implemented when they are more stringent than the global requirements. The EIP fulfils this responsibility through:

- implementing/monitoring the ethics and independence quality control process and structure within the firm;
- approving/appointing partners responsible for ethics and independence within the firm;
- overseeing the processes related to the evaluation of specific independence threats in connection with clients and prospective clients;

## KPMG Baltics AS

Transparency Report 2020  
January 2021

- participating in the development and delivery of training materials,
- monitoring compliance with policies;
- implementing procedures to address non-compliance; and
- overseeing the disciplinary process for ethics and independence matters.

Amendments to KPMG International's ethics and independence policies in the course of the year are communicated in regular quality and risk communications with all KPMG firms. KPMG firms are required to implement changes as specified in the communications, and this is checked through the internal monitoring programs described in [Section 4.8.1](#).

The partners and employees of KPMG Baltics AS are required to consult with the EIP on certain matters as defined in the GQRMM. The EIP may also be required to consult with the Global Independence Group, depending upon the facts and circumstances.

### *Personal financial independence*

KPMG International policies require that KPMG firms and KPMG professionals are free from prohibited financial interests in, and prohibited financial relationships with, KPMG firm assurance and audit clients (by definition, 'audit client' includes its related entities or affiliates), their management, directors, and, where required, significant owners. All KPMG partners- irrespective of their firm or function- are generally prohibited from owning securities of any audit client of any KPMG firm.

KPMG firms use a web-based independence compliance system (KICS) to assist KPMG professionals in complying with personal independence investment policies. This system contains an inventory of publicly available investments and provides a tracking mechanism for required users to report acquisitions and disposals of their financial interests. The system facilitates monitoring by identifying and reporting impermissible investments and other non-compliant activity (i.e., late reporting of an investment acquisition).

All partners and all manager grade and above client-facing employees are required to use the KICS system prior to entering into an investment to identify whether they are permitted to do so. They are also required to maintain a record of all of their investments in publicly traded entities in KICS, which automatically notifies them if any investment subsequently becomes restricted. Newly restricted investments are required to be disposed of within five business days of the notification. KPMG monitors partner and manager compliance with this requirement as part of our program of independence compliance audits of professionals.

The Global Independence Group provides guidance and required procedures relating to the audit and inspection by KPMG firms of personal compliance with KPMG's independence policies. This includes sample criteria including the minimum number of professionals to be audited annually.

### *Employment relationships*

Any KPMG Baltics AS professional providing services to an audit client irrespective of function is required to notify our EIP if they intend to enter into employment negotiations with that audit client. For partners, this requirement extends to any audit client of any KPMG firm that is a public interest entity.

## **KPMG Baltics AS**

Transparency Report 2020  
January 2021

Former members of the audit team or former partners of KPMG Baltics AS are prohibited from joining an audit client in certain roles unless they have disengaged from all significant connections to KPMG Baltics AS, including payments which are not fixed and predetermined and/or would be material to KPMG Baltics AS and have ceased participating in the business and professional activities of KPMG Baltics AS.

Key audit partners and members of the chain of command for an audit client that is a public interest entity are subject to time restrictions (referred to as 'cooling-off' periods) that preclude them from joining that client in certain roles until a defined period of time has passed.

We communicate and monitor requirements in relation to employment and partnership of KPMG Baltics AS professionals by audit clients.

KPMG member firms are required to also be free from prohibited interests in, and prohibited relationships with, audit clients, their management, directors and, where required, significant owners.

### *Firm financial independence*

In common with other KPMG firms, KPMG Baltics AS uses KICS to record its own direct and material indirect investments in listed entities and funds (or similar investment vehicles) as well as in non-listed entities or funds. This includes investments held in associated pension and employee benefit plans.

Additionally, KPMG Baltics AS is required to record in KICS all borrowing and capital financing relationships, as well as custodial, trust and brokerage accounts that hold member firm assets.

On an annual basis, KPMG Baltics AS confirms compliance with independence requirements as part of the Risk Compliance Program.

### *Business relationships/suppliers*

KPMG Baltics AS has policies and procedures in place that are designed to ensure its business relationships with audit clients are maintained in accordance with the IESBA Code of Ethics and other applicable independence requirements, such as those promulgated by the SEC.

### *Independence clearance process*

KPMG Baltics AS follows specific procedures to identify and evaluate threats to independence related to prospective audit clients that are public interest entities; these procedures, also referred to as 'the independence clearance process,' required to be completed prior to accepting an audit engagement for these entities.

### *Independence training and confirmations*

All KPMG Baltics AS partners and client service/ facing professionals, as well as certain other individuals, are required to complete independence training that is appropriate to their grade and function upon joining KPMG Baltics AS and on an annual basis thereafter. New partners and client facing employees who are required to complete this training should do so by the earlier of (a) thirty days after joining KPMG Baltics AS or (b)

## **KPMG Baltics AS**

Transparency Report 2020  
January 2021

before providing any services to, or becoming a member of the chain of command for, any audit client.

We also provide all partners and employees with annual training on:

- The Global Code of Conduct and ethical behaviour, including KPMG's anti-bribery policies, compliance with laws, regulations, and professional standards; and
- reporting suspected or actual non-compliance with laws, regulations, professional standards, and KPMG's policies.

New partners and employees are required to complete this training within three months of joining KPMG Baltics AS.

All KPMG partners and employees are required to sign, upon joining KPMG Baltics AS/ accepting their offer to join KPMG Baltics AS- and thereafter, an annual confirmation stating that they have remained in compliance with applicable ethics and independence policies throughout the year.

### *Non-audit services*

All KPMG firms are required, at a minimum, to comply with the IESBA Code of Ethics and applicable laws and regulations, for example, issued by the Latvian Association of Certified Auditors, related to the scope of services that can be provided to audit clients.

KPMG Baltics AS is required to establish and maintain a process to review and approve all new and modified services that are developed by KPMG Baltics AS. The KPMG Baltics AS EIP is involved in the review of potential independence issues related to these new or modified services.

In addition to identifying potential conflicts of interest, Sentinel™ facilitates compliance with independence requirements. Certain information on all prospective engagements, including detailed service descriptions, deliverables, and estimated fees are required to be entered into Sentinel™ as part of the engagement acceptance process. When the engagement is for an audit client, an evaluation of potential independence threats and safeguards is also required to be included in the Sentinel™ submission. Lead audit engagement partners (LEAPs) are required to: maintain group structures for their publicly traded and certain other audit clients including their related entities or affiliates in Sentinel™. They are also responsible for identifying and evaluating any independence threats that may arise from the provision of a proposed non-audit service and the safeguards available to address those threats.

For entities for which group structures are maintained, Sentinel enables LEAPs to review and request revision, approve, or deny, any proposed service for those entities worldwide. For approved proposed services, Sentinel designates a timeframe during which the approval remains valid. Upon expiration of the established timeframe, the services are required to be complete or be re-evaluated for permissibility; otherwise, the services are required to be exited.

KPMG global independence policies prohibit member firm audit partners from being evaluated on, or compensated based on, their success in selling non-assurance services to their audit clients.

### *Fee dependency*

KPMG International's policies recognize that self-interest or intimidation threats may arise when the total fees from an audit client represent a large proportion of the total fees of the KPMG firm expressing the audit opinion. These policies require firms to consult with their Area Quality & Risk Management Leader where it is expected that total fees from an audit client will exceed 10 percent of the annual fee income of the member firm for two consecutive years. In the event that the total fees from a public interest entity audit client and its related entities were to represent more than 10 percent of the total fees received by a particular member firm for two consecutive years, these policies further require that:

- This be disclosed to those charged with governance at the audit client; and
- A partner from another KPMG member firm be appointed as the Engagement Quality Control (EQC) reviewer.

No audit client accounted for more than 10 percent of the total fees received by KPMG Baltics AS over the last two years.

### *Resolving conflicts of interest*

Conflicts of interest can arise in situations where KPMG partners or employees have a personal connection with the client which may interfere, or be perceived to interfere, with their ability to remain objective, or where they are personally in possession of confidential information relating to another party to a transaction. Consultation with the Risk Management Partner (RMP) or the Ethics and Independence Partner (EIP) is required in these situations.

KPMG International policies are also in place to prohibit KPMG partners and staff from offering and accepting inducements, including gifts and hospitality to or from audit clients, unless the value is trivial and inconsequential, is not prohibited by relevant law or regulation and is not deemed to have been offered with the intent to improperly influence the behaviour of the recipient or which would cast doubt on the individual's or the member firm's integrity, independence, objectivity or judgment.

All KPMG firms and personnel are responsible for identifying and managing conflicts of interest, which are circumstances or situations that have, or may be perceived to have an impact on a member firm and/ or its partners and employees in their ability to be objective or otherwise act without bias.

All KPMG firms are required to use Sentinel™ for potential conflict identification so that these can be addressed in accordance with legal and professional requirements.

KPMG has review who are responsible for reviewing any identified potential conflict and working with the affected member firms to resolve the conflict, the outcome of which are required to be documented.

Escalation and dispute resolution procedures are in place for situations in which agreement cannot be reached on how to manage a conflict. If a potential conflict issue cannot be appropriately mitigated, the engagement is declined or terminated.

## KPMG Baltics AS

Transparency Report 2020  
January 2021

### *Independence breaches*

All KPMG Baltics AS personnel are required to report an independence breach as soon as they become aware of it to the EIP. In the event of failure to comply with our independence policies, whether identified in the compliance review, self-declared or otherwise, professionals are subject to an independence disciplinary policy. All breaches of independence rules are required to be reported to those charged with governance as soon as possible except where alternative timing for less significant breaches has been agreed to with those charged with governance.

KPMG Baltics AS has a documented and communicated disciplinary policy in relation to breaches of independence policies incorporating incremental sanctions reflecting the seriousness of any violations. Our Disciplinary Committee oversees policies and procedures in relation to ethical matters and breaches of requirements.

Matters arising are factored into promotion and compensation decisions and, in the case of engagement leaders and managers, are reflected in their individual quality and risk metrics.

### *Compliance with laws, regulations, and anti-bribery and corruption*

Compliance with laws, regulations and standards is a key aspect for everyone at KPMG Baltics AS. In particular, we have zero tolerance of bribery and corruption.

We prohibit involvement in any type of bribery — even if such conduct is legal or permitted under applicable law or local practice. We also do not tolerate bribery by third-parties, including by our clients, suppliers or public officials.

Further information on KPMG International anti-bribery and corruption policies can be found on the [anti-bribery and corruption site](#).

### *Audit Partner and Certified Auditor rotation*

KPMG International partner rotation policies are consistent with the requirements of the IESBA Code of Ethics and require all member firms to comply with any stricter local applicable rotation requirements.

KPMG Baltics AS partners and certified auditors are subject to periodic rotation of their responsibilities for audit clients under applicable laws, regulations, independence rules and KPMG International policy. These requirements place limits on the number of consecutive years that partners and certified auditors in certain roles may provide audit services to a client, followed by a “time-out” period during which time these partners and certified auditors may not:

- participate in the audit;
- provide quality control for the audit;
- consult with the engagement team or the client regarding technical or industry-specific issues;
- in any way influence the outcome of the audit;
- lead or coordinate professional services at the client;
- oversee the relationship of the firm with the audit client; or

- have any other significant or frequent interaction with senior management or those charged with governance at the client

KPMG Baltics AS monitors the rotation of audit engagement leaders (and any other key roles, such as the Key Audit Partner and Engagement Quality Control Reviewer and Certified Auditor, where there is a rotation requirement) and develops transition plans to enable allocation of partners with the necessary competence and capability to deliver a consistent quality of service to clients.

## 4.5 Recruitment, development and assignment of appropriately qualified personnel

One of the key drivers of quality is ensuring that KPMG professionals have the appropriate skills and experience, passion and purpose, to deliver high quality audits. This requires the right recruitment, development, reward, promotion, retention and assignment of professionals.

### 4.5.1 Recruitment

KPMG Baltics AS is committed to building an extraordinary people experience for all current and prospective KPMG partners and employees.

Our recruitment strategy is focused on drawing entry-level talent from a broad talent base, including working with established universities and business schools. KPMG Baltics AS also recruits significant numbers at an experienced hire.

All candidates submit an application and are employed following a variety of selection processes, which may include application screening, competency-based interviews, psychometric and ability testing, and qualification/reference checks. These leverage fair and job-related criteria to ensure that candidates possess the appropriate skills and experience to perform competently, are suitable and best placed for their roles.

KPMG Baltics AS recruited over 70 new people in the year ended 30 September 2020 (2019: over 70).

Where individuals are recruited for senior grades, a formal independence discussion is conducted with them by the Ethics and Independence Partner or a delegate. KPMG Baltics AS does not accept any confidential information belonging to the candidate's former firm/employer.

### 4.5.2 Personal development

KPMG Baltics AS approach to performance development, "Open Performance Development", is built around the *Everyone a Leader* performance principles, and includes:

- Global role profiles (including role profiles specific to audit quality accountabilities and responsibilities);
- a goal library (including audit quality content); and
- Standardized review forms (with provision for audit quality ratings).

Open Performance Development is linked to the KPMG Values and designed to articulate what is required for success — both individually and collectively. We know that by being clear and consistent about the behaviour we're looking for and rewarding those who demonstrate them, we will continue to drive a relentless focus on audit quality.

At the same time, we are driving a shift in our performance-driven culture, supported by and enacted through leading technology that allow us to embed audit quality into the assessment of performance and the decisions around reward as well as drive consistency across the global organization.

KPMG Baltics AS monitors quality and compliance incidents and maintains quality and compliance metrics in assessing the overall evaluation, promotion and remuneration of partners (and directors and managers). These evaluations are conducted by performance managers and partners who are in the position to assess performance.

#### 4.5.3 Inclusion and Diversity programs

KPMG Baltics AS is committed to fostering an inclusive culture for all. Being inclusive enables us to bring together successful teams with the broadest range of skills, experiences and perspectives.

Our leadership and management teams also need to reflect the diversity within our firm and the diversity of our clients.

We believe that the established KPMG Global Inclusion and Diversity strategy provides the framework to drive the actions that are necessary to promote inclusion and diversity at KPMG Baltics AS and across all KPMG firms.

#### 4.5.4 Reward & Promotion

##### *Reward*

KPMG has compensation and promotion policies that are informed by market data, clear, simple, and linked to the performance review process. This helps our partners and employees understand what is expected of them, and what they can expect to receive in return. The connection between performance and reward is achieved by assessing relative performance across a peer group to inform reward decisions.

Reward decisions are based on consideration of both individual and firm performance.

The extent to which our people feel their performance has been reflected in their reward is measured through the Global People Survey, with action plans developed accordingly.

##### *Promotion*

The results of performance evaluations directly affect the promotion and remuneration of partners and employees and, in some cases, their continued association with KPMG.

##### *Partner admissions*

The process of KPMG Baltics AS for admission to partnership is rigorous and thorough, involving appropriate members of leadership. Our criteria for admission to the KPMG Baltics AS partnership are consistent with our commitment to professionalism and integrity, quality, and being an employer of choice.

#### 4.5.5 Assignment of professionals

KPMG Baltics AS has procedures in place to assign both the engagement partners and other professionals to a specific engagement on the basis of their skill sets, relevant professional and industry experience, and the nature of the assignment or engagement. Function heads are responsible for the partner assignment process. Key considerations include partner experience and capacity, based on an annual partner portfolio review, to perform the engagement taking into account the size, complexity and risk profile of the engagement and the type of support to be provided (i.e. the engagement team composition and specialist involvement).

Audit engagement partners are required to be satisfied that their engagement teams have appropriate competencies, training and capabilities, including time, to perform audit engagements in accordance with our audit methodology, professional standards, and applicable legal and regulatory requirements. This may include involving specialists from our own firm, other KPMG member firms or external experts.

When considering the appropriate competence and capabilities expected of the engagement team as a whole, the engagement partner's considerations may include the following:

- an understanding of, and practical experience with, audit engagements of a similar nature and complexity through appropriate training and participation;
- an understanding of professional standards and legal and regulatory requirements;
- appropriate technical skills, including those related to relevant information technology and specialized areas of accounting or auditing;
- knowledge of relevant industries in which the client operates;
- ability to apply professional judgment;
- an understanding of KPMG Baltics AS quality control policies and procedures; and
- Quality Performance Review (QPR) results and results of regulatory inspections.

#### 4.5.6 Insights from our people – Global People Survey (GPS)

Annually KPMG Baltics AS invites all its people to participate in an independent Global People Survey to share their perception about their experience of working for KPMG. The GPS provides an overall measure of our people's engagement through an Engagement Index as well as insights into areas driving engagement which may be strengths or opportunities. Results can be analysed by functional or geographic area, grade, role, gender to provide additional focus for action. Additional insight is provided on how we are faring on categories known to impact employee engagement. We also cover areas of focus which are directly relevant to audit quality; the survey includes specific audit quality related questions that all individuals who participated in audit respond to, giving us a particular data set for audit quality related matters.

The survey also specifically provides KPMG Baltics AS leadership and KPMG Global leadership with results related to quality and risk behaviours, audit quality, upholding the KPMG Values, employee and partner attitudes to quality, leadership and tone at the top.

KPMG Baltics AS participates in the GPS, monitors results and takes appropriate actions to communicate and respond to the findings of the survey. The results of the GPS are

also aggregated for the entire global organization and are presented to the Global Board each year and appropriate follow-up actions agreed.

## **4.6 Commitment to technical excellence and quality service delivery**

All professionals of KPMG Baltics AS are provided with the technical training and support they need to perform their roles. This includes access to internal specialists and the professional practice department (DPP), either to provide resources to the engagement team or for consultation. Where the right resource is not available within KPMG Baltics AS, the firm accesses a network of highly skilled KPMG professionals in other KPMG firms.

At the same time audit policies require all KPMG audit professionals to have the appropriate knowledge and experience for their assigned engagements. KPMG Baltics AS structure enables our engagement teams to apply their business understanding and industry knowledge to maintain audit quality and deliver valued insights.

### **4.6.1 Lifetime learning strategy**

#### *Formal training*

Annual training priorities for development and delivery are identified by the Audit Learning and Development steering groups at global, regional and, where applicable, at a local level. Training is delivered using a blend of learning approaches and performance support to assist auditors on the job.

#### *Mentoring and on the job training*

Learning is not confined to a single approach — rich learning experiences are available when needed through coaching and just in time learning, available at the click of a mouse and aligned with job specific role profiles and learning paths.

Mentoring and on-the-job experience play key roles in developing the personal qualities important for a successful career in auditing, including professional judgment, technical excellence and instinct.

We support a coaching culture throughout KPMG as part of enabling KPMG professionals to achieve their full potential and instill that every team member is responsible for building the capacity of the team, coaching other team members and sharing experiences.

### **4.6.2 Licensing**

All professionals of KPMG Baltics AS are required to comply with applicable professional license rules and satisfy the Continuing Professional Development requirements in Latvia. KPMG policies and procedures are designed to facilitate compliance with license requirements. We are responsible for ensuring that audit professionals working on engagements have appropriate audit, accounting and industry knowledge, and experience in the financial reporting framework of the Republic of Latvia.

#### 4.6.3 Access to specialist networks

KPMG Baltics AS engagement teams have access to a network of KPMG specialists—either within their firm or in other KPMG firms.

These specialists receive the training they need to ensure they have the competencies, capabilities and objectivity to appropriately fulfil their role.

The need for specialists to be assigned to an audit engagement in an areas such as information, technology, tax, treasury, actuarial, forensic and valuations is considered as part of the audit engagement acceptance and continuance process, as well as during the conduct of the engagement.

#### 4.6.4 Culture of consultation

KPMG encourages a strong culture of consultation that supports engagement teams at KPMG firms throughout their decision-making processes and is a fundamental contributor to audit quality. KPMG Baltics AS promotes a culture in which consultation is recognized as a strength and that encourages all KPMG professionals to consult on difficult or contentious matters. To help with this, firms are required to have established protocols for consultation and documentation of significant accounting and auditing matters, including procedures to facilitate resolution of differences of opinion on engagement issues. In addition, the GQRMM includes mandatory consultation requirements on certain matters.

##### *Technical consultation and global resources*

Technical auditing and accounting support is available to member firms through the Global Audit Methodology Group (GAMG), KPMG Global Solutions Group (KGSG), the ISG and the PCAOB Standards Group (PSG)..

##### *Global Audit Methodology Group (GAMG)*

KPMG's audit methodology is developed and maintained by the Global Audit Methodology Group (GAMG). The GAMG develops our audit methodology based on the requirements of the applicable auditing standards – International Standards on Auditing, PCAOB and AICPA.

##### *KPMG Global Solutions Group (KGSG)*

The KGSG and GAMG work collaboratively to support member firms through collaboration, innovation and technology. We have made significant investment in our audit methodology and tools with the core focus of improving audit quality and global consistency.

Key areas of work performed include:

- developing innovative audit capabilities (i.e. technology solutions) and deploying and using advanced audit solutions
- deploying KPMG Clara — our smart audit platform, incorporating advanced technologies, data science, audit automation, data visualization and more

- enhancing KPMG’s audit methodology, workflow and knowledge used by member firms’ audit professionals.

With locations in each of the three KPMG regions , (Americas, EMA and ASPAC), the KGSG and GAMG teams comprise professionals with backgrounds in audit, IT, data science, mathematics, statistics, and more from around the world who bring diverse experiences and innovative ways of thinking to further evolve KPMG’s audit capabilities.

#### *International Standards Group (ISG)*

The ISG works with Global IFRS topic teams with geographic representation from around the world, and the IFRS Panel and ISA Panel to promote consistency of interpretation of IFRS and auditing requirements between member firms, identify emerging issues, and develop global guidance on a timely basis.

#### *PCAOB Standards Group (PSG)*

The PCAOB Standards Group (PSG) comprises a dedicated group of professionals with background in PCAOB auditing standards who promote consistency of interpretation of PCAOB auditing standards applied globally in KPMG firms’ audits of non-US components and foreign private issuers and non-US components of SEC issuers, as defined by SEC regulations. The PSG also provides input into the development of training for auditors who work on PCAOB audit engagements and, where practicable, facilitates delivery of such training.

#### *Member firm professional practice resource*

Member firms provide consultation support on auditing and technical accounting matters to their audit professionals through professional practice resources (referred to as Department of Professional Practice or DPP). This source also assists engagement teams where there are differences of opinion either within teams or with the EQC reviewer. Unresolved differences are required to follow a prescribed escalation protocol for final resolution. KPMG’s International Standards Group and PCAOB Standards Group are also available for consultation support when required.

## **4.7 Performance of effective and efficient audits**

How an audit is conducted is as important as the final result. Partners and personnel of KPMG Baltics AS are expected to demonstrate certain key behaviours and follow certain policies and procedures in the performance of effective and efficient audits.

#### *Ongoing mentoring, supervision and review*

To invest in the building of skills and capabilities of KPMG professionals, KPMG Baltics AS promotes a continuous learning environment and supports a coaching culture.

Ongoing mentoring, coaching and supervision during an audit involves:

- engagement partner participation in planning discussions;
- tracking the progress of the audit engagement;

- considering the competence and capabilities of the individual members of the engagement team, including whether they have sufficient time to carry out their work, whether they understand their instructions, and whether the work is being carried out in accordance with the planned approach to the engagement;
- helping engagement team members address any significant matters that arise during the audit and modifying the planned approach appropriately; and
- identifying matters for consultation with more experienced team members during the engagement.

A key part of effective mentoring and supervision is timely review of the work performed so that significant matters are promptly identified, discussed and addressed.

#### *Engagement quality control (EQC) reviewers*

The EQC review is an important part of KPMG's framework for quality. An EQC Reviewer is required to be appointed for audits, including any related review(s) of interim financial information of all listed entities, non-listed entities with a high public profile, engagements that require an EQC review under applicable laws or regulations, and other engagements as designated by the Risk Management Partner or country Head of Audit.

An EQC review provides reasonable assurance that the team has appropriately identified significant risks, including fraud risks, and has designed and executed audit procedures to address them.

EQC reviewers are required to meet training and experience criteria to perform a quality control review for a particular engagement. Reviewers are independent of the engagement team and audit client and have the appropriate experience and knowledge to perform an objective review of the more critical decisions and judgments made by the engagement team and the appropriateness of the financial statements.

The audit is completed only when the EQC reviewer is satisfied that all significant questions raised have been resolved, though the engagement partner is ultimately responsible for the resolution of accounting and auditing matters.

KPMG Baltics AS is continually seeking to strengthen and improve the role that the EQC review plays in member firm audits and have taken a number of actions to reinforce this, including issuing leading practice guidance, incorporating specific review requirements into our audit workflow, and developing policies relating to recognition, nomination and development of EQC reviewers.

#### *Reporting*

Auditing standards and the Law on Audit Services effective in Latvia largely dictate the format and content of the auditors' report that includes an opinion on the fair presentation of the client's financial statements in all material respects. All audit opinions are formed by experienced engagement partners and certified auditors based on the audit performed.

In preparing auditors' reports, engagement partners have access to extensive reporting guidance and technical support through consultations with Departments of Professional

## **KPMG Baltics AS**

Transparency Report 2020

January 2021

Practice, especially where there are significant matters to be reported to users of the auditors' report (e.g. a modification to the opinion or through the inclusion of an 'emphasis of matter' or 'other matter' paragraph), as well as key audit matters to be communicated. All audit opinions are signed by certified auditors on behalf of the firm.

### *Engagement Documentation*

Our audit documentation is completed and assembled according to the timeline established by KPMG Baltics AS policy and auditing standards, and we have implemented administrative, technical and physical safeguards to protect the confidentiality and integrity of client and firm information.

### *Insightful, open, and honest two-way communication*

Two-way communication with those charged with governance, often identified as the audit committee, is key to audit quality and a key aspect of reporting and service delivery.

At KPMG Baltics AS we stress the importance of keeping those charged with governance informed of issues arising throughout the audit. We achieve this through a combination of reports and presentations, attendance at audit committee or board meetings, and, when appropriate, ongoing informal discussions with management and members of the Audit Committee.

#### **4.7.1 Client confidentiality, information security, and data privacy**

The importance of maintaining client confidentiality is emphasized through a variety of mechanisms including the KPMG Global and KPMG Baltics AS Code of Conduct, training, and the annual affidavit/confirmation process, that all KPMG professionals are required to complete.

We have a formal document retention policy concerning the retention period for audit documentation and other records relevant to an engagement in accordance with the relevant applicable laws, standards and regulations valid in the Republic of Latvia.

We have clear policies on information security that cover a wide range of areas. Data Privacy policies are in place governing the handling of personal information, and associated training is required for all personnel of KPMG Baltics AS.

## **4.8 Commitment to continuous improvement**

KPMG commits to continually improve the quality, consistency and efficiency of KPMG audits. Integrated quality monitoring and compliance programs enable member firms to identify quality deficiencies, to perform root cause analysis and develop, implement and report remedial action plans both in respect of individual audit engagements and the overall system of quality control.

The quality monitoring and compliance programs are globally administered and consistent in their approach across all member firms, including the nature and extent of testing and reporting. KPMG Baltics AS compares the results of its internal monitoring programs with the results of those of any external inspection programs and takes appropriate action.

#### 4.8.1 Internal monitoring and compliance programs

KPMG Baltics AS monitoring programs evaluate both:

- engagement performance in compliance with the applicable standards, applicable laws and regulation and KPMG International key policies and procedures; and
- KPMG Baltics AS compliance with KPMG International key policies and procedures and the relevance, adequacy and effective operation of key quality control policies and procedures.

Our internal monitoring program also contributes to the assessment of whether our system of quality control has been appropriately designed, effectively implemented, and operates effectively. These include:

- Quality Performance Reviews (QPR) and Risk Compliance Programs (RCP), which are conducted annually across the Audit, Tax, and Advisory functions; and
- A cross-functional Global Compliance Review (GCR) program with firms selected for review at various intervals based on identified risk criteria. .

The results and lessons from the integrated monitoring programs are communicated internally and appropriate action is taken at local, regional and global levels.

##### *Audit Quality Performance Reviews (QPRs)*

The QPR Program assesses engagement level performance and identifies opportunities to improve engagement quality.

##### *Risk-based approach*

Each engagement leader in every KPMG firm is reviewed at least once in a three-year cycle. A risk-based approach is used to select engagements for review.

KPMG Baltics AS conducts the annual QPR program in accordance with KPMG International QPR instructions. The reviews are performed at KPMG Baltics AS level and are monitored regionally and globally. Firm audit QPR reviews are overseen by a senior experienced lead reviewer independent from the firm.

##### *Reviewer selection, preparation and process*

There are robust criteria for selection of reviewers. Review teams include senior experienced lead reviewers that are independent of the firm under review.

Training is provided to review teams and others overseeing the process, with a focus on topics of concern identified by audit oversight regulators and the need to be as rigorous as external reviewers.

##### *Evaluations from audit QPR*

Consistent criteria are used to determine engagement ratings and member firm Audit Practice evaluations.

Audit engagements selected for review are rated as Satisfactory, Performance Improvement Needed or Unsatisfactory.

## **KPMG Baltics AS**

Transparency Report 2020  
January 2021

### *Reporting*

Findings from the QPR Program are disseminated to firm professionals through written communications, internal training tools, and periodic partner, manager and staff meetings. These areas are also emphasized in subsequent inspection programs to gauge the extent of continuous improvement.

Lead audit engagement partners are notified of less than satisfactory engagement (defined as 'Performance Improvement Needed' or 'Unsatisfactory') ratings on their respective cross-border engagements. Additionally, lead audit engagement partners of parent companies/head offices are notified where a subsidiary/affiliate of their client group is audited by a member firm where significant quality issues have been identified during the QPR.

### *Risk Compliance Program (RCP)*

KPMG International develops and maintains quality control policies and processes that apply to all KPMG firms. These policies and processes, and their related procedures, include the requirements of ISQC-1. During the annual RCP, we perform a robust assessment program consisting of documentation of quality controls and procedures, related compliance testing and reporting of exceptions, action plans and conclusions.

The objectives of the RCP are to:

- document, assess and monitor the extent of compliance of KPMG Baltics AS' system of quality control with Global Quality & Risk Management (GQ&RM) policies and key legal and regulatory requirements relating to the delivery of professional services; and
- Provide the basis for KPMG Baltics AS to evaluate that the firm and its personnel comply with relevant professional standards and applicable legal and regulatory requirements.

Where deficiencies are identified, we are required to develop appropriate action plans and monitor the status of each action item.

### *Global Compliance Review (GCR) program*

Each KPMG firm is subject to a GCR conducted by KPMG International's GCR team, independent of the member firm, at various intervals based on identified risk criteria.

The GCR team performing the reviews is independent of the firm and is objective, and knowledgeable of GQ&RM policies. GCRs assess compliance with selected KPMG International policies and procedures and share best practices among member firms. The GCR provides an independent assessment of:

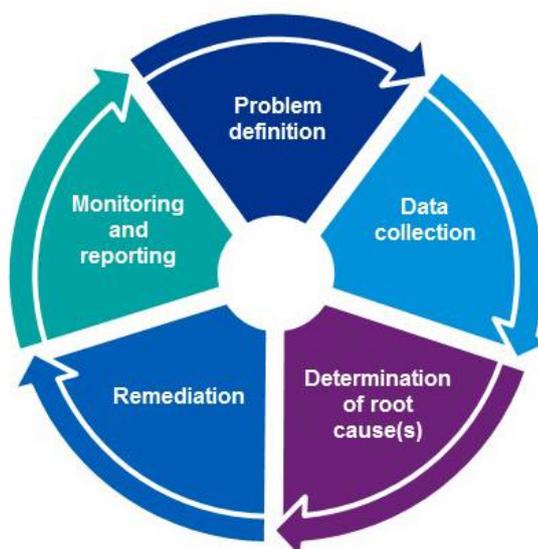

- a firm's commitment to quality and risk management (tone at the top) and the extent to which the overall structure, governance and financing support and reinforce this commitment;
- a firm's compliance with KPMG policies and procedures; and
- the robustness with which the member firm performs its own compliance program (RCP).

KPMG Baltics AS develops action plans to respond to all GCR findings that indicate improvement is required and agree these with the GCR team. Our progress on action plans is monitored by the GCR Central Team. Results are reported to the GQ&RM Steering Group and, where necessary, to appropriate KPMG International and regional leadership.

### *Root Cause Analysis (RCA)*

KPMG Baltics AS performs root cause analysis to identify and address audit quality issues in order to prevent them from recurring and help identify good practices as part of continuous improvement.

The Global RCA 5 step principles are as follows:

It is the responsibility of all KPMG firms to perform RCA and thereby identify and subsequently develop appropriate remediation plans for the audit quality issues identified.

The Head of Audit at KPMG Baltics AS is responsible for the development and implementation of action plans as a result of RCA including identification of solution owners. Our Risk Management Partner monitors their implementation.

### *Recommendations for improvements*

At a global level, through the Global Audit Quality Council and the GQ&RM Steering Group, KPMG International reviews the results of the quality monitoring programs, reviews firm root causes and planned remedial actions, and develops additional global remediation actions as required.

Global remediation actions developed by KPMG International are aimed at changing culture and behaviour across the global organization and at driving consistent engagement team performance within KPMG firms. The remediation actions have been implemented through the development of global training, tools and guidance to drive consistency, ensure the fundamentals are right and that best practice is shared across the global organization.

**KPMG Baltics AS**  
Transparency Report 2020  
January 2021

#### 4.8.2 External feedback and dialogue

##### *Regulators*

The Ministry of Finance as a competent authority according to the Law on Audit Services carries out independent inspections itself and together with the Latvian Association of Certified Auditors.

The external inspections did not identify any issues that have a material impact on the conduct of our statutory audit business.

At an international level, KPMG International has regular two-way communication with the International Forum of Independent Audit Regulators (IFIAR) to discuss audit quality findings and actions taken to address such issues at a network level.

##### *Client feedback*

We proactively seek feedback from clients through in-person conversations and third party surveys to monitor their satisfaction with services delivered. We endeavour to take this feedback and make dynamic changes at both the engagement level and firm level to meet clients' needs.

We have effective procedures in place for handling complaints received from clients relating to the quality of our work. In most other cases, the Senior Partner of KPMG Baltics AS is responsible for handling complaints and concerns.

## 5 Financial information

Revenues of KPMG Baltics AS in the financial year ended 30 September 2020. The table below presents audited revenues for the above reporting period:

EUR'000	30-Sep-2020
Statutory audit of public interest entities and entities belonging to a group of undertakings whose parent undertaking is a PIE	764
Statutory audit of other entities	3,492
Permitted non-audit service to entities audited by KPMG Baltics AS	648
Non-audit services to other entities	3,620
<b>Total</b>	<b>8,524</b>

## 6 Partner and Certified Auditor remuneration

### *Partner remuneration*

Partners are remunerated out of the distributable earnings of the firm and are personally responsible for funding pensions and most other benefits. The Senior Partner monitors the allocation of earnings between partners of KPMG Baltics AS to ensure that a consistent approach is adopted and that remuneration is determined by objectives set for each partner on a number of matters relevant to their role in the group. These include quality of work, performance in client service, growth in revenue and profitability, leadership and living the values of the firm. Audit partner remuneration setting takes no account of the level of non-audit services provided to the partner's audit clients. The Senior Partner reports to the Chairman of the KPMG AB in all respects and in respect of all remuneration allocations to partners of KPMG Baltics AS.

### *Certified auditor remuneration*

Certified auditors who are not partners are remunerated on a salary basis. The salary consists of a fixed amount defined on an annual basis and benefits that are paid upon meeting certain objectives. These include financial results of the audit department, performance in client service, quality of work, leadership and living the values of the firm. The remuneration of certified auditors takes no account of the level of non-audit services provided to audit clients.

## 7 Network arrangements

### 7.1 Legal Structure

#### *Legal structure for the Financial Year ending 30 September 2020*

KPMG Baltics AS is affiliated with KPMG International Cooperative (“**KPMG International**”). KPMG International is a Swiss cooperative which is a legal entity formed under Swiss law. Prior to 1 October 2020 it was the coordinating entity for the network and the entity with which all the member firms of the KPMG organization were required to be affiliated with. Further details about KPMG International and its business activities, including our relationship with it for the financial year ending 30 September 2020, are available in the ‘Governance and leadership’ section of the 2019 report.

KPMG is the registered trademark of KPMG International and is the name by which the member firms are commonly known. The rights of member firms to use the KPMG name and marks are contained within agreements with KPMG International.

Pursuant to their membership agreements with KPMG International, member firms are required to comply with KPMG International’s policies, including quality standards governing how they operate and how they provide services to clients to compete effectively. This includes being professionally and financially stable, having an ownership, governance and management structure that ensures continuity and stability and long term success and being able to comply with policies issued by KPMG International, adopt global strategies, share resources (incoming and outgoing), service multi-national clients, manage risk, and deploy global methodologies and tools.

KPMG International is an entity that is legally separate from each member firm. KPMG International and the member firms are not a global partnership, joint venture, or in a principal or agent relationship or partnership with each other. No member firm has any authority to obligate or bind KPMG International or any other member firm vis-à-vis third parties, nor does KPMG International have any such authority to obligate or bind any member firm.

The name of each audit firm that is a member of the organization and the EU/EEA countries in which each firm is qualified as a statutory auditor or has its registered office, central administration or principal place of business are available in [Section 12](#).

#### *Legal structure from 1 October 2020*

On 1 October 2020, KPMG Baltics AS and all other KPMG firms entered into new membership and associated documents, the key impact of which is that all KPMG member firms in the KPMG global organization became members in, or have other legal connections to, KPMG International Limited, an English private company limited by guarantee. From 1 October 2020, KPMG International Limited acts as the coordinating entity for the overall benefit of the KPMG member firms. It does not provide professional services to clients. Professional services to clients are exclusively provided by member firms.

Further detail on the revised legal and governance arrangements for the KPMG global organization from 1 October 2020 can be found in section 'Governance and leadership' of the [2020 KPMG International Transparency Report](#).

KPMG International Limited and the KPMG member firms are not a global partnership, single firm, multinational corporation, joint venture, or in a principal or agent relationship or partnership with each other. No member firm has any authority to obligate or bind KPMG International Limited, any of its related entities or any other member firm vis-à-vis third parties, nor does KPMG International Limited or any of its related entities have any such authority to obligate or bind any member firm.

*Total turnover achieved by EU/EEA audit firms resulting from the statutory audit of annual and consolidated financial statements<sup>3</sup>*

Aggregated revenues generated by KPMG audit firms, from EU and EEA Member States resulting from the statutory audit of annual and consolidated financial statements was EUR 2.8 billion during the year ending 30 September 2020. The EU/EEA aggregated statutory audit revenue figures are presented to the best extent currently calculable and translated at the average exchange rate prevailing in the 12 months ended 30 September 2020.

## **7.2 Responsibilities and obligations of member firms**

Under agreements with KPMG International, member firms are required to comply with KPMG International's policies and regulations including quality standards governing how they operate and how they provide services to clients to compete effectively. This includes having a firm structure that ensures continuity and stability and being able to adopt global strategies, share resources (incoming and outgoing), service multi-national clients, manage risk, and deploy global methodologies and tools.

Each KPMG firm takes responsibility for its management and the quality of its work. Member firms commit to a common set of KPMG Values (as set out in the Appendices to this document).

KPMG International's activities are funded by amounts paid by member firms. The basis for calculating such amounts is approved by the Global Board and consistently applied to the firms. A firm's status as a KPMG member firm and its participation in the KPMG global organization may be terminated if, among other things, it has not complied with the policies set by KPMG International or any of its other obligations owed to KPMG International.

---

<sup>3</sup> The financial information set forth represents combined information of the separate KPMG member firms from EU and EEA Member States that perform professional services for clients. The information is combined here solely for presentation purposes. KPMG International performs no services for clients nor, concomitantly, generates any client revenue.

## 7.3 Professional Indemnity Insurance

Insurance cover is maintained in respect of professional negligence claims. The cover provides a territorial coverage on a worldwide basis and is principally written through a captive insurer that is available to all KPMG member firms.

## 7.4 Governance structure

The key governance and management bodies of KPMG International are the Global Council, the Global Board, and the Global Management Team.

### *Global Council*

The Global Council focuses on high-level governance tasks and provides a forum for open discussion and communication among member firms<sup>4</sup>.

Among other things, the Global Council elects the Global Chairman and also approves the appointment of Global Board members. It includes representation from 61 KPMG firms that are “members” of KPMG International as a matter of Swiss law. Sublicensee firms<sup>1</sup> are generally indirectly represented by a member.

### *Global Board*

The Global Board is the principal governance and oversight body of KPMG International. The key responsibilities of the Global Board include approving global strategy, protecting and enhancing the KPMG brand and reputation, overseeing the Global Management Team, and approving policies with which KPMG firms are required to comply..

The Global Board includes the Global Chairman, Chairman of each of the three regions (the Americas; Asia Pacific (ASPAC); and Europe, the Middle East, and Africa (EMA)) and a number of senior partners of member firms.

It is led by the Global Chairman, and also includes the Chairman of each of the regions and a number of other senior partners. The list of current Global Board members is set out in [the KPMG Global Review](#) and at <https://home.kpmg/xx/en/home/about/who-we-are/our-leadership.html>.

One of the other Global Board members is elected as the lead director by those Global Board members who are not also members of the Executive Committee of the Global Board (“non-executive” members). A key role of the lead director is to act as liaison between the Global Chairman and the “non-executive” Global Board members.

### *Global Management Team*

The Global Board has delegated certain responsibilities to the Global Management Team. These responsibilities include developing the global strategy by working together with the Executive Committee, and jointly recommending the global strategy to the

---

<sup>4</sup> Unless otherwise stated, the words ‘member firm’ or ‘KPMG member firm’ when used in this Transparency Report include the following:

- Those entities that are members of KPMG International as a matter of Swiss law because KPMG International is a Swiss cooperative (i.e. similar to shareholders, albeit KPMG International has no share capital and, therefore, only has members not shareholders).
- Those entities (‘sublicensees’) that are not members of KPMG International as a matter of Swiss law but have still entered into legal agreements with KPMG International and also an entity that is a ‘member’.

Global Board for its approval. The Global Management Team also supports the member firms in their execution of the global strategy and is responsible for holding them accountable against their commitments.

It is led by the Global Chairman and includes the Global Chief Operating Officer, Global Chief Administrative Officer, global function and infrastructure heads, the Global Head of Quality, Risk and Regulatory and the General Counsel.

The list of current Global Management Team members is available in the [KPMG Global Review](#).

### *Global Steering Groups*

There is a Global Steering Group for each key function and infrastructure area, chaired by relevant member of the Global Management Team and, together they assist the Global Management Team in discharging its responsibilities. In particular the Global Audit Steering Group and Global Quality & Risk Management Steering Group work closely with regional and member firm leadership to:

- Establish, and ensure communication of, communicate appropriate audit and quality/risk management policies;
- Establish and support effective and efficient risk processes to promote audit quality; and
- promote and support strategy implementation in member firms' audit functions, including standards of audit quality; and
- assess and monitor audit quality issues, including those arising from quality performance and regulatory reviews, and focus on best practices that reduce audit quality findings.

The roles of the Global Audit Steering Group and the Global Quality & Risk Management Steering Group are detailed in section 'Governance and leadership' of the [2020 KPMG International Transparency Report](#).

Each firm is part of one of three regions (the Americas, ASPAC, and EMA). Each region has a Regional Board comprising a regional chairman, regional chief operating officer, representation from any sub-regions, and other members as appropriate. Each Regional Board focuses specifically on the needs of member firms within their region and assists in the implementation of KPMG International's policies and processes within the region.

Further details about KPMG International including the governance arrangements for the year ending 30 September 2020, can be found in section 'Governance and leadership' of the [2020 KPMG International Transparency Report](#).

## **7.5 Area Quality & Risk Management Leaders**

The Global Vice Chair — Quality, Risk and Regulatory appoints Area Quality & Risk Management Leaders (ARL) who:

- serve a regular and ongoing monitoring and consultation function to assess the effectiveness of a member firm's efforts and processes to identify, manage and report significant risks that have the potential to damage the KPMG brand. Significant

**KPMG Baltics AS**

Transparency Report 2020

January 2021

activities of the ARL, including member firm issues identified and related member firm response/ remediation, are reported to GQ&RM leadership.

The objectives of the ARL role are to:

- assist GQ&RM leadership in the monitoring of member firms' quality and risk activities;
- work with GQ&RM leadership and the International Office of General Counsel (IOGC) when significant brand and legal risk issues occur to assist in ensuring that matters are properly handled; and
- assist in monitoring the effectiveness of firm remediation of significant issues, including identification of the root cause(s) of serious quality incidents.

## **8 Statement by the Board of KPMG Baltics AS on the effectiveness of quality controls and independence**

The measures and procedures that serve as the basis for the system of quality control for KPMG Baltics AS outlined in this report aim to provide a reasonable degree of assurance that the statutory audits carried out by our firm comply with the applicable laws and regulations. Because of its inherent limitations, the system of quality controls is not intended to provide absolute assurance that non-compliance with relevant laws and regulations would be prevented or detected.

The Board of KPMG Baltics AS has considered:

- the design and operation of the quality control systems as described in this report;
- the findings from the various compliance programs operated by our firm (including the KPMG International Review Programs as described in [Section 4.8.1](#) and our local compliance monitoring programs); and
- findings from regulatory inspections and subsequent follow up and/or remedial actions.

Taking all of this evidence together, the Board of KPMG Baltics AS confirms with a reasonable level of assurance that the systems of quality control within our firm have operated effectively in the year to 30 September 2020.

Further, the Board of KPMG Baltics AS confirms that an internal review of independence compliance within our firm has been conducted in the year to 30 September 2020.

## 11 KPMG Values

Our Values represent what we believe in, and what's important to us as an organization. They guide our behaviours day-to-day, informing how we act, the decisions we make, and how we work with each other, our clients, companies that we audit, and all our stakeholders.:

Our Values are:

Integrity: We do what is right.

Excellence: We never stop learning and improving.

Courage: We think and act boldly.

Together: We respect each other and draw strength from our differences.

For Better: We do what matters.

Our Values express our firm's long-standing core beliefs, and in 2020 the language was updated to make them bolder, simpler, and more memorable to help each of us bring them to life every day.
