

Transport Services and Audit

The specialised transport services team seeks to bridge the gap between the shipping, yachting and aviation industries and the finance world through its extensive knowledge of the day-to-day realities faced by actors in this space. This team draws knowledge from different experts at KPMG Malta that provide a broad range of audit, assurance, tax and advisory services targeted to shipping and aviation businesses.

The Audit Team

An experienced and trusted audit team analyses your business and its needs and provides you with deep insights on your business from a different perspective.

KPMG produces high quality, independent audits that are essential to maintain transparency, an increasingly important quality in today's changing global economy.

Leasing is often core to transport operations whether land, sea or air. Our professional audit team will follow up and support management on the implementation of IFRS 16, Leases. Separate staff may also advise management in the process to ensure that any required changes are integrated smoothly with the rest of your operations. Remaining compliant with legal updates provides added value to your shipping or aviation business and maintains stakeholder confidence as well as regulatory compliance.

With KPMG's powerful and innovative audit tools, audit services are provided efficiently and effectively, ensuring that the expectations of shipping and aviation clients are met.

How can KPMG help?

- Analysis of data provided by the shipping or aviation client
- An experienced audit team engages in deep and insightful risk assessment
- Powerful tools ensure that the audit is comprehensive, ensuring the shipping or aviation client's peace of mind regarding transparency and compliance
- Support on implementation of IFRS 16, *Leases*.
