Real Estate Innovations Overview

KPMG Real Estate Advisory

5th Annual Edition - July 2020
Introduction

We are pleased to introduce the fifth annual edition of the Real Estate Innovations Overview (REIO). Throughout the years the attention and interest for innovation in the Real Estate and Construction sector has further grown. KPMG recognizes this and wants to facilitate the emergence and development of these innovations that will shape the Real Estate and Construction market of the future. Due to the success of our first global edition last year we have further extended the list of companies and added an interactive online dashboard! Please refer to the next page for more information.

Over the passed months we have crossed borders and connected to our colleagues all over the world to extend this global edition. We have discovered different trends in innovations that serve different needs, making it even more interesting. With a record of nearly 600 innovations, this overview underlines the bright future of Real Estate. Moreover, through innovation a broader group of stakeholders could be served more adequately. All in all, it underlines the fact that innovation is essential, and the need for the industry to embrace innovation in their long term strategy is inevitable.

The aim of this document is to provide its readers insight into the current innovative developments in the Real Estate and Construction industry; what is out there globally. In the first section of this overview we elaborate on the key success factors for leveraging innovation and how KPMG could support Real Estate and Construction companies and society in doing so. Subsequently, we describe innovations with key company information, and additionally this year’s edition provides characteristics such as the positioning in the Real Estate value chain and the respective field of expertise of a company, to provide even more content. In the final section, we provide insights into several PropTech Ecosystems around the globe that support innovations in the industry. These PropTech Ecosystems are valuable to the market and provide innovations with a platform to thrive, connect and succeed.

Please note that this overview can never be complete due to the nature of its existence, as new innovations will continue to change the sector every day. In our attempt to keep up with market developments and trends, please feel encouraged to reach out and inform us about new innovations or additional information about the listed companies. Please find our contact details on the right bottom corner.

We hope this overview will be a valuable read for you,

Sander Grünewald

KPMG Netherlands – Global Lead of Real Estate Consulting

Disclaimer: KPMG has no business interests in the innovations and start-ups that are included in this document and is not liable for the actions of these companies. KPMG did not assess their (financial) continuity, quality and credibility. The fact that they are included in this document does not imply recommendation by KPMG. This document is based on publicly available information only and as a result not exhaustive. All companies included in this publication have been requested for permission (opt-out).
KPMG would like to provide relevant insights into the Real Estate & Construction sector. Our scope and vision is to shed light on a variety of innovations and inform all stakeholders in the market about relevant developments that (may) drive the future of Real Estate.

Besides this annual publication presenting hundreds of pages, this year, we have developed the first interactive Real Estate & Construction innovation dashboard, which is innovative in itself!

This dashboard provides accessible insights in key statistics of all innovations listed in the fifth edition of the Real Estate Innovations Overview. Hence, you’ll be able to create personalized insights on a selection of individually adjustable parameters.

We encourage you to have a look and try it out yourself!

Enjoy!
Digital transformation of industries is more present than ever in this year’s overview. We recognize that especially developments in the digitizing field are becoming the cornerstone of many innovations globally. We foresee that an acceleration of adoption is facilitated due to unforeseen changes, including the global pandemic. Moreover, it has become evident that innovation differentiates per region across the globe and that Real Estate and Construction innovations serve the needs of the specific markets and societies. Hence, we see a trend in which innovations are becoming an integrated part of the sector globally while having its unique characteristics locally!

Last year’s edition has been the starting point for a global list of innovations and this year the scope has been broadened even further including companies from 42 Countries/Special Administrative Region (SAR). The amount of innovations listed has more than doubled in comparison to last year’s edition and its diversity is visualized in the graph on the right. Despite a high presence of European countries this year’s edition gives a good glimpse of what’s out there in other regions.

For this extended capture, additional characteristics have been added to each company consisting of a variety of 44 Fields of Expertise (FoE). These aim for describing a company’s core competence. Next to the FoE this year’s edition identifies a company’s position within the Real Estate Value Chain consisting of 6 phases: Sourcing, Design & Planning, Construction, Property and Facility Management, Transaction and Leasing and Investing and Financing. Besides our Wheel of Logos, a visualization of the category distribution, we have designed a Value Chain Cascade that shows all companies listed in their respective value chain position, please refer to page 192.

While having further extended the list of countries / SARs in this year’s edition the local differences on innovation become more apparent. This may be attributed to different markets having different needs and the respective maturity of Real Estate innovations in regional markets. Fields of Expertise may illustrate these differences. FoE may provide us information and insights in the local market focus. For example ‘energy efficiency’ (26 companies) tops in European countries, ‘co-working spaces’ (22 companies) seem to be accelerating in Asian countries / SARs, while ‘Mobility’ (19 companies) is spread out globally. By leveraging KPMG’s global network of local branches, our global colleagues have been able to provide us with insights in local trends, which are included in the REIO 2020. Overall, we may conclude that globalization is driven locally!
Executive Summary (2/2)

To classify the innovations, we have used nine categories:

- **Digitizing processes**: consists of innovations that digitize traditional processes. This enables the processes to analyse more data, be accessible online and real-time while making them more efficient and user-friendly.

- **Flexible workspaces**: entails innovations that create the option for Real Estate to be flexible in time, location and environment. Workplaces can be allocated 'anywhere' and 'anytime'.

- **Innovations in healthy workplace and living**: focus on the internal working environments, ranging from air purity to office treadmills for walking meetings, to optimize employee satisfaction, health or productivity.

- **Innovative constructions**: contribute to new ways of constructing Real Estate. This may include architectural benefits or enhancements in construction materials and processes (e.g. 3D printing and wooden skyscrapers).

- **Internet of Things (IoT)**: applies to innovations that connect multiple devices, systems and/or buildings with the aim of making Real Estate more efficient, sustainable or user-friendly.

- **New ways of funding**: are innovations that aim for making funding less complicated, more accessible and/or increase liquidity for both the demand and supply side.

- **Platforms to connect**: allow users to connect and interact with stakeholders (e.g. buyers/sellers, owners/tenants, or construction parties and maintenance). These could essentially result in optimized communication, collaborations, knowledge-sharing and/or synergies.

- **Sustainable innovations**: focus on aspects such as energy-savings, water-efficiency and circular economy in order to sustain our natural resources. These can be needed due to regulatory changes, sustainability agenda or cost reductions. Please also have a look at page 15.

- **Virtual reality and 3D mapping**: replicates an environment using computer and/or drone technology or allows users to create an alternative reality.

PropTech is an actual topic and KPMG is pleased to provide an insight into the dynamic scene of Real Estate and Construction innovations that are transforming the sector’s landscape, and touching diverse businesses and markets.

Please find the set up of this booklet on page 21 to discover the elements captured and how to read through this publication.

We hope that you will enjoy the insights that this overview provides.
# Table of Contents (1/4)

## 1. Innovation Trends
- The development of innovation in Real Estate
- Innovation in the Real Estate sector
- Sustainable, Smart & Green buildings

8. New ways of funding

9. Platforms to connect
Innovation Trends

1

The Real Estate sector is mostly characterized as conservative, but even here innovation plays its part by gradually changing existing business models. However, due to the recent interference of COVID-19, innovation may have gained even more momentum.
The development of innovation in Real Estate

Innovation wave 1.0
- Computer-Aided Design
- In-house enterprise software

Innovation wave 2.0
- Online residential marketplace
- Building Information Modeling (early stage)

Innovation wave 3.0
- Building Information Modeling & Geographic information system become essential
- Social network for Real Estate marketing
- Multi platform
- Modular constructions

Innovation wave 4.0
- Artificial Intelligence
- 3D-printing
- Shared economy
- Temporary constructions
- Blockchain
- …
Innovation in the Real Estate sector

Key statistics

$2,600 million
Of investment capital was poured into PropTech companies in 2019.1

During the period 2014-2019 funding in PropTech has grown by 766% and this growth is expected to continue.1

Investment in digital, IT and PropTech collaboration is driven by a need for:2

- Improved efficiencies
- Cost-reduction
- Enhanced decision-making

Innovation vision 2020

1. Investment in innovation culture may become crucial for required change
2. Strategies for customer centricity will become the norm
3. Artificial Intelligence may become more important in Real Estate innovations
4. Real Estate innovations may become less geographically centralized
5. Sustainability related technology solutions may grow
6. Non-conventional (sustainable) construction will gain importance
7. COVID-19 may (forcibly) boost innovation and change

COVID-19

At the moment of compiling this booklet investments in innovations within the Real Estate and Construction sector have not been negatively influenced by COVID-19 so far.

Does this mean no consequences?

Similar to financial consequences, innovative effects are hard to predict. However, great innovations have arisen in times of need.

1. More investments in digitizing processes and platforms to connect as doing things digitally has become the ‘new normal’
2. As a safe and healthy (work)place will become more important, innovations in healthy, smart and sustainable buildings will increase

2 KPMG. (2019). Global PropTech Survey – Is your digital future in the right hands?

© 2020 KPMG Advisory N.V., all rights reserved.
Sustainable, Smart & Green buildings

**Sustainability**

*Remember this?*

This is ‘Il Bosco Verticale’ (The Vertical Forest), a 112 meter tall green apartment building in Milan built in 2014 with over 750 trees, 5000 bushes and 11,000 plants. A literal example of a ‘Green Building’.

**Green buildings – Benefits**

**Sustainable innovations in Real Estate**

Although the Real Estate sector has seen investments in sustainable materials increase during the past few years, a real shift to green buildings is still on its way. Investing in sustainability however, does have significant benefits, please find a selection below:

**Sustainable materials**

The use of sustainable materials results in a premium price compared to ‘normally’ constructed properties.1

**Sustainability awareness**

Environmentally certified buildings are absorbed by the market in less than half the time compared to those which are not.2

**Circular buildings**

5% of total EU CO₂ comes from construction of new buildings, this can be significantly reduced by re-using materials.3

**COVID-19**

The need for sustainability in the Real Estate sector has long been evident. However, incentives were missing and/or it was no prerequisite for key stakeholders.

COVID-19 might change the cyclical demand for healthy and safe Real Estate and drive permanent investment.

Consumers are now aware of the environmental conditions (and the larger ESG spectrum) and demanding evidence of hygiene and safety of the places they live, visit and work.

By investing in a.o. ventilation systems, hygiene, (new) circular materials, communication, data collection and analytics. Thus, changing entire business models.

After years of talking about sustainability, external forces may now accelerate the process to act sustainable.

---

KPMG understands the importance of innovation. KPMG is actively involved in supporting their Real Estate clients in all aspects of the innovation process. To stay on top of trends in the Real Estate and construction industry, KPMG is a founding member of Global PropTech.
KPMG’s view of the developments in the industry

KPMG understands the industry. We have identified a set of key industry trends, for which we believe innovation may be critical in order to adapt and become future proof. On the next page, we show how we help our clients to stay relevant.

- Digitization and innovation
- Markets move towards top of cycle
- Traditional business models are challenged
- Agile culture in industry
- Sustainability remains focus area
- Smart buildings & cyber security
- Data analytics initiatives
- Speed of changes require process agility and robotics
Innovation Maturity Assessment

*Why do you innovate and how do you do it? With whom do you innovate and how do you use the results of innovation?*

Those questions and their answers are central to the innovation capability model, which covers all the aspects of innovation necessary to enable successful and efficient innovation. This empirically tested model forms the basis of the innovation maturity assessment, focusing on the six enablers of innovation:

❖ Vision & Strategy
❖ Value Network
❖ Process & Governance
❖ Results & Feedback
❖ Culture
❖ Resources

These give you insight into your organization’s innovation strengths and opportunities for further development. This will assist you in structuring, focusing and/or redefining your innovation strategy, process, ecosystem and culture.

The innovation maturity assessment focuses on the six enablers of innovation: vision & strategy, value network, process & governance, results & feedback, culture, and resources. You and your employees are actively encouraged to share their perspective and think about the different innovation aspects, their maturity and priority. This rich feedback can be collected online or in a collaborative workshop and is presented to you in an organized and structured way, serving as valuable input for innovation decision-making and determining next steps. This allows you to structure the dialogue about innovation and focus on optimizing the key enablers quickly and iteratively.
Interventions to enhance your innovation capability

Organize Innovation

- Based on the KPMG Innovation Maturity Assessment results, take the appropriate actions to enhance innovation within your organization
- Anticipate on the latest trends and reinvigorate your innovation strategy
- Create a transparent innovation portfolio and focus ideation efforts on underexposed themes
- Design a tailored innovation funnel with easy to follow steps for your innovation project managers and/or innovation enthusiasts
- Share results of innovation experiments even if considered a ‘failure’

Accelerate Innovation

- Stimulate new and creative ideas or proven solutions from within your organization or within your partner network with the KPMG Innovation Factory platform
- Enhance your employee engagement and improve your everyday operations by challenging the entire organization to come up with (and enrich) creative ideas
- Host an external innovation challenge to collect proven solutions from startups and alike and adopt these collaboratively with your in-house experts
- Connect to your entire supply chain by jointly realizing specific innovations to collectively benefit from improvements on safety, sustainability and/or efficiency

Execute Innovation

- Follow a tailored program of proven innovation methodologies to bring new ideas to reality with individual coaching by our innovation experts
- Host collaborative (online) sessions to advance multiple ideas simultaneously and grow innovation experience and awareness more effectively
- Apply Design Thinking, Lean Startup and Agile/Scrum best practices to efficiently advance innovations continuously
- Consider the full scale implementation within the industry from the start, but work in short sprints testing small iterations

Our environmental-friendly reads

Global PropTech Survey – Is your digital future in the right hands?
An annual review of the Real Estate industry’s journey into the digital age. The Real Estate industry is still making progress with its digital transformation. Challenges remain, however, with full-scale adoption of digital technology still some way off.

Global Construction Survey – Future Ready-Index
Leaders and followers in the engineering & construction industry. You will find examples of how leading organizations are investing effectively in technology, people and project culture to become more future-ready.

Real Estate technology trends
KPMG surveyed more than 60 Real Estate funds, property owners and operators, public REITs, and developers to gauge their use of financial-accounting software and other technology.
Reader’s guide for this overview

Since our overview is an elaborate and extensive guide of Real Estate Innovations worldwide, the below overviews provide you with some information on the structure of the book overall, and some background on key statistics that are new in this year’s edition.

Structure of overview
1. First the overview is structured along the well-known categories (our chapters);
2. Within these chapters, the sequence of innovations is per region from West to East. I.e. (i) Americas; (ii) EMEA; and (iii) Asia Pacific;
3. Thereafter, alphabetical order is followed for (i) Founding Country / SAR; and (ii) Name of Innovation.

Key statistics

Field of Expertise (FoE) – aims to describe a company’s core competency in a single phrase and gives more in-depth insights into the market focus.

Value Chain Segment (VCS) – aims to describe the segment in the Real Estate value chain that an innovation focuses and hence, gives insight into the strategic activities that the innovation and what market needs they act upon.

Sourcing: materials, products and technology
Design & Planning
Construction
Property and facilities management
Transaction and leasing
Investing and financing

In our everyday life, more and more tasks get digitized. Most of us embrace the opportunity to manage certain tasks digitally by having all relevant materials at hand within seconds. While the underlying processes are getting increasingly more efficient and user friendly, the digitization of processes also allows for an increasing amount of data collection, storage and analysis. Consequently, this results in higher quality, costs savings and improved customer satisfaction, applicable in all parts of the Real Estate industry.
RIO Analytics uses data generated by equipment sensors to predict and prevent failures, reduce equipment downtime and increase operational efficiency through Artificial Intelligence. RIO analyses sensor data in real time using Machine Learning to improve the insights and predictions it generates.

Chapps offers an app that can be used for locational descriptions and/or rental inspections on a tablet. Due to the optimization of workflows and the simple user-interface, productivity gains may be reached. Currently, there are versions available for Belgium, The Netherlands and France.

Nodalview is the European mobile-based photography solution that leverages smartphone technology, AI and cloud computing to produce instantly available high-quality visuals for real estate properties. Nodalview’s all-in-one digital solution enables real estate agencies to easily create perfectly exposed HDR photos, 360° immersive virtual tours and full HD videos.

Smovin is a company that aims to ease property portfolio management. The company delivers a property management tool on which documents can be managed, rent payments can be followed up and expiring contracts can be managed.

Rockestate is a data science start-up founded in 2017 in Brussels, Belgium. The company builds products that help mortgage lenders and property insurers improve their risk management and the customer journey of their products. The company’s starting point for this is open geo-data, which is used to calculate 3D models and build features for each and every house in Belgium.
Digitizing Processes

SweepBright empowers real estate agencies to deliver better customer experiences and become significantly more efficient. SweepBright aims to help save time and costs by reducing manual data input and making the entire sales process manageable on the go. Its product was designed from the onset with mobile usage in mind and integrates with third-party applications. This enables agencies to transform their sales flow into a fully digital journey and to deliver better customer experiences.

Nozol offers customer relationship management software that contains a set of tools that aims to allow users to achieve optimal performance in selling, managing, and marketing real estate assets. Data is gathered from various sources and analyzed through a set of performance dashboards regarding the sales pipeline and KPIs.

Assetti is a company developing and marketing a collaboration tool for property asset managers and investors, allowing them to develop a portfolio strategy, control property financials, and secure rent rolls, all in one application.

Aiforsite offers an all-in-one solution for moving from closed construction projects to a fully transparent industrial process production model. This is achieved by digitizing the construction with the use of cameras and AI, to be able to see progress in real-time remotely.
**Blok**

Enterprises offers a service where homeowners manage viewings themselves, while Blok takes care of the other processes involved in selling a real estate property, such as paperwork, photographs, classifieds, marketing, and managing the tendering process. By automating these processes, Blok’s brokers are able to sell more properties than conventional brokers.

[www.blok.ai](http://www.blok.ai)

---

**CHAOS Architects**

is an urban forecasting company for real estate investors and city developers. The company’s AI platform processes urban data and crowd insights to forecast investment and development opportunities for creating liveable cities.

[www.chaosarchitects.com](http://www.chaosarchitects.com)

---

**Cubicasa**

is a company offering a mobile app for scanning and branding real estate floor plans. The application works by scanning the indoor space by using the mobile device’s camera.

[www.cubi.casa](http://www.cubi.casa)

---

**Cityfier**

offers a digital analysis service for visualizing city development and forecasting the future value of urban districts and properties. The tool combines city master plans, property data and housing market data with urban research and analyses how different urban components can affect the future value of a location.

[www.cityfier.com](http://www.cityfier.com)
**Digitizing Processes**

**Datacubist** designs and develops construction software that addresses the business, process, and technology aspects of using Building Information Modelling (BIM) in real projects. Additionally, the company provides consulting on building information models.

- **Year**: 2009
- **Employees**: 1-4
- **Country**: Finland
- **Sectors**: Design & planning, BIM and Digital Twin

**Delta Cygni Labs** develops a remote video collaboration solution named POINTR. It is powered by augmented reality and a proprietary, secure telecommunication protocol, that enables deployment for mission critical field service applications in energy, machine building, and maritime sectors. The software allows users to point their mobile devices at objects and have a AR overlay identifying what issues to address.

- **Year**: 2013
- **Employees**: 5-10
- **Country**: Finland
- **Sectors**: Property and facilities management, Virtual viewing

**Exquance Software** offers predictive models process automation for commercial real estate assessment and investment portfolio management purposes. The company aims to increase efficiency and bring full transparency to real estate portfolio management and valuation.

- **Year**: 2012
- **Employees**: 11-20
- **Country**: Finland
- **Sectors**: Investing and financing, Robotics & automation

**Easoft** offers a software application for installation and project management in the construction industry. The application’s features cover sales, customer acquisition, tendering, construction sites/projects, margin calculations, reporting, and monitoring of working hours.

- **Year**: 2013
- **Employees**: 11-20
- **Country**: Finland
- **Sectors**: Construction, Collaboration software
**Digitizing Processes**

**Gravicon** provides IT software and Building Information Modelling (BIM) services. Their software solutions include project management support in the field of project management, construction, maintenance and usage to optimize repetitive tasks, and trainings while connection all stakeholders.

**Homerunbynet** is a company that offers software for building developers to manage material selection, project portfolios and tenant communications.

**IISY**, short for Infrastructure Information Systems, offers indoor air quality measurement and management as a service for a variety of users. Real estate managers, for example, can manage the indoor air quality of their entire portfolio using IISY’s cloud platform. Other users include investors, residents, and construction firms.

**Hyperin** offers an integrated tool for shopping malls to administrate all tenant and consumer information and communication, as well as reporting, contracts, marketing, and footfall in one place. The software also enables the selling of advertising and promotional space online through the same platform.
IndoorAtlas enables indoor navigation, by employing technology that uses natural anomalies in the geomagnetic field to pinpoint locations indoors. Customers include developers who want to build indoor location-based applications, such as search, wayfinding, and proximity marketing.

www.indooratlas.com

Kodit.io offers a direct purchase model (i.e. iBuyer). The company buys the property from homeowners with instant cash offers based on their proprietary data-based market price, renovates it and resells it on their marketplace, reducing the time and expense homeowners normally allocate to switching homes. They also offer home sellers the opportunity to lease back their old home in order to avoid temporary housing arrangements.

www.kodit.io

Mapple analytics offers urban intelligence software that combines, enhances and analyses multiple streams of location data on the fly, to provide insights on people, infrastructure, and mobility for real estate and cities. The software is based on algorithms for accessibility and mobility modelling, providing users with easy to understand, visual insights to support decision making.

www.mapple.io

Lukoton is a company that offers modern access management solutions that enable housing real estate locks to be opened via a mobile device application.

www.lukoton.com
**Mirasys** is a provider of open platform Video Management Systems (VMS) for IP and analog camera surveillance applications and systems. They develop and supply solutions that help organizations manage and utilize information captured by digital video and CCTV cameras. Mirasys surveillance systems are used for perimeter protection, building management, loss prevention, and enhancement of operational efficiency.

![Mirasys](image)

**Proximi.io** enables software developers to kick start their location-aware application projects and helps them to deliver context-aware content to their customers. The solution combines existing location technologies (e.g., iBeacons, Wi-Fi, IndoorAtlas, cellular, GPS, and custom IoT devices) under one platform, making it possible for users to reach out to clients wherever they are.

![Proximi.io](image)

**Mount Kelvin** manufactures and distributes remotely updateable cloud-based room controls for hotel rooms. The company engineers room controls that enhance the hotel ambience and guest experience, to ensure a better stay from check-in to check-out and everything that happens in between.

![Mount Kelvin](image)

**Platform of Trust** harmonizes incompatible data coming from various sources, enabling it to be merged and utilized. The company also provides, for example, services for digital signing and document storing, and an API engine that automates API documentation.

![Platform of Trust](image)
**Quuppa** manufactures and markets technology for location based services and applications. Its Direction Finding methodology and positioning algorithms enable real-time tracking of Bluetooth Low Energy tags and devices, with high accuracy.

www.quuppa.com

**Rollock** manufactures and distributes remote controlled smart locks (i.e. locks that can be opened with a mobile app or embedded chip). The company aims to make access an experience, bring additional security into homes and make everyday life easier.

www.rollock.fi

**SkenarioLabs** offers automated, AI-based property valuation and technical risk assessments for both residential and commercial real estate. The company serves property owners, energy companies, property developers, financial institutions, and asset and investment managers.

www.skenariolabs.com

**Safetum** offers fire and safety measurements, monitoring, planning, communications, and prevention as a service.

www.safetum.fi

Steerpath offers indoor maps, navigation, and positioning technology to mobile application vendors, across industries and venue types. The company offers several solutions, including 'Smart office', 'Smart university', 'Smart hospital', and occupancy analytics.

VimAI provides a computer vision based indoor positioning system that does not require any infrastructure, this way buildings of any size can be converted to shared Augmented Reality experiences. The solution allows multi-user wide-area AR services like navigation, data visualization and entertainment to be provided in environments like industrial plants, shopping malls, museums, conference centers, hotels and airports.

Habiteo offers a collaborative platform that simultaneously manages sales and marketing activities to build a tailored customer relationship through their 3D solutions and CRM system. Habiteo does so by building a link between 3D visualizations of properties, customer relationships, and sales.

FinalCAD aims to change the way of building. The company offers a construction management app & software. The company helps contractors, architects and owners to perform in synchronicity, build quality projects and manage risk through solutions providing progress reports, defect management, quality controls and analytics.
**Digitizing Processes**

**Happywait** is a platform that allows in a very short period of time to generate a booking contract, to sign it remotely or in the office. The remote signing can be done with a digital signature.

- **Year**: 2015
- **Employees**: 1-4
- **Country**: France
- **Category**: Transactions and leasing
- **Technology**: Transaction administration

[www.happywait.com](http://www.happywait.com)

**Hxperience** is a real estate start-up that has developed SMATI: a platform for (smart) buildings, based on predictive analysis and connected objects in order to make all this data usable. The goal is to optimize the operation of buildings, examples of this are: predicting the occupation of the rooms, adjust the temperature accordingly, and observe unnecessary expenses.

- **Year**: 2014
- **Employees**: 21-50
- **Country**: France
- **Category**: Property and facilities management
- **Technology**: Smart buildings

[www.hxperience.com](http://www.hxperience.com)

**MaSmartHome** creates applications for real estate professionals and retailers to assist them in the creation, sale, deployment, enhancement and maintenance of connected and smart homes.

- **Year**: 2016
- **Employees**: 5-10
- **Country**: France
- **Category**: Property and facilities management
- **Technology**: Smart buildings

[www.masmarthome.com](http://www.masmarthome.com)

**Idealys** offers innovative solutions to meet the challenges of the Smart City: mobility, parking, housing and citizenship.

- **Year**: 2015
- **Employees**: 5-10
- **Country**: France
- **Category**: Property and facilities management
- **Technology**: Smart cities and infrastructure

[www.idealys.fr](http://www.idealys.fr)
Digitizing Processes

21st Real Estate offers an innovative platform that digitizes the investment process of real estate. 21st Real Estate provides a market place that is connected to a database-matching tool, which helps finding properties that match customers’ investing strategy. Next, the user can transfer properties to a Shaping Tool, in which investments can be calculated and analyzed using market data. Lastly, investors can finish the buying process within the platform and optimize existing and new deals.

Korasoft aims at operating real estate with maximum efficiency. Korasoft offers the complete implementation of the relevant processes with SAP 3D Visual Enterprise for the Real Estate Management. This gives their customers product support by supporting the new SAP standard and by integrating it firmly into their established solutions.

Capmo is a cloud-based SaaS solution for the construction industry. It equips construction workers with digital tools automating repetitive and error-prone tasks to construct buildings at an improved pace. Digital construction plans on mobile devices are the base of Capmo to innovate processes such as auto-construction documentation, punch listing or sheet comparisons. Capmo is used across Europe.

Eucon digitalizes the invoice workflow for real estate companies. The solution uses Artificial Intelligence and reads, recognizes and classifies invoices and records them into the respective ERP system ready for account assignment. Historical data from individual objects or service providers is incorporated into the process, enabling the system to learn with every run.
Digitizing Processes

**LEVERTON**'s smart platform has evolved into a system to manage data and documents, while also providing insights into key data. LEVERTON provides global organizations with a 'core' of structured company data and enables them to make better and more efficient decisions. For the real estate industry this includes lease contracts, tenants details and financial details.

[www.leverton.ai](http://www.leverton.ai)

**Molteo** is a digital tool, using cloud software to help construction companies have real-time data, statistics and analyses of the building process. This is helpful to optimize the usage of resources and manage daily working processes faster, while reducing paperwork.

[www.molteo.de](http://www.molteo.de)

**Synapplix** helps to secure your investment strategies by determining the opportunities and risks of your assets. Different participation structures and financing of an inventory of assets, real estate, aviation and renewable energies can be predicted.

[www.synapplix.de](http://www.synapplix.de)

**REOS** provides technology for smart buildings and asset management purposes. The Real Estate Operating System (REOS) supports landlords and asset managers in managing and operating their facilities and rental processes digitally and in real time. The company can help clients fast track to digital leadership by transforming their real estate management into a simplified, affordable and efficient digital process. The software offered is flexible and could be integrated with existing IoT and smart buildings.

[www.reos-software.com](http://www.reos-software.com)
Arminimum crawls and processes property advertisements on the web on an hourly basis, analyses the mass of ads, and recognizes which advertisements advertise the same properties. Arminimum shows the best offer for a given property and shows available information. Moreover, Arminimum provides a supply index showing how the supply changes on daily, weekly, monthly basis, as well as a demand index showing how long it takes to sell a property.

www.arminimum.hu

Lokcheck accelerates the digitalization of construction implementation. The company does this by enabling construction workers to document and communicate progress and blockers in a quick and understandable way.

www.lokcheck.hu

Parkl is a digital platform which integrates parking and e-mobility services in a single system. They install state of the art parking solution, which can be easily integrated with existing parking systems. Using Parkl app, motorists can manage parking and EV charging related processes conveniently and in a cashless way. Parkl also offers a solution for office buildings, which optimizes the management and utilization of their parking capacities.

www.parkl.net

OrthoGraph provides digital twins of buildings for facility and maintenance management. Its mobile technology controls the data quality with strict workflows and live graphic feedback. A fast learning curve, simplicity and the used rugged tools let BIM become part of the everyday operations, workflows and third-party systems.

www.orthograph.com
Digitizing Processes

**Genda** provides a waste reducing solution in the construction process. The construction site is complex and full of wasteful processes, leading to significant overruns in budget and schedule. Genda uses multiple sensors and computer visions to automatically generate real-time data regarding project resources, eliminating waste in the process and improving site safety whilst enhancing site managers certainty about their project status.

**Skyline Robotics**' artificial intelligence platform enables the control and automation of any lift, crane and boom platform previously controlled by people. The first application of this platform was an autonomous window cleaning robot.

**Placense** aims to empower decision-makers to understand people’s offline behaviour in any given location – without the need to install hardware or conduct surveys. Property owners can easily access information on any European location to understand local visitor interests, demographics and routes. Turning millions of smartphone signals into anonymized statistics, any business can analyse offline locations.

**SecondLook** is an international 3D visualizations studio that focuses on digitizing the marketing processes of real estate. The company has developed HOP, a desktop application that allows brokers to sell properties in visualized and centralized way.
The robotic WTG maintenance system of Aerones is a method of delivering various tools to the blade for inspection, cleaning and maintenance of windmills. WTG maintenance using robotic technology to reduce downtime and increase AEP. In addition, this robotic blade care system is similar to drones and ensures safety and efficiency.

Estate Intel is a real estate and construction information portal aiming to aid industry professionals in finding leads for their product sales, secure new tenants for their properties and understand trends, rents or sale prices to help them make the best decisions. EstateIntel seeks to have a strong profile in data analytics and organizational performance monitoring.

Symvio works with building owners and operators to increase efficiency of technical building operations. Symvio develops machine learning based solutions for automated anomaly detection and diagnostics in technical building equipment such as HVAC systems to support facility managers in their tasks. Symvio increases quality assurance of operations yielding faster response times and utility cost reductions.

Tokeny Solutions provides investment banks, funds, mid-cap companies and distributors with the technology required for firms to digitize their processes, so they can enforce global compliance obligations, enable automation and drive efficiency.
Mapidea is an Enterprise Location Analytics solution that integrates internal and external datasets using geography, allowing business users to take advantage of location data without GIS expertise. The company’s aim is to spread the usage of Location Analytics in big companies. Mapidea supports better business decisions and uncovers hidden spatial patterns that would go unnoticed on spreadsheets.

Fincase has developed a service that allows users to estimate the value of a residential, commercial property and land in a few seconds. This instantaneous assessment of the value of the underlying real estate assets allows decision-makers - potential investors or other users - to gain an initial cost-efficient and quick insight into the value of a property, to enable further decision-making.

Ksuto aims to be an all-in-one system of managing technical maintenance of movable and immovable assets, thus facilitating Facility & Asset Management. The system thus allows the control and oversight on technical personnel, process streamlining and ultimately aims to allow the reduction of maintenance and repair costs of real estate assets. Client groups include asset management companies, owners of commercial real estate (shopping/business centres, warehouses, manufacturing organizations), universities, healthcare organizations and other public institutions.

FTS is an IT solution for real estate management companies, developers and investors. This solution is used for real estate income/cost planning and accounting purposes; for managing relationships and effecting settlements with customers, lessees and contractors; keeping record of contracts and other documents related to real estate; planning and documenting technical operation of real estate properties; analysing big data and retrieving information for management decision-making purposes.
**Digitizing Processes**

**Lement Pro** is a platform designer for object-oriented management of a company and real estate properties. Each element of the company’s business – instructions, documents, equipment, premises, structures, etc. – is described and assigned the status of the platform item that may be created, modified, archived, or linked to other items and elements of the BIM model in accordance with business processes setups.

*www.lement.pro*

**SKYEER** platform is a cloud platform used to control and manage construction sites by the usage of drones. The solution provides for remote, direct and objective control over the process, schedules and budgets of construction projects through the use of drones to monitor facilities and 2D/3D alignment of aerial photography results with project data; and for automated determination of the amount of work completed and fact-plan gaps, and forecasting of project timelines.

*www.skyeermap.com*

**Mobile Solutions for Construction** has developed a service offering of a Cloud software for building quality management throughout the construction phase. This application allows users to instantly upload photo’s of focus points during the construction of properties and interact with internal and external stakeholders on the development.

*www.mrspro.ru*

**NPO Analitica** aims to deliver data insights on visitor behaviour based on the signals of mobile phones when present in real estate assets (shopping & leisure centres, for instance). These audiences can be further targeted by telephone operators for advertising purposes, upon which the efficiency is measured.

*www.npoanalitika.ru*
Propertyfox offers proprietary software and systems that help to coordinate the tasks of marketing and selling property as quickly as possible while saving sellers on transaction fees. A special feature of the company’s business model is that all the information is actively shared with the seller and Propertyfox handles all the logistics, scheduling and security vetting.

www.propertyfox.co

ChromaWay is a relational blockchain company. ChromaWay provides open-source blockchain technology including Postchain, a technology rooted in relational databases that utilizes blockchain protocols to synchronize data across multiple organizations and a smart contract/secure workflow application. The company offers solutions for land administration and real estate and launched its public network offering, Chromia, which enables the development of scalable dapps across multiple industries including the tokenization of real estate.

www.chromaway.com

Archilyse makes architecture and real estate quality digitally and objectively measurable, comparable and understandable. Based on data analytics the company provides qualitative KPIs to empower decisions and optimize processes along the entire real estate value chain.

www.archilyse.com

Datscha is a company that offers several web-based solutions offering access to data of registered commercial properties, as well as analytics. The company buys and collects data that is property-related from information providers. The company then structures, matches and aggregates the data, to make it available in their interface afterwards. An additional feature is that clients can upload their own data in Datscha, enabling new analyses, insights, and business opportunities.

**Digitizing Processes**

**FundStar** offers insights into real estate returns through performance reporting for investors and allows for internal and external benchmarking of returns, including pre-set budgets to pinpoint expectations. Performance data can be visualized through interactive graphs that include key industry KPIs. Next to the software, the company offers the possibility to run scenario testing.

![FundStar](www.fundstar.nl)

**GateSoft** develops automation solutions for the property management market. It is a cloud platform which enables property owners and associations of owners to manage their assets in a user-friendly manner and offers CRM, integrated accounting software and solutions for service providers and individual real estate owners.

![GateSoft](www.gatesoft.nl)

**Go Gary** offers a way to present your assets and real estate portfolios. The company creates digital brochures for clients, which can then be uploaded into their own app or website, entirely in the client’s own branding or corporate identity. Each object is given its own (.com) domain and finished assets are available to the larger public and are automatically linked to Google Maps for directions.

![Go Gary](www.gogary.com)

**Geophy** sources, links, and cleanses traditional and unconventional data, then applies algorithms (supervised machine learning) to provide a unique perspective on commercial property values. This approach enables Geophy to provide objective property valuations and tools that enable users to develop a deeper understanding of the factors influencing property values.

![Geophy](www.geophy.com)
**Digitizing Processes**

**Hero Balancer** offers solutions to optimize heating systems by connecting their software system to the heating systems of schools, offices and houses. Hero Balancer’s software balances the water levels in radiators to ensure an optimal division of heat throughout a property. This results in more comfort for the users of the building and lower electricity bills.

- **Year:** 2017
- **Employees:** 21-50
- **Industry:** Property and facilities management
- **Specialization:** Energy efficiency

**Home DNA** offers an online software system for new construction and renovation projects. The company offers a digital solution as an integral package from preparation up to and including the service phase for customer contact and build quality. An as-built home file with the details per property/customer and a personal housing file for the buyer/occupant are the system’s core. Furthermore, the company is developing BIM integration.

- **Year:** 2007
- **Employees:** 5-10
- **Industry:** Property and facilities management
- **Specialization:** Tenant services

**Jumba** offers home owners a central place to find information about their property and what relates to it; the neighbourhood, the pricing development, the bigger market. The company gathers information from various online resources and combines it into one central place. Through their solutions, home owners are supported in decisions about their property like selling, buying or redesigning.

- **Year:** 2016
- **Employees:** 5-10
- **Industry:** Property and facilities management
- **Specialization:** Property information platforms

**Ingy** develops innovative solutions for smart and energy efficient buildings. The company uses lighting as the backbone of a smart building, enabling applications such as asset tracking, indoor navigation and occupancy analytics. All is done through integrating sensors into lightning and connecting groups of luminaires within a property to gather data.

- **Year:** 2018
- **Employees:** 5-10
- **Industry:** Property and facilities management
- **Specialization:** Smart buildings

KATE Innovations provides advisors with digital solutions which organize the whole valuation process of commercial real estate. In this way, the property market is able to structure data, optimize work processes and develop new and future proof business models. In addition, KATE offers IT solutions that enhance the collaborating of advisors, banks, and real estate owners within the ecosystem of the commercial real estate sector.

www.kateinnovations.com

KYP FLOW offers software that gives people the possibility to optimally participate in a process. This is achieved by having information digital and up-to-date on mobile devices for stakeholders. KYP Facilitates LEAN planning on the construction site and communicates about the progress of projects.

www.kyp.nl

Mapiq provides a smart office platform that enables full and flexible use of workspaces, and aims to offer employees a more collaborative, efficient, and frictionless workday. Mapiq offers user-centric hard-and-software that combines technical expertise and integrations with clean, functional design. The platform matches users with spaces, facilities and other colleagues.

www.mapiq.com

Madaster acknowledges the planet as a closed system in which resources should not be wasted. By giving materials an identity through a Material Passport, Madaster developed a tool that gives the real estate sector the opportunity to eliminate waste and create performance based business models. The offers the possibility to increase re-usage of materials and save costs.

www.madaster.com
**Digitizing Processes**

**Matrixian** links online coordinates to physical coordinates and provides a matrix of data points that connect online and offline data to each other. This way, Matrixian Group supports its clients in making decisions surrounding marketing, customer communication and credit management in order to improve their operating result. Examples include property valuations based on big data.

www.matrixiangroup.com

**Movin**’s technology allows users to navigate through buildings or find assets (via apps). The technology allows users to highlight important Points of Interest, show nearest bathrooms, check out the restaurant’s daily special, search through destinations and more. This indoor technology makes it possible to create smart buildings. These smart buildings feature optimized processes, reduced costs and increased safety.

www.movin.io

**Office App** offers an experience platform for professionals in office buildings. Office App brings together functionalities and services clients have, or would like, in an office building onto one mobile platform. Office App currently offers 58 different functionalities and services ranging from access control, facility management services, room booking and visitor registration to community, events management and retail services.

www.getofficeapp.com

**OCTO** enables real-estate inspections through sensors and image recognition of photos acquired from satellites, airplanes, drones, street view or inspectors. It’s solution allows for predictive maintenance, making precise offers, enhancing compliance, reducing site visits and making smart maintenance plans.

www.octo.nl
Officelynq aims to help make offices LEAN, where people can enjoy working together in a sustainable flexible way, whilst saving cost. Officelynq can be used for data-driven experiments with office users and their behavior and scaling up what works. The offering is plug & play and outside client’s IT systems.

www.officelynq.com

OmgevingsAlert Pro aims to make the environment management processes for the owners of real estate portfolios more efficient and real estate management more effective. Users have insights into what is happening near their properties, such as building permits, zoning plans or other government announcements that could affect the value of properties. OmgevingsAlert Pro is meant for property managers, asset managers, appraisers and professionals in development, risk analysis and government functions.

www.omgevingsalert.nl

OSRE WoningDossier aims to make selling or renting real estate more efficient. The company automates real estate transactions, ranging from finding and managing candidates, to signing the contract. OSRE WoningDossier consists of one system where the involved parties can work together.

www.osrewoningdossier.nl

OMRT builds parametric software applications for real estate developers to speed up the design process, decrease the complexity of design, and provide insights from an early phase and onwards. OMRT’s tools contain smart algorithms that consist of technical - or commercial analyses.

www.omrt.tech
Perfect Place analyses data to determine the attractiveness of locations for different target groups. It offers up-to-date and nationwide data on one platform. The company’s product enables companies to make better investments by reducing risk and increasing (social) return. Perfect Place serves companies involved in the development of residential and commercial real estate.

Qii offers multiple services to brokers to respond to the needs of tenants and landlords. It does so through knowledge and advice provision, practical services and an online application that automates rental processes.

Planon offers software for streamlining business processes surrounding real estate, people and the workplace. The company’s product called Accelerator provides pre-configured processes, including workflows, catalogues, reports, dashboards, templates, roles, authorizations, data import facilities and configuration descriptions.

Provadie is a real estate assessment app that uses smart algorithms and many external data sources. This makes assessments faster and more accurate. Provadie started for appraisers, they save an average of one hour per assessment and their clients experience higher quality. Due to the high degree of flexibility, the app can be used for any type of real estate.

**Readar** provides datasets and maps from aerial imagery and LiDAR data containing detailed information about real estate. Information is given about solar panels, volumes, roof type, changes and more. To do so, remote sensing and machine learning are utilized.

**Realtech** focuses on reducing risks, optimizing margins and increasing efficiency for property developers. The company does so by forecasting demand per lot number prior to sales opening, which allows pricing to be adjusted based on demand. After sales open Realtech offers solutions that digitalize the real estate sales. Wwft and financials are checked, and assignments of lot numbers are optimized.

**Veneficus** turns numbers into visuals, abstraction into ideas and code into business plans. Through combining data about assets, the market, demographics, the neighborhood and benchmark objects the company’s software helps estimating current and future valuations of real estate and future cash flows, all modeled automatically.

**S1MONE** is a unique communication tool for efficient management of malfunction reports and repair requests, whereby the entire chain is kept informed of the status and all involved people and companies are in contact with each other.
**Digitizing Processes**

**Volgjewoning.nl** offers buyers and tenants a personal building file. This contains important documents and information such as offers, quotations and order confirmations. The software is linked to multiple platforms. Users of the software are automatically alerted to upcoming deadlines and updates regarding their projects. Consequently, the supervisor of the project can track progress and involved parties are aware of relevant information.

- **Year**: 2012
- **Size**: 5-10 employees
- **Country**: Netherlands

**Digitizing Processes**
**V-Count** provides visitor analytics solutions. They offer global organizations the latest in people counting, heat map, queue management, staff exclusion and business intelligence platforms. Solutions are backed by a secure cloud-based business intelligence platform that leverages best-in-class AI and machine learning tools to analyze collected data. Moreover, they provide clients with actionable reports and software-based recommendations on how customers behave in their physical locations.

![V-Count](image)

**Masterkey** is a SaaS-provider for the real estate industry in the Middle East. For over twelve years, they create specialized software for real estate marketing, listing syndication, property management and CRM, as well as provide tailored consultancy services for regional businesses.

![Masterkey](image)

**PropSpace** provides SaaS for the real estate industry. PropSpace is CRM software for the UAE real estate industry that contains a portfolio of three separate software: PropSpace Brokerage; PropSpace Property Management; and PropSpace Developer Sales.

![PropSpace](image)

**OVERWRITE** uses AI to instantly create property marketing content. They employ a user-friendly web-app where AI is applied, creating content that real estate agents, landlords and copywriters can use, and thus save time to focus on other activities.

![OVERWRITE](image)
### ProTenders

**Year:** 2009  
**Employees:** 21-50  
**Location:** United Arab Emirates  
**Sectors:** Construction

ProTenders is a platform for construction companies. Developers using ProTenders potentially increase their efficiency by streamlining their tendering activities such as shortlisting bidders, centralizing all tender documents, managing RFIs and receiving and comparing bids online. Architects, Engineers, Contractors and Suppliers can use the platform to generate more business by building their online profiles and get detailed updates of ongoing projects. ProTender is available to over 29,000 businesses of all sizes from 105 countries.

[www.protenders.com](http://www.protenders.com)

### Urban

**Year:** 2019  
**Employees:** 21-50  
**Location:** United Arab Emirates  
**Sectors:** Construction

Urban is an app-based solution that makes renting easy, honest and empowering by bringing the entire rental journey online. With Urban, renters can discover inspected homes, visit on their own with digital locks and pay rent online with flexible payment plans. For landlords, the company cleans and lists their property in its best light with professional photography and virtual tours, hosts live auctions, leases properties out with paperless contracts, and collects rent – all online.

[www.gourban.com](http://www.gourban.com)

### Biosite Systems

**Year:** 2011  
**Employees:** 101-200  
**Location:** United Kingdom  
**Sectors:** Construction

Biosite Systems is a company developing biometric security and access control systems for construction sites, as well as integrating other safety and security systems such as CCTV, fire alarms, guards, and document management.

[www.biositesystems.com](http://www.biositesystems.com)

### BaseStone

**Year:** 2012  
**Employees:** 5-10  
**Location:** United Kingdom  
**Sectors:** Construction

BaseStone offers a digital platform built for construction teams to access, capture, share and communicate information during the delivery of construction projects. Throughout the project, BaseStone digitizes and streamlines processes for project delivery. BaseStone is currently deployed in projects across the UK and beyond.

[www.basestone.io](http://www.basestone.io)
**Coniq** is a company that has developed software that enables retailers to create and track offers and promotions. The company operates exclusively in the shopping mall sector.

Coniq's software includes four modules: reactive repair reporting, works order management, contractor management, and planned maintenance.

**Contilio** is a UK company that develops software designed to provide construction companies with real-time data & actionable insights on project process. To do so, the company uses an AI-powered construction analytics platform.

**Fixflo** allows property professionals to streamline their business processes, whilst providing a customer-centric experience. The Fixflo software includes four modules: reactive repair reporting, works order management, contractor management, and planned maintenance.

**Coyote** offers a commercial property software transforming the way real estate businesses buy and manage assets. Coyote aims to make it faster to buy assets & portfolios, and then more efficient to manage them. Clients range from small investment managers and nationwide property managers to global property companies.
Digitizing Processes

**Goodlord** is a company developing an online system to simplify the house letting process. It allows the creation of tenancy agreements, collection of holding deposits and online signing of contract and streamlines these processes online for agents, landlords and tenants.

*Transactions and leasing*

*Transaction administration*

www.goodlord.co

---

**Gyana** offers a tool that provides on-demand insights in people and places. The company’s platform empowers people to ask – ‘What kind of people visit this area?’, ‘Where else do my customers shop?’, ‘How is this street changing over the last year?’, and get a quick answer. Gyana aims to make data analytics accessible to everyone, regardless of their level of technical expertise.

*Property and facilities management*

*(Geo)Location analytics*

**Digitizing Processes**

**Foyr** supports and empowers real estate professionals in the design process to experience an immersive visualization. Foyr’s solutions are cloud-based and mobile friendly, utilizing AI-enabled visualizations to ensure that real estate professionals can design, collaborate, and present their ideas and plans to their prospects and customers.

[www.foyr.com](http://www.foyr.com)

**Livspace** is a brand for complete home interior design for homeowners. The company provides its customers with interior designers to design homes using space planning, 3D Design, Modular Solutions with all services, complete with online status updates, furniture and decor.

[www.livspace.com](http://www.livspace.com)

**Propstack** Services offers a real estate data, analytics and workflow solutions platform. Propstack provides predictive and prescriptive analytics based on deep data. The company’s suite of online services enables clients to analyze, interpret and gain insight on commercial property values, market conditions and current availabilities.

[www.propstack.com](http://www.propstack.com)

**Props{AMC}** offers a real estate insights and asset monitoring platform organizing the real estate portfolio through a single, integrated interface. The company offers two products: (1) Zone provides asset information like Government rates, Online listing, Registered Transactions and Title records (2) Real Estate is a real estate management suite for asset owners of multiple properties and asset managers of multiple clients’ financial assets.

[www.propsamc.com](http://www.propsamc.com)
REALX offers a platform to buy, hold and sell real estate. REALX allows people to purchase fractional ownership rights in properties sold by sellers on the platform. REALX enables its customers to buy property through smaller investment, hold as they want and sell when they want, earn rentals (or part rentals) from properties they hold, create a portfolio of various property investments – across locations, builders and property types.

Sell.Do provides automation technology to the real estate industry that allows for streamlining marketing campaign performances and sales team productivity. Sell.Do has two products: Sell.do Sales provides a Smart Call Center solution, managing and gaining intelligence on leads, an in-depth pre-sales report to know the top and low performers, and automate complete pre-sales per business process. Next to that, Sell.do Marketing tracks all campaigns at one place and manages and executes marketing campaigns.

The iYell Mortgage Platform consists of three pillars, “Media” that can be used for marketing, “Technology” to make the procedure more efficient, to provide a remote support, to forecast interest rate and more, “Professional team” which is a face-to-face consultation with the consumer and performs the examination procedure.

Softtech Engineers offers a building plan scrutiny and approval system. The system reads CAD drawings and maps them to the development control regulations for approval by municipal corporations and approving authorities. The software is designed to bring greater efficiency and effectiveness in compliance through collaboration between the organization and the approving authorities.
**Linough** develops systems, applications, and hardware products for real estate management clients. The company produces Ninjalock, a smart lock device that allows users to unlock their doors via smartphone, share digital key access, lock and unlock doors automatically. This allows for remote services and monitoring of properties.

**Photoruction** provides an app for architects, construction teams, and landowners to take, save, and share blueprints or photos documenting the construction process. The app’s selling points include its digitization of normally paper-based work, its automation of album and photo organization, and its data sharing abilities.

**Uxtrata** is a late-stage SaaS solution company targeting the real estate sector. The company’s cloud-based, full featured strata management and rental management solutions enable managers and operators to take complete control of every aspect of their businesses, save costs and increase efficiency especially in compliance, accounting/finance and payment.

**Re-Leased** provides property management via the mobile through the use of multiple different cloud technology and applications to create a central hub to automate workflows and never miss a key task. This enables the user with management control, cost savings and new service offerings and have real-time insights from this cloud based solution.
**Digitizing Processes**

**Igloohome**'s smart locks and lock boxes allow home or property owners to grant access to their property remotely, via a mobile app. The company’s products work offline, with no internet connection required. The company is a partner of Airbnb, HomeAway and Booking.com.

- **Year**: 2015
- **Employees**: 101-200
- **Location**: Singapore
- **Category**: Property and facilities management
- **Subcategory**: Safety & security

**UIB** uses Natural Language Processing (NLP) with their Unification Engine (UE) that allows its customers to remotely control and receive alerts and notifications from their home devices on the communications channels they use most, eliminating the need for a separate app for each device. This allows for remotely monitoring your home, interacting with automatic devices like vacuum cleaners and more.

- **Year**: 2014

While the traditional view of Real Estate is one of immobility, the new workplace is quite the opposite: it’s both flexible and on demand. Real Estate is transformed from being a fixed asset into a flexible service. Office spaces are available in any given district, city or country / SAR and can be booked for an hour, a week, 10 years or anything in between, while all necessary services are included.
Flexible Workspace

Breather offers space-as-a-service, with a network of private workspaces built for productivity, targeted towards those who require office, meeting/conference rooms, presentation spaces on demand. It enables businesses to access flexible workspace and is operational in 10 major cities across the globe including Montreal, Toronto, New York, San Francisco, Los Angeles and London.

Knotel aims to cater to the office market with its Agile HQ™ Platform. Knotel designs, builds, and operates branded spaces for established and growing brands, such that the brands can outsource this activity and aim to focus on core business for themselves.

GoSpaces offers a Mobile App that seeks to “gamify” workplaces, incentivizing employees to work towards corporate challenges (e.g. going Paperless for a week). The app also allows users to report workplace issues, locate available space and produce analytics for metrics such as occupancy and utilization.

Convene designs and services premium places to work, meet, and host events. Through strategic partnerships with commercial real estate landlords, Convene operates a network of hospitality-driven locations in office buildings across major U.S. cities, with imminent plans to expand globally.
Flexible Workspace

**WeWork** offers various working spaces varying from a desk in a common area, a desk in a shared space or a fully furnished space for all kinds of businesses. WeWork is a worldwide network of workspaces (27 countries) and the company aims to transforms buildings into dynamic environments for creativity, focus and linkage. WeWork offers businesses the possibility to have flexible workdays, with innovative office designs, and a numerous community of entrepreneurs.

[www.wework.com](http://www.wework.com)

**Workstation** aims to bring people together through shared workspaces, special events, social spaces and our digital member network. Next to their co-working space, they provide corporate solutions that accommodate every company size. Workstation has the proposition of decreasing operating costs, increasing employee satisfaction and enabling flexibility for clients.

[www.workstationng.com](http://www.workstationng.com)

**Tractr** offers an adaptive marketplace for shared space resources, operating with a space-as-a-service logic. For example, when a company needs a working space ad-hoc during daytime, the service allows them to find a suitable space within the neighboring properties.

[www.tractr.ai](http://www.tractr.ai)

**Cohabs** is a startup that provides flexible, fully furnished accommodations through a network of sustainable & community-driven shared homes. Currently primarily active in Belgium, the company has began intercontinental expansion with locations in New York, and is aiming to bring its concept in other, cosmopolitan locations as well.

[www.cohabs.com](http://www.cohabs.com)
Flexible Workspace

**COMET** Meetings creates and operates meeting rooms by combining an inspiring environment and a service designed in every detail to enable participants to evolve in a setting that stimulates their productivity, creativity and welfare. All these locations are in the center of Paris in buildings dedicated to meetings and seminars.

- **Year**: 2016

- **Year**: 2017
- **Property and facilities management**: Co-working spaces
- **Location**: Russia
- **Website**: www.SpacePass.global

**HNK** is an office provider that offers different workspace ranging from flexible workspaces to full-service offices. HNK offers a multitude of workspaces and amenities, such as meeting rooms and catering for tenants of every size, from start-ups to multinationals. The concept of HNK challenges traditional long-term office rental contracts and offers tenants the flexibility to work at multiple locations across The Netherlands.

- **Year**: 2013
- **Property and facilities management**: Co-working spaces
- **Location**: Netherlands
- **Website**: www.hnk.nl

**Deskbookers** offers a trusted platform where people around Europe can find and book unique and inspiring working spaces, online, via a mobile device or telephonically; whether it is a meeting room for an hour, a flex working space for a day or a coaching room for a fixed period of time. The locations on the Deskbookers website are available in several price categories, in more than 1,500 cities in 4 countries.

- **Year**: 2013
- **Transactions and leasing**: Co-working spaces
- **Location**: Netherlands
- **Website**: www.deskbookers.com
MyPup places lockers in offices, buildings or other locations where post and other delivery items can be received and stored temporarily, before a recipient can come pick it up when he/she has time to do so. In doing so, MyPup aims to provide convenience to recipients rather than having to be present at home, for instance, to receive a delivery. The company also claims that it is a sustainable solution, given this construction allowing for less couriers on the roads.

www.mypup.nl

Ritswand offer - by selling (with buy-back option) or leasing - flexible and free standing partition walls and cubicles. The walls or cubicles consist of frames that are joined using industrial zippers. The product aims to meet all requirements that would normally be asked from partition walls and/or cubicles in terms of acoustics, lighting, ventilation and electrification.

www.zipperwall.com

Superlofts combine modular design with prefabrication methods in a diverse mix of loft types and flexible programs. Offered as a trendy, sustainable and modern concept, this system also aims to cater to property managers by reducing maintenance costs and increasing the building’s life span.

www.superlofts.co

Spaces offers flexible working, office spaces, offices, networking, meeting rooms, hot desks, conference rooms and meeting location. The company offers offices for companies of all sizes, ranging from large corporates to starting entrepreneurs. All contract terms are based on flexibility, whether a customer needs a 25 square meter office or 700 square meters for a studio. The flexible offices aim to create an atmosphere where social and creative activities are both stimulated.

www.spacesworks.com
Flexible Workspace

**Tribes** offers flexible office spaces as a service. Customers are able to choose from several membership options, varying from a membership for one Tribes office to access to all Tribes. Currently, Tribes has 23 locations spread over Belgium and the Netherlands. The company is expanding to new countries, like Germany this year. Tribes offers high level material finishing, performance IT facilities, amenities which simplify tenants’ lifes such as dry-cleaning, shoe repair service, high level fitness and restaurants.

![Tribes office](image)

www.tribes.nl

**eOfis** provides flexible workspaces at 37 Locations worldwide. With Flexible Lease Model, members can use the meeting rooms, seminar rooms, flexible offices or work desks in shared offices at all eOfis locations with a pre booking. Hourly, daily, weekly, monthly bookings are possible.

![eOfis office](image)

www.eofis.com

**Kolektif House** provides space and services ideally designed for startups, corporates, freelancers and all other creators. They apply multiple memberships to their customers to be fully customizable and improve the feeling and creativity my matching the customer’s needs and wants.

![Kolektif House office](image)

www.kolektifhouse.co

**Inohom** provides services in the smart home and building management systems sector with its inohom registered trademark. It creates flexible solutions that have a wireless communication infrastructure, which is free from infrastructure dependency, hybrid solutions, and which phase of the project. Inohom smart home systems, makes users control lighting, curtains-blinds, heating, security with special keys or via a smart phone connection, including voice control.

![Inohom office](image)

www.inohom.com
Flexible Workspace

**Work Club** provides flexible workspace solutions and access to a diverse network of discerning professionals, with the intention to foster innovative thinking and encourage new ideas. Work Club aims to create a community of people, by offering a stimulating environment in which to engage in flexible working.

- **Year**: 2014
- **Size**: 21-50
- **Location**: Australia
- **Category**: Property and facilities management
- **Spaces**: Co-working spaces

**Weave Co-Living** creates and manages residential communities for millennials and young professionals in major cities. The company provides residents with designed places to live at affordable, all-inclusive rents. The company also aims to cultivate a strong sense of community by creating social events for their young residents.

- **Year**: 2017
- **Size**: 21-50
- **Location**: Hong Kong SAR
- **Category**: Property and facilities management
- **Spaces**: Co-living spaces

**Skootr** is a chain of managed offices, co-working spaces, private and custom offices. Serving a variety of customers such as freelancers or entrepreneurs, Skootr offers co-working office space to meet individual needs of a dedicated plug & play work space. Skootr provides fully-furnished and ready-to-move private offices, flexible to meet expansion needs for agencies. It also includes custom designed office spaces in any size, with full flexibility to scale up or down as per business needs.

- **Year**: 2016
- **Size**: 51-100
- **Location**: India
- **Category**: Property and facilities management
- **Spaces**: Co-working spaces

**Awfis** innovated the concept of Pro-WorkingTM that focuses on People, Proximity and Performance. Its aim is to bring workspaces closer and make them more accessible to people. They aim to create an ecosystem to facilitate community based working advantage and facilitate performance through strong operations, well defined training processes and consistent service quality.

- **Year**: 2015
- **Size**: 101-200
- **Location**: India
- **Category**: Property and facilities management
- **Spaces**: Co-working spaces
**Able House** is cooperating with various organizations to create customized living space, usually located within university’s dormitories for international students. The company is expanding their houses around university campuses and transport hubs, and aims to create a sense of community among its tenants.

- **Location:** South Korea
- **Year:** 2016
- **Tenant Size:** 21-50
- **Facility:** Co-living spaces

---

**FastFive** is a co-working space in Korea that offers its tenants flexible work spaces, and a range of office services such as IT support, healthy workspace solutions, catering and more. In addition, FastFive offer solutions to businesses to turn client’s offices into fully service flexible work spaces that suit the identity of the brand.

- **Location:** South Korea
- **Year:** 2014
- **Tenant Size:** 101-200
- **Facility:** Co-working spaces

---

**Sparkplus** is a Korean co-working space that currently has 12 locations throughout the country. The company offers flexible work space to start-ups including office and business services. Sparkplus also facilitate start-up training and incubating programs to further accelerate their clients businesses.

- **Location:** South Korea
- **Year:** 2016
- **Tenant Size:** 21-50
- **Facility:** Co-working spaces

---

'A workplace which is cost efficient, sustainable and healthy', a description of the ideal future workplace, but this may become the standard very soon. Indoor climate of Real Estate is gaining more importance and attention by tenants when considering new Real Estate locations but COVID-19 may very well make a healthy and clean indoor climate a prerequisite for future Real Estate. Besides health and safety reasons, smart technology innovations like air sensors and smart lightning improve the work floor environment and employee satisfaction and productivity may rise. Real Estate owners should be aware of the opportunities a healthy (work)place can offer for their own portfolio.
**Awair**'s product identifies five factors that determine air quality. Namely, chemicals, temperature, humidity, fine dust and CO2. The Awair display and app show air quality, as well as track improvements over time. Additionally, personalized recommendations are provided to improve air quality.

**Intenseye** uses artificial intelligence, powered by video analytics, to prevent workplace incidents. By automating inspections, it can provide instant notifications, and potentially prevent damages.

**Orro** aims to go beyond smart lighting. Orro integrates with your favorite smart home systems by implementing one system that integrates lighting, intercom and home control. An easy-to-install lighting system that unifies your smart home and creates perfect lighting, automatically.

**Keen Home** develops proactive hardware and software products to protect and enhance a home’s core systems, providing homeowners with increased comfort, improved efficiency, and a better maintained home. Smart Vent controls individual room temperature by regulating airflow, providing a cost effective and efficient zoning solution for homeowners. The software platform serves as a proactive home health dashboard while offering partners data for lead generation, actuarial price risk data, and peak load management control.
**Healthy Workplace & Living**

**SageGreenlife** designs, manufactures and installs living green walls that can be scaled for any size project, as well as interior design products that rethink the way people engage with nature. Utilizing patented hydroponic technology, Sagegreenlife is committed to designing healthy, sustainable and aesthetically captivating spaces.

![SageGreenlife](https://www.sagegreenlife.com)

**Trä Group** has a modern and trendy proposition that offers the design of and the construction of sustainable buildings and residential environments. More specifically, the company offers renovation and maintenance services, restoration, as well as construction of future-proof concepts.

![Trä Group](https://www.tragroup.fi)

**720 Degrees** offers a cloud and AI based analytics solution for monitoring the quality of indoor environments, by tracking - for example - air quality. 720 Degrees aims to target property managers, also with the proposition that indoor environmental quality has a direct impact on real-estate valuation.

![720 Degrees](https://www.720.io)

**Naava** manufactures and distributes naturally green walls for offices and learning spaces, due to their ability to stimulate improved environmental air quality, cognitive and creative performance, and be aesthetically pleasing. Naava has the vision of improving employees’ satisfaction by making workplaces more radiant.

![Naava](https://www.naava.io)
Healthy Workplace & Living

Atmotrack is developing a network of sensors allowing to measure the air quality in a given environment and enable decision-making accordingly. Based in Nantes, it positions itself within cities primarily and is aiming to expand geographically as well.

RightHear develops a spatial orientation solution for people who are blind or visually impaired. Focusing strongly on accessibility and inclusion, RightHear’s solution is used by retailers to make their venues more accessibility compliant and accommodating for those with visual impairments by the use of audio descriptions, smart and self-powered sensors and an application.

The Nowi climate sensors are able to use the energy available in WiFi, 4G and GSM signals to power themselves. They are focusing on climate sensors such as temperature, humidity and light. Thousand of these are needed per building and changes the batteries of such sensors every year is simply not feasible and too expensive. Nowi aims to change the paradigm from the old ‘plug and play’ to something that fits better with the Internet of things, ‘plug and forget’.

Healthy Workers helps companies improve Employee Wellbeing by providing deep insights into all aspects of wellbeing to facilitate smart choices in a healthy lifestyle. In the office by combining sensor data with employee feedback and at home with Anywhere, where they give employees hands on tips and valuable insights, based on their home situation. Based on these findings they present companies with insights and propose targeted interventions that are designed with employee needs in mind. This way they help companies create the best possible work environment for their employees, so they can thrive and feel happy and healthy.

© 2020 KPMG Advisory N.V., all rights reserved.
Agora is developed by Quest Life and it is a prototype specifically aimed at the Future of Work - namely it is a 35 square meter treadmill which can handle up to 15 people to walk, work, meet, collaborate and even present to colleagues and clients. Quest Life by Agora is delivered with fully equipped work and health stations, safety and sensor environment.

www.questlife.io

Raze Technology is a material science company that developed a light-activated disinfectant coating that provides continuous protection from general pollutants while improving air quality. Raze launched a consumer sanitizing spray series and a B2B coating service. The company has invented a paint integrating their nanoparticles that removes air pollution and an air purifier that does not require filter replacement.

www.nanoraze.com

Airlite provides for a simple, effective and economic means to measure and improve air pollution. Airlite offers an air purification technology embedded within a paint, turning walls into natural air purifiers. By doing so, the company claims to be able to significantly reduce air pollution within its environments.

www.airlite.com

Centric Lab is a neuroscience lab delivering data driven solutions to urban health challenges. Using a smart cities geospatial tool the company analyses environmental and urban data through a neuroscience health lens to help real estate developers, urban planning policy makers, and third sector organizations create area specific and research driven health codes. Their neuroscience research underpins climate change related scenario modelling and targets the reduction in mental and metabolic disorders such as depression and diabetes.

www.thecentriclab.com
uHoo provides a dashboard and app for air monitoring and management. Alerts, tips and recommendations are provided to help people take action in managing the air-quality within their surrounding(s). uHoo can also be integrated with various smart devices and can be used to automate entire buildings.

www.uhooair.com
Innovative Constructions

Constructions technology (ConTech) has evolved over the last years and is expected to expand even more. New building methods, 3D printing, special barriers, specialized gadgets and multifunctional paints are just a few examples of new innovation being applied to construction. With these innovations, construction has become less complex while offering cost savings due to efficiency and/or sustainability reasons at the same time.
**DIRTT** creates customizable, sustainable prefabricated interior wall and millwork systems. It supports reconfiguration, levels of customization, and distributed manufacturing. Enabled by its proprietary software platform, its solutions include various DIRTT wall solutions, along with ICE® technology, and ICEberg®, a modular vs. traditional construction cost–comparison tool. It has over 100 North American Distribution partner locations, 233 patents and 3 manufacturing plants. [www.dirtt.com](http://www.dirtt.com)

**Studio Solarix** aims to integrate sustainable solar energy panels within the aesthetic architecture of a building, seamlessly. In doing so, Solarix aims to make solar panels more mainstream and appealing by eliminating solar panels’ less appealing design. [www.studio-solarix.nl](http://www.studio-solarix.nl)

**Connect Homes** is a prefab home builder based in Los Angeles. The Connect Homes housing system has emerged from a decade of research on making high-modern, green architecture affordable to the mass-market. The results are low-cost modular prefab homes that mimic the spatial and aesthetic qualities of mid-century modern California residential architecture. These homes can be shipped anywhere, adapted to any environment, and are move-in ready a few weeks later. [www.connect-homes.com](http://www.connect-homes.com)

**Branch Technology** is a prefabrication and technology company that specializes in large-scale 3D printing. Branch Technology offers a patented 3D printing process called Cellular Fabrication, C-Fab™. This printing method allows material to solidify in open space, creating a matrix of polymer in virtually any shape. This brings large design freedom and resource stewardship to next-generation wall systems. [www.branch.technology](http://www.branch.technology)
**ECOR** is a sustainable building and design material designed to be 100% recycled and recyclable. It is non-toxic, 100% certified bio-based and can be used as an alternative for i.e. traditional wood, plywood and plastics. ECOR is replacing traditional wood-based and plastic materials in several applications including graphics/signage, packaging, construction, architecture and design, furniture, fixtures and consumer products.

**ImageSurge** develops digital interactive hardware and software applications for the real estate industry. Their flagship product is the Interactive Real Estate Storefront - which includes features like: through-window interactive, sunlight-readable displays; multiple listing services; and user-metrics and leak capture.

**Kisi** develops cloud technology to build secure access control systems that use a combination of sensors and mobile devices to grant facility access to authorized personnel. Designed for commercial and enterprise applications, the system software streamlines access management for operations teams while generating sophisticated data visualizations and personnel tracking for advanced IT departments.

**Katerra** exists to help transform construction with the use of material technology. Katerra is developing a broad portfolio of products – including structural systems, utility systems, finish materials, and more – that will improve building performance and lower carbon footprint. Recently Katerra has launched new types of cross-laminated timber to build wooden skeletons for properties.
Lucid Drone Technologies build drones that clean buildings, anything from washing windows to roofs and nearly every surface in between. Rather than needing lifts, ladders, and scaffolds, we lease our technology to cleaning companies, allowing them to safely relocate their workers to the ground.

www.luciddronetech.com

ES Building Technologies developed a patent-registered process to construct a mid-rise concrete building in an efficient way where all the component are prefabricated offsite (using ESCAD AI software that translate building plans to Prefab production 4D plans). The assembly & process onsite is efficient as it requires less labor, allows parallel trades and reduce the RFI/submittals to zero - the results is up to 40% saving in time and labor cost!

www.estech-ltd.com

View offers large-scale commercialization of dynamic glass. The company manufactures View Dynamic Glass, a new generation of architectural glass that intelligently transitions through multiple tint states to control the sun’s energy, aiming to provide an enhanced occupant experience and optimum natural light and thermal comfort.

www.viewglass.com

Civdrone is an autonomous land surveying marking drone. Civdrone physically inserts stakes into the soil with high level of accuracy. Each stake includes a smart readable tag (NFC) which is coded in real time with clear task instructions for construction. Digitalizing and automating this process allows for improved construction productivity while also lowering its cost.

www.civdrone.com
**Okibo** is developing autonomous robots for construction sites, with a focus on the application of finishing materials on surfaces. The company’s first product is a wall and ceiling plastering robot. The robot is designed to work in the harsh conditions of a construction site, as it has 3D scanning capabilities, computer vision, floor to ceiling reach, autonomous movement and an agile industrial robotic arm.

[www.okibo.com](http://www.okibo.com)

**BrigadierApp** helps developers and construction contractors to manage their field operations and run highly effective communication between construction site and the office. The company provides a platform with a set of applications to control the construction site and get insights into the field operations and productivity with tools such as daily reports, procurement management, field operations analytics and mobile apps for workers.

[www.brigadier.app](http://www.brigadier.app)

**TraceAir** is a construction acceleration solution for the site development phase. Their turnkey service captures high-resolution aerial images, overlays project documents, and allows teams to collaborate in the cloud. The easy-to-use software helps owners, contractors, and consultants keep projects on schedule, maintain site balance, minimize waste, and track progress remotely using a mobile-friendly platform. TraceAir allows the entire team to plan, execute, and communicate more efficiently, creating a transparent and collaborative project experience.

[www.traceair.net](http://www.traceair.net)

**Geoscan** is involved in the design and manufacturing of drone aircraft systems and software that could be used to create 3D models of cities, 3D mapping of construction sites pre-development and thermal imaging.

[www.geoscan.aero](http://www.geoscan.aero)
Innovative Construction

The BetonBallon building technique allows vaulted structures for houses and tunnels to be made in an innovative, affordable and sustainable manner. With this technique, construction time and CO2 emission are significantly reduced. Cost savings of up to 50% and 70% can be realized for concrete and steel respectively. This is all possible thanks to form, process and materials being optimally aligned. The BetonBallon building methodology is applicable in the different construction industries, being home, infrastructure and utility construction.

www.betonballon.nl

Chess Wise is committed to a transition to sustainable, smart lighting systems for buildings, public lighting and industrial lighting. Chess Wise develops and manufactures products, software and services using the wireless, full mesh network protocol Mymesh for Smart Building, Smart City and Smart Industry applications. Mymesh offers a wide variety of possibilities to connect, manage and control thousands of devices simultaneously and make any property smart.

www.chess.nl

Fiction Factory offers micro homes made of layered cardboard with a long life span. The Wikkelhouse is made out of durable corrugated cardboard glued together with an eco-friendly adhesive. The cardboard is topped with a waterproof, breathable film called Miotex and finished with an open facade cladding system of pine slats. It is up to three times more sustainable than traditional construction technology. The Wikkelhouse building technology can be used for home, recreational or offices construction.

www.fictionfactory.nl

CyBe has developed a innovative 3D printing technology using concrete. The startup’s ultimate dream is to change the building industry by shifting from conventional construction methods to 3D concrete printing. This will deliver a faster and more effective construction process, with many other advantages such as sustainability, free form construction, lower cost of construction and ownership. CyBe’s concrete printing technology is applicable for architectural, structural, industrial and design construction.

www.CyBe.eu
Flexotels offers Short Stay Solutions and is an innovative manufacturing and rental company of temporary accommodation solutions. Flexotels mainly service temporarily events like music festivals and business events all over Europe through their foldable accommodations solutions. The company aims to develop a variety of flexible accommodation facilities that can be placed at any location, at any time.

www.flexotels.com

Karbonik produces thin (<0.5mm) innovative carbon based foil that can be applied to floors, walls and ceilings to provide warmth. The infrared radiation coming from the foil heats up spaces. The foil is 100% recyclable and environmentally friendly. Furthermore, the foil can be easily placed underneath carpets or tiles. Karbonik operates on electricity and is therefore often more sustainable. The system can easily be controlled from inside a property or from a distant location.

www.karbonik.nl

The online parametric platform Packhunt.io enables real estate and construction companies to digitize and automate processes ranging from design, engineering and sales to construction and manufacturing. Packhunt.io makes it easy to reach customers and provide product configuration, personalization and customization options.

www.packhunt.io

Novito provides a building system that makes it possible to adapt homes to the specific needs of homeowners. This can be done in several ways, from domestics to care facilities. Novito provides buildings that can be built within one day, and it takes another two weeks to make them ready to use. Novito’s buildings can be taken apart easily and rebuilt in a different location, making them a sustainable solution.

www.novito.nl
Innovative Construction

**Skelex** designs, produces and markets custom exoskeleton solutions for large scale manufacturing companies. The firm’s products allow workers in industries like aerospace manufacturing, shipbuilding and heavy manufacturing to be more productive while minimizing the risk of ergonomic injuries by offering upper body and neck support through their exoskeletons.

www.skelex.com

**SUSTONABLE** has developed a thin and ultra-light weight building material with the physical look and feel of engineered stone or granite. The mineral fillers (quartz) are agglomerated by recycled thermoplastics not containing organic solvents, resulting in a sustainable affordable and high performance product with looks and feel of natural stone. The product is very suitable for kitchen countertops or shower walls.

www.sustonable.com

**uDrew** is a cloud platform that utilizes custom AI to allow homeowners and Industry, without any technical skills, to design, engineer, manage & create their own custom building project, throughout the process. As projects are drawn 100% digitally, all offsets, infrastructure, environmental conditions, local and national regulations are checked in real time as the project is sketched.

www.udrew.com
The rise of Internet of Things (IoT) is changing Real Estate from being a stand alone asset to an interconnected product which offers endless possibilities for owners of Real Estate. IoT innovations lead to more efficient, sustainable and user friendly buildings. These technologically advanced electronic products enable tenants and commercial property managers to control in-house traditional devices in an easy and centralized way. The list of traditional devices made smart is non-exhaustive, but current applications are often aimed at smart heating systems, security systems and lightning control.
Relogix uses advanced IoT sensors to monitor workspace movements, workplace design effectiveness and employee engagement with a high level of accuracy. The sensors, which can be attached to desks or ceilings using adhesive strips, are in their 5th generation, and can be paired with a Workspace Analytics Platform to optimize workspace utilization.

www.relogix.com

Abode offers a DIY smart security solution, which combines a no-contract home security platform with a smart home functionality. On-demand short-term monitoring and most smart home devices on the market are supported.

www.goabode.com

Cohesion is a real estate software company that creates smarter buildings and improves experiences by unifying systems and people in a single platform. Their secure, converged, Internet of Things-enabled solution unites core building workflows, optimizes portfolio management, and generates actionable insights resulting in increased profitability and improved tenant experiences.

www.cohesionib.com

Aquicore’s cloud-based platform tracks, analyzes and predicts building performance factors in real time to create actionable insights. With self-installable IoT sensors, the company additionally offers an asset operations solution.

www.aquicore.com
**Enlighted** is an Internet of Things solutions company that delivers a technology platform for smart buildings. With its sensor technology, scalable network to real-time data collection and high-value applications, Enlighted helps its customers to reach long-range sustainability goals while saving money and increasing efficiency. Enlighted provides smart energy solutions for commercial environments, saving customers up to 90% in energy costs while improving the comfort of workspaces and the efficiency of the people who work in them.

www.enlightedinc.com

**Kwant.ai** uses proprietary low powered sensors network to automate construction site data collection to improve safety and productivity. Using AI, Kwant.ai provides analytics like schedule and cost risk, early warning signals to optimize workforce and predict/prevent safety incidents. Kwant.ai collects real-time location, time, identification and activity data of craft-workers and assets using minimal infrastructure and visualizes in 3D heat map. Their platform empowers owners, real estate developers, builders and insurance companies measure and mitigates risks.

www.kwant.ai

**Notion** is a smart security system that empowers home and property owners to be proactive in protecting their spaces, people, and most valued possessions. Powered by a multifunctional sensor and app, Notion is committed to reducing risk and increasing protection of a property with the ultimate goal of becoming a requirement for insurance.

www.getnotion.com

**Latch** is a fully integrated system of both hardware and software, expanding smart access through thoughtful and intuitive design made for modern living.

With Latch, you can open and manage every door in an apartment building—all from your smartphone.
Internet of Things

**Senseware** offers facility monitoring and controls platform for the commercial and industrial building market. It developed into a universally connected IoT ecosystem capable of connecting any device, system, or piece of equipment. The wireless platform delivers building owners, operators, and facility managers a way to integrate, monitor, and control all of their systems. The cloud-hosted platform’s combination of hardware and software enables a wide range of applications from energy management, equipment-level monitoring, HVAC control solutions.

[www.senseware.com](http://www.senseware.com)

**VergeSense** is a provider of an AI-Powered SaaS platform for commercial real estate. The VergeSense platform creates a sphere of intelligence within properties to unlock the data-driven office and provide real estate investors, property managers, and workplace tenants increased asset value and a more productive workplace. Cost-effective VergeSense sensors can be installed in minutes and the platform gives actionable insights and AI-powered recommendations to building managers through an easy to use dashboard.

[www.vergesense.com](http://www.vergesense.com)

**Spaceti** is an enterprise software system that provides space and time efficiency through data gathering and analytics with the use of sensors and their own designed dash boarding. Their solution gives insights in user experience, air quality, temperature and space usage efficiency. It saves costs by optimizing space in your workplace while setting standards for people’s comfort and wellbeing, leading to greater productivity.

[www.spaceti.com](http://www.spaceti.com)

**Spacewell**, a Nemetschek Group company, is a technology and consulting firm, supporting its clients across the globe to improve the performance of their building portfolios. Their core purpose is to make buildings work harder for their occupants through unlocking the power of building data. By making this data actionable Spacewell provides smart solutions in the field of cleaning, technical maintenance, space efficiency, financial performance, tenant services and occupant experience.

**Internet of Things**

**Smartvatten** is a water consumption monitoring service that helps monitor water consumption, catch plumbing leaks, and increase the operational efficiency of property businesses. With a camera to keep track of the main water regulator and a cloud-based service to analyse consumption patterns around the clock, clients analyse their consumption and be alerted immediately if a leak is detected. Smartvatten stores water consumption data stored in existing property management systems and the reports are created automatically.

- **Year**: 2013
- **Employees**: 21-50
- **Country**: Finland
- **Industry**: Property and facilities management
- **Focus**: Water efficiency

**Wiiste** manufactures and distributes technology that allows the humidity and temperature of concrete to be measured remotely via IoT sensors.

- **Year**: 2012
- **Employees**: 1-4
- **Country**: Finland
- **Industry**: Construction
- **Focus**: Smart buildings

**SmartHab** is a connected apartment operator for owners of residential real estate, mainly developers. SmartHab provides them with a fully integrated platform: equipment, information system, advice and services. Customers can thus enhance the connected home by equipping all the lots of their programs. Native integration in the rack reduces costs and provides better service.

- **Year**: 2017

nxtBase develops an Industrial IoT platform for mobile workflows that combines augmented reality (AR), artificial intelligence, computer vision and pattern recognition. Their smart glass solution is providing digital assistance to facility managers, service technicians, as well as caretakers, and support them with voice-controlled applications on corresponding smart glasses in their tasks.

Rollet is a new payment service that enables drive-through payments with any car. With Rollet’s car recognition cameras, the vehicle becomes a payment token, therefore no manual cash or card payments and no queuing is needed in parking lots. Rollet also deals with the development of traffic management systems to control and manage vehicle traffic at industrial areas and office campuses.

OOT Technologies provides smart home solutions for home security, energy efficiency, cost saving and comfort for new and used properties. The multi frequency/protocol OOTT HUB smart home hub offers compatibility to most existing and future smart home accessories. Their system enables users to control everything with their mobile phones, installing cost efficient smart home systems without wall drilling, rewiring, or mess, compatibly with customers’ already existing appliances, such as heating, climate, shutters, garage and door control.
**Internet of Things**

**Robeau** is a start-up company which offers connected solution for water management. It allows to measure direct water consumption in all buildings and properties, including leaks and over consumption, allowing to reduce up to 40% of water consumption.

[www.robeau.com](http://www.robeau.com)

---

**Trusstor** is a solution targeting the construction workforce and aims to enable control over the working environment, both on- and off-site. Trusstor aims to address productivity and safety by combining a real-time location system (RTLS), smart equipment (IoT) and artificial intelligence abilities. Trusstor also aims to focus on collecting quality data and utilize it to support decision-making processes.

[www.trusstor.com](http://www.trusstor.com)

---

**Disruptive Technologies** has developed a simple and secure wireless sensor solution that delivers useful insights to customers, enabling more sustainable, safe and efficient operations within substations, buildings and offices. Examples of usage include remote monitoring, predictive maintenance, smart cleaning, legionella prevention and cold monitoring using temperature, humidity, proximity and touch sensors. The sensors are tiny, have a battery life of up to 15 years and can be installed anywhere, literally.

[www.disruptive-technologies.com](http://www.disruptive-technologies.com)

---

**Polaar Energy** offer businesses and individuals efficient digital building management tools to monitor and optimize their water and electricity consumption. The monitoring of the digital data collected using “BREEAM & HQE” certified probes allows visualizing the consumption via a web dashboard or SMS, to prevent and control a number of disasters, such as water damage and losses of energy.

[www.polaarenergy.com](http://www.polaarenergy.com)
**SOLUT** is a B2B, AI-powered motion recognition SaaS company. We increase labor productivity of blue-collar workers by creating AI models that recognize any human activity by hands and body movements. Pilot projects identified a possibility of increasing the output by more than 20%. Added focus:

- **best practices**: identify high performers and scale up their experience
- **quality**: control over the operations processing

www.solut.ai

---

**Athom** has produced ‘Homey’, a device which connects with all your devices, and makes them approachable at one central place. Devices can subsequently be voice-controlled, controlled by smartphone, or can be programmed to automatically follow specific rules. As a result, users have a home without remote controls, that listens and does exactly what the owner wants. As a result, users can play their music and save energy from just one device. The connected devices can be a combination of different brands and technologies.

www.athom.com

---

**Blockbax** helps real estate companies own the Smart Building opportunity. The availability of sensors will quickly become a commodity and offer the ability to translate the data coming from the sensors into operational cost savings and increased user experience. Blockbax provides a platform that will easily integrate with whatever sensors their clients are using, offer self-service dashboards for the data and apply easily configurable business rules in real-time to the incoming data. By taming this complexity they allow the conversation to fast-forward to business value.

www.blockbax.com

---

**bGrid** is an IoT PropTech company delivering hardware and algorithms which act as the backbone of smart buildings. Their solution consists of multifunctional bGrid® Nodes which measure everything in a building as well providing a wireless Bluetooth positioning network. The bGrid Nodes connect to the lighting system, building management system and more. This allows for controlling light, climate and blinds among others.

Buildings have installations controlling the indoor climate, their data is stored in a Building Management System (GBS). Simaxx translates this data into information usable for controlling maintenance, comfort and sustainability. The platform’s features include 70 scripts in its Smartbridge, algorithms converting data into information and a user-friendly interface. Dashboards, reports and event lists are generated based on these analyses, making clear how the building functions. The platform aids in preventing malfunctions and complaints.

www.simaxx.com

Parxlab collects the data generated in the car parks with its own production hardware systems and optimizes personnel and parking for the enterprise. Thus, it offers insights into workload and to monitor all the data generated. It also minimizes the problem of finding a parking space by showing empty parking spots within the drivers on platforms such as mobile applications and screens.

www.parxlab.co

SWYCS offers a universal, interoperable and vendor-neutral Internet of Things (IoT) platform. The SWYCS technology contains hardware and software and is based on open standards that are compliant with relevant international IoT-protocols. The system is API-driven to integrate with third party software. SWYCS connects devices and installations to make buildings and home environments smart. The integrated infrastructure offers a plug&play-platform controlled by a single app or web-portal.

www.swycs.com

TryLikes aims to enhance the experience of customers through accessible, easy-to-use technology. Using its IoT solutions, algorithms and customer profiles, the company aims to know the preferences of visitors. The company’s platform turns data insights into turnover boosters via automated Proximity Marketing Campaigns. More recurring footfall and the increase of time and money spend may benefit involved stakeholders.

Internet of Things

**IOT Plus** Middle East provides Internet of Things (IoT) solutions, System Integration, Technical Support & Maintenance & Turnkey Solutions. IOT Plus solutions can be used to remotely monitor a variety of “Things” (i.e. temperature, motion, humidity, energy use, etc.), alerting users by text and by email when user-defined conditions are met.

[www.iotplus.ae](http://www.iotplus.ae)

**Converge** develops wireless IoT systems for construction with the aim of collecting physical data from sites and combining this with digital models to drive a step change in productivity across the industry. Converge wants to increase efficiency to keep the world thriving on a planet with finite resources by driving sustainability and efficiency in the world’s largest industries.

[www.converge.io](http://www.converge.io)

**Calumino** have developed an A.I. computer vision enabled thermal sensor. The Calumino Thermal Sensor (CTS) extracts data from the heat signatures of humans and objects, providing unseen insights for healthcare, security, smart building, fire safety and automotive industries. If an elderly resident is to fall, the Eve Care algorithms recognize this and the caregivers are alerted immediately. In addition, behavioral data analysis using the Eve Care system (e.g. sleeping patterns and activity monitoring) provides revolutionary insight into a resident’s health and wellbeing.

[www.calumino.com](http://www.calumino.com)

**Hoxton Analytics’** foot traffic technology counts people based on footsteps going past a low-level camera. It collects no personal data, so the company can continually audit its accuracy. The technology provides additional insights such as gender, occupancy and average dwell times. It can be installed both indoors and outdoors, only needing a power socket. The data is presented back to clients in a real-time cloud data platform.

[www.hoxtonanalytics.com](http://www.hoxtonanalytics.com)
Switch Automation is a global software company that helps commercial real estate reduce operating costs, improve energy efficiency and deliver strong occupant satisfaction. Switch Automation have developed a comprehensive smart building platform that integrates with traditional building systems and Internet of Things (IoT) technologies to analyze, automate and control assets in real-time.

Ynomia leverages a proprietary, short- and long-range, Bluetooth-enabled IoT network to actively capture real time resource insights in order to increase productivity, visibility, safety and enable dynamic construction program management. Ynomia aims to reduce total cost of construction, and improve safety on projects by providing a real-time view of construction projects to users.

WEGoT’s VenAqua, a sensor based IoT solution, is an end to end water management system that captures information in a multi-inlet plumbing layout and provides the end user with real time information. The information includes minute-by-minute consumption details; alerts (over-usage, leak detection, open taps and predictions) based on historical data and consumption patterns of other residents on the campus. Additionally, VenAqua also provides the option to remotely shut off the supply of water in case of any alerts.

Cosine Labs is an IoT company that builds hardware and software products for the rental real estate market like Coliving and Student/Dorm Living segment. The company provides the tech to transform existing/new buildings into IoT enabled Assets To optimise operations, create seamless access controls and a sustainable, energy efficient property. Their solutions include IoT Hardware system applications like their smart digital door locks that support pin codes and real-time information. In addition the firm provides smart energy meters and facial recognition with thermal sensing.
Photosynth focuses on rediscovering new values for daily supplies through technology, aiming to enhance user-experiences. The company’s latest product is a smart lock called ‘Akerun’, which enables people to use smart phones, PCs and wearable devices to open doors. Based on this product, the company also provides an online key management system for business owners with ‘Akerun remote’ and ‘Akerun manager’.

Trakomatic enables data driven decisions by making physical locations smarter. It tracks shopper behavior at different touch points, like image and video interaction, across the online and offline space, empowering business owners to make data driven decisions and transforming the overall shopper experience. Trakomatic enables businesses and organizations to discover the ways people interact in a physical environment using video and sensor technology. The data is transformed into actionable insights that drives optimization and improvement of clients’ core business processes.

Vital Xense offers industrial design sensor hub solutions. Through their solution, deploying a sensor or a string of wired sensors takes little time and system configuration. Their solutions are re-usable, plug and play and allow for quick modification and adaption of the sensors. This way, users benefit from customization flexibility, time and cost saving, scalability and easy adaptation of IoT.
Traditionally, Real Estate was financed through specific funds with a minimum investment of several thousands of euros. Alternative funding methods result in a more accessible financing of international Real Estate projects. Although alternative funding has been coined frequently in the context of banking, it can also be applied to Real Estate. Next to institutional investors, individuals are now able to invest in Real Estate projects with small amounts of funding, thereby opening up the market to everyone.
New Ways of Funding

**Finneo** offers a cloud-based SaaS debt management and placement software solution designed for property owners, developers, REITS and pension plans. In a nutshell, Finneo is an End to End technology platform for CRE Debt Placement and Management.

New Ways of Funding

**Rise Vest** is an investment app that lets anyone put their money in automated safe dollar investments around the world. Rise users can invest in three asset classes - US Real Estate, US Stocks, and Fixed Income (Eurobonds). Next to being a wealth management app, Rise also includes a community that offers financial guidance.

![Rise Vest](www.rise.capital)

**Housers** aims to enable investors to invest in a simple manner in real estate. Housers allows investors to invest in buy-to-let opportunities, in buy-to-sell renovation or construction of properties, or in project developer loans through an online platform. Houser is established in three countries and offers a combination of expertise in finance and technology.

![Housers](www.housers.com)

**Bloqhouse Technologies** applies tech and engineering capabilities to empower clients to unleash their full potential. The company has created a software solution for fund managers and investment firms in need of an online syndication or funding platform for equity and debt offerings. By utilizing the customizable, responsive and flexible software platform fund managers can (1) Tap into a novel network of international investors, (2) Manage investors and funds efficiently and (3) Automate deal flow administration.

![Bloqhouse](www.bloqhouse.com)

**Blandlord** enables clients to take partial ownership of a real estate object. By dividing ownership, investing in properties becomes feasible for people who normally don’t have the resources to invest, because of the size, risk or complexity associated with the investment. Starting from EUR 100,- people can buy a ownership in an object. The economic ownership of the properties is administrated in blockchain technology to provide openness to all parties involved.

![Blandlord](www.blandlord.com)
New Ways of Funding

**Bouwaandeel** uses crowdfunding as a basis for financing real estate projects. The Bouwaandeel platform offers project developers and real estate investors access to funds of private investors and private companies. A key distinguishing factor of the platform compared to traditional real estate funds is that investments are possible starting from EUR 200,-. Propositions up to EUR 300,000,- can be placed on the platform and the to be financed object always serves as collateral.

*www.bouwaandeel.nl*

**Brickfund** offers a new method of investing in real estate. The company selects appealing properties for investments and offers a transparent platform. Investors receive personalized online access, which provides detailed information regarding investments. Users are furthermore empowered to make their own decisions and can make investments starting at EUR 5,000.-.

*www.brickfund.com*

**De Windcentrale** facilitates households and companies to become joined owners of a large wind turbine. All electricity produced by the wind turbine is deducted from the energy use of the individual owners which leads to a lower energy bill. De Windcentrale offers a simpler and cheaper alternative for solar panels. Currently 15,000 households and companies are producing their own green electricity with their own wind turbine. With De Windcentrale App users can check the production of their turbine real time.

*www.windcentrale.nl*

**Crowdestate** is a crowdfunding platform for real estate linking project developers and investors. Prior to a project being published, screening is performed to ensure that the quality is up to par and the project is feasible. Crowdestate offers Dutch and international projects to allow investors to build a diversified real estate portfolio. Crowdestate selects multiple projects from which its customers can choose to invest in. The customers of Crowdestate can follow the developments of their investment portfolio easily.

*www.crowdestate.nl*
SamenInGeld offers its clients the opportunity to invest in various real estate projects through investments starting from €250, -. Investors pay 0.5% of the invested capital to SamenInGeld in the first year and a lower percentage thereafter. Furthermore, investors acquire their mortgage right by the foundation Investerders SamenInGeld, increasing the certainty of their investment.

SmartCrowd is real estate investment platform that uses a crowdfunding model. It provides the opportunity to access real estate through beneficial fractional ownership. The online platform enables the average investor to build a personalized investment property portfolio with a minimum investment of $1,500.

Proportunity uses technology to remove the biggest barrier to homeownership: large down payments. They lend the down payment gap that would take buyers years to save, in exchange for equity in these homes, helping people with their home ownership. Because Proportunity models future home prices and spot low-risk homes, they can offer these loans at lower interest rates. Proportunity has helped customers buy homes, secured debt funding from a pension fund and is an FCA-authorised mortgage lender.

Bricklane provides people with a way to receive the financial benefits of owning UK residential property, without the inflexibility, hassle and tax-inefficiency of direct investment. From £100, customers can invest in geographically targeted residential property portfolios, and earn returns from rental income and price changes, using an innovative take on the REIT structure. Compass, their proprietary data analytics platform, supports their expert property team in selecting properties for each of the portfolios, and shaping their overall strategy.
**New Ways of Funding**

**BrickX** aims to transform the notion of property ownership in Australia. The company provides an online investment platform that allows Australian’s to invest in residential property with a minimum of $50.

- **Year:** 2014
- **Type:** Investing and financing
- **Location:** Australia
- **Website:** [www.brickx.com](http://www.brickx.com)

**Dealt** is a real-time marketplace for commercial real estate finance. The platform searches credit criteria from lenders and using AI technology matches to the requirements of each Borrower. Lenders are then given the opportunity to bid on loans and all parties are then able to negotiate and agree terms online.

- **Year:** 2019
- **Type:** Investing and financing
- **Location:** Australia

Qornerstone offers a cloud-based platform for property management. The platform integrates various PropTech modules like digital payments, cloud-hosted databases, mobile apps, financial accounting and ERP software to comprehensively meet the needs of building owners, property managers and individual tenants and/or residents.

With the ParkingFriends shared parking service app, parking space users get access to easy and fast parking search, real-time parking reservation and a convenient payment method. At the core of the system is an IoT Parking Sensor, where Acconeer’s A111 radar sensor is used to detect whether a parking space is occupied or not. This optimizes parking lot occupancy and user convenience.

Really provides property management software that combines project management, E-tendering and a just and fair open marketplace solution. The integrated tool bridges the gap between real estate project management approaches and new technological innovation by support real estate professionals.

ModuParking offers a mobile phone application that matches idle parking spaces with temporary visitors. On the app, residents can register their priority parking spaces during chosen hours of the day, allowing visitors to book available spots near them.
Sustainable innovations have gained importance in the last couple of years as consumers and hence, investors are increasingly prioritizing sustainability, something which is expected to increase more in the coming years. Sustainable innovations are not limited to only sustainable construction but also include intelligence systems through collection and usage of data and IoT, all reducing or giving insight in how to reduce, one’s footprint and costs.
**Newatt** is an application that strives to reduce its customers’ energy consumption. The system is based on an integration of Internet of Things (IoT) technologies that measure the consumption of stores and/or equipment in real-time. Using Newatt will give users insight into their energy consumption and the possibilities to estimate costs of energy, as well as to implement predictive maintenance of equipment.

www.newatt.com.br

---

**Aquanta** develops innovative products that help combat climate change, with specific focus on the energy usage and inefficiencies inherent in our water heating and plumbing systems. The company has invented a new and sustainable approach to solar water heating. The Aquanta system leverages technology that was developed for their Ohm solar hot water monitoring system.

www.aquanta.io

---

**Energetika NL** is specialized in energy efficiency solutions. The company combines the newest sustainable technologies with an IoT platform in order to achieve energy savings and at the same time obtain exact analytics of people, machinery, products and processes. Their objective is to deliver real-time and actionable insights while reducing energy costs for enterprise business, so-called ‘Energy Intelligence’. With their specialized solutions, Energetika’s clients can achieve improved operational efficiency and productivity.

www.energetika.com

---

**Aurora Solar** offers a cloud-based software. This software enables solar PV engineering design, provides a workflow management functionality and a utility rate database, and facilitates sales and customer acquisition for solar installers and financiers.

www.aurorasolar.com

---

Radiator Labs addresses two critical problems in steam heated buildings: energy waste and tenant comfort. The Radiator Labs system features the Cozy™, a wireless, low-cost, and easily installed retrofit that drops on top of radiators. The Cozy™ provides room-level temperature control for management and tenants via web and mobile apps and offers savings of up to 45% in heating costs.

WeSmart is a platform which helps to achieve more efficient energy management. The platform connects to sensors which collect data. Thereby, customers can get real time access to their consumption. Smart alerts and energy managers help to optimize energy usage.

Enermix offers software, design, professional services, and SCADA (Supervisory Control And Data Acquisition) services to control and monitor apartment, commercial, and industrial buildings. The software and professional services are mainly related to building automation, energy management, energy efficiency improvement, renewal energy, and hybrid heating systems.

R8 Technologies is a company that’s focused on decreasing energy consumption in commercial properties whilst keeping a comfortable indoor climate for every room and area simultaneously adding significant savings for both the building owners and managers. RBtech’s AI based R8 digital operator takes care of commercial buildings’ indoor climate while saving energy and reducing CO2.

</thead>
<tbody>
<tr>
<td><strong>Fourdeg</strong></td>
<td>Offers a B2B SaaS service of heating optimization for construction, energy, energy service companies, property management companies and building owners. The service improves indoor comfort and saves in heating costs through lower heating energy consumption and Demand-side Management. The technology works automatically at room-level accuracy in any size of old and new buildings, including commercial, public, and residential premises.</td>
<td><img src="image1.png" alt="Fourdeg Image" /></td>
<td><a href="http://www.fourdeg.com">www.fourdeg.com</a></td>
</tr>
<tr>
<td><strong>Nuuka Solutions</strong></td>
<td>Offers a platform to centrally monitor and manage energy efficiency, indoor air quality, and HVAC processes in commercial and public buildings, visible at the entire real estate portfolio level. The Nuuka SaaS device is independent of manufacturers, which helps to automate data collection directly from energy meters, building automation systems, IoT systems, and utility companies.</td>

Cittamap provides easy access to data and insights on the built environment for energy transition, climate risks, and urban livability for the real estate and infrastructure sector. The data platform brings together more than 135 different information points that saves time, and allows data driven decisions towards climate neutrality. Supporting the user with the right information at the right time using satellite data, and social data along with open data processed and analysed using automated data pipelines will ensure up-to-date data.

www.cittamap.com

Finch Buildings envisions a world in which buildings contribute to solving the climate problem. With Finch Buildings, sustainable living should become available to everyone. Reducing the amount of CO2 in our atmosphere, thereby contributing to the restoration of the planet’s balance. Only then will we be able to make the greatest possible impact.

www.finchbuildings.com

GreenHome (formerly Bleeve) helps homeowners on a weekly basis to make their homes more sustainable. GreenHome helps customers step by step with energy saving advice, an overview of subsidies and finding a reliable construction company. GreenHome aims to build the biggest independent platform to make homes more sustainable. The company also offers warranties on top of the constructor’s warranty of the constructor if the renovation is booked via GreenHome.

www.greenhome.nl

FlexSol is a high-tech company with expertise in curved solar technology. The innovative technology is applied in smart & sustainable products such as roof tiles and Soluxio solar pole products. This results in products that are practical and offer design flexibility. These features make FlexSol innovative in the off-grid solar market.

www.flexsolsolutions.com
**Sustainable Innovations**

**Hello energy** is an energy management tool that visualizes energy and sustainability and activates users of buildings to deal with them smartly. This tool makes the sustainable achievements of real estate visible for everyone on any device; laptop, mobile or a screen in the lobby. Consequently, people are more aware of energy reductions. Hello energy also offers its services to hotels and offices.

[www.hello-energy.com](http://www.hello-energy.com)

**IBIS Power** provides innovative renewable energy solutions. Their flagship product “PowerNEST” is their solution to generate six times more energy on the limited roof space of high-rise buildings than current solar applications.

[www.ibispower.eu](http://www.ibispower.eu)

**The Kite Robotics** window cleaning robot is a safe, sustainable and cost saving solution for cleaning windows, window frames and paneling. It can be installed on existing or new buildings. Customers save up to 90% cleaning costs and 20% on the initial investment costs, depending on the building type. The robot cleans 5-10x faster and cleans windows and paneling. Due to its sustainability, BREEAM credits can be earned.

[www.kiterobotics.com](http://www.kiterobotics.com)

**Kindow** provides intelligent sun- and daylight control for office and utility buildings. Kindow provides motorized exterior shading to improve comfort and energy efficiency and offers direct integration with other smart building applications.

[www.kindowblinds.com](http://www.kindowblinds.com)
**Sustainable Innovations**

**ParknCharge** invests in the charging infrastructure for electric cars. The company places charging stations to meet the current demand. Besides investing, ParknCharge takes care of installation, management and maintenance, customer services and invoicing.

![ParknCharge](image)

**StoneCycling** produces “WastedBasedBricks” which are bricks that give a building a unique and sustainable look and feel by composing them of different waste components. Waste material is collected in a 150 kilometer radius of the factory. Combining various waste materials opens up a range of new possibilities for these bricks. The bricks can be used for the exterior and interior of buildings.

![StoneCycling](image)

**PHYSEE** has created SmartSkin – a smart, sustainable and connected facade, consisting of electricity and data generating windows (SmartWindows) and a intelligent grid connection (EESY). Their SmartWindows have BIPV panels integrated solar cells and smart sensors, simultaneously generating clean electricity and gathering climate data. The end result is a facade of connected SmartWindows and facade elements, saving up to 25% energy for heating and cooling and increasing the comfort experience of users.

![PHYSEE](image)

**Renolution** provides a method transforming existing houses into energy neutral houses by making use of roof and facade elements that will be consolidated with a light steel frame. Residents do not have to leave their home during renovations. Renolution gives advice on cost reduction and renovates houses into energy neutral houses. This method makes sustainable building easier for housing corporations, municipalities and other construction partners. Renolution’s methods is applicable to all sorts of buildings.

![Renolution](image)
**Sustainable Innovations**

**Studio Solarix** designs and develops sustainable design facade panels that generate solar energy through integrated solar panels. The solar panels become tactile and can communicate with their environment through integrated LED lighting.

2018 5-10 Netherlands

Sourcing: materials, products and technology

Building design

[www.studio-solarix.com](http://www.studio-solarix.com)

---

**Sustainable Buildings** provides an innovative IoT-based energy management system to make buildings smart and sustainable. The company offers tools to its customers to help them with the transition to energy-neutral real estate. Sustainable Buildings provides multiple services: building diagnostics, consumption monitoring, production monitoring, environment monitoring, manual control and automated control. The management dashboard shows real-time information about electricity and gas consumption, occupancy rate and humidity. Moreover, it offers features such as savings planning, occupancy optimization and savings potential discovery.

**The Urban Jungle** Project enables the positioning of green flora in locations where they are not expected and usually not possible. It is a ‘plug-and-play’ innovation, whereby the tree is not dependent on roots and by its lightweight construction it can be placed below roofs, on streets etc. Trees will absorb CO2 and cool down the livable space. Potentially, a tree on a pendulum could be a source of energy creation in the future.

2019 5-10 Netherlands

**Sustainer Homes** has developed a building system that allows architects and clients to design their own customized, radically sustainable home. Thanks to the circular, modular and completely digitalized design and production process, the company has made the realization of a customizable dream house easy.

2015 11-20 Netherlands

Design & planning

Building design

[www.sustainerhomes.nl](http://www.sustainerhomes.nl)
**Tvilight**

Tvilight’s mission is to contribute to the creation of sustainable and connected cities. The company supports this mission by offering sensor lighting solutions that allow cutting down the energy costs and creating a livable and safe environment for urban citizens. Through a combination of physical products and control/management software, Tvilight offers end-to-end solutions for the control and management of street lighting, thereby reducing energy and maintenance costs as well as significantly reducing CO2 emissions.

[www.tvilight.com](http://www.tvilight.com)

---

**Wellsun**

Wellsun has developed the Lumiduct, a dynamic, multi-functional solar shading system. It generates energy and improves the indoor climate of the building. In this way, the energy demand of glass architecture can be cut in half. Through the implementation of LEDs in the solar panels, the façade can also be used as a media screen.

[www.wellsun.nl](http://www.wellsun.nl)

---

**IES**

IES supports resource-efficient, healthy and cost-effective built-environments. The company simulates and analyses data to give those involved in their creation and management the information needed to make smarter, more sustainable decisions with confidence. Products include virtual environments and BIM software.

[www.iesve.com](http://www.iesve.com)

---

**Reengen**

Reengen tracks the real time condition of energy assets, monitors energy performance of facilities and obtains data driven notifications from anywhere and anytime. With their expertise in industrial IoT, cloud technologies and big data analytics, Reengen saves energy, reduces carbon footprint and enhances operational efficiency.

[www.reengen.com](http://www.reengen.com)
**Pavegen** has developed a flooring tile that converts the wasted kinetic energy from footsteps into renewable electricity. Each tile is equipped with a wireless application program interface (API) that transmits real-time movement data analytics, whilst directly producing power when and where it is needed. Pavegen is also able to connect to a range of mobile devices and building management systems. The company is shifting to become a permanent and commercial smart-flooring solution.

**Vivid Technology** is an innovation that delivers up to 90% energy reductions and operational efficiencies through intelligent connected IoT technology. Vivid’s MATRIXX® is a cloud-connected, IoT light system and analytics platform that creates industrial Smart Buildings and IoT connected spaces. It is a site-wide communication infrastructure that creates a building nervous system, connecting sensors, external inputs and other systems on site. MATRIXX® captures and converts site specific data to deliver deep insight to drive efficiencies.

**BeeBryte** is leveraging artificial intelligence to get commercial buildings, factories to consume electricity in a more efficient way while reducing carbon footprint. Their software-as-a-service minimizes utility bills with automatic control of heating-cooling equipment (HVAC) while maintaining temperature within an operating range set by the customer. Based on weather forecast, occupancy and energy price signals, we generate up to 40% savings.

**Anvita Engineering** provides energy optimisation and clean technology solutions to customers in the Asia-Pacific region, in particular related to air-conditioning, refrigeration, solar and food-waste-to-energy solutions. Having years of pan-Asia experience, they provide value-added support to customers in this fast-growing region of the world.
Sustainable Innovations
Virtual reality and 3D mapping replicates an environment using computer and/or drone technology. The ultimate goal of virtual reality is to create a user experience as real as possible. In the Real Estate sector, virtual reality and 3D mapping opportunities arise in the field of brokerage for example. Designers and developers can also benefit from virtual reality and 3D mapping because it assists them with translating design into reality. And with current restrictions on or fear of physical meetings, VR might be the perfect solution. In addition, drones can map existing Real Estate and its environment which is then translated into 3D virtual reality or into valuable data about the property.
**Invent Dev** is a tech company that enables house builders to showcase the floor plans for the building virtually with the help of 3D picture renderings, flythrough videos, 360-degree tours, and virtual reality, enabling them to sell homes faster. The firm also offers those services to those looking to improve their homes through Invent Showrooms.

www.inventdev.com

**Cityzenith** has developed the Smart World Pro platform, which was created for the people responsible for designing, constructing, and managing large-scale building projects, properties, and real estate portfolios or cities. Users leverage our digital twin solutions to easily aggregate, query, visualize, and analyze all their data in a single 3D dashboard uniquely crafted to suit their needs.

www.cityzenith.com

**Stambol Studios** offers a virtual/augmented reality (VR/AR) studio that specializes in hyper-realistic immersive experiences. The company provides architectural visualization services, allowing potential clients to judge their homes before construction.

www.stambol.com

**Archisketch** automates all the laborious works from measuring, modeling to planning so customers can start interior designing their own space on Archisketch’s platform. Designed to bring interior-design-game up a notch, Archisketch allows anybody to interior design without breaking the bank. Paired with their free cloud-based proprietary software, Archisketch measures and generates professional 2D & 3D floor plans and 3D visualizations, VR, of your space.

www.archisketch.com
**GeoCV** captures spaces in 3D using a phone. GeoCV Virtual Open House is a cutting-edge 3D+360° virtual tour for existing spaces. Users understand layout from a realistic 3D scan, smoothly walk through the space via high-quality 360° panoramas, and see a floor plan with accurate dimensions extracted from the scan.

- **Year:** 2014
- **Employees:** 21-50
- **Country:** United States
- **Services:** Virtual viewing

**Matterport** has developed an end-to-end 3D media platform that allows anyone to create, edit, and share 3D models of real-world spaces. Users include professionals in a variety of sectors, including real estate, hospitality, architecture, engineering, construction and location scouting. Matterport spaces are easy to share as anyone with a computer or mobile device can have the open house experience from anywhere.

- **Year:** 2011
- **Employees:** 11-20
- **Country:** United States
- **Services:** Virtual viewing

**OpenSpace** is a construction tech company using artificial intelligence to create 360° photo representations of job sites. Builders attach an off-the-shelf 360° camera to their hardhat and walk the site as normal. The company’s 'Vision Engine' automatically maps the images to the drawings.

- **Year:** 2017
- **Employees:** 21-50
- **Country:** United States
- **Services:** Virtual viewing

**OnSiteIQ** is a visual documentation service for construction projects. It enables clients to explore 360-degree imagery — from any device — to monitor building progress, pinpoint issues, and collaborate with teammates.

- **Year:** 2017
- **Employees:** 21-50
- **Country:** United States
- **Services:** Virtual viewing
Handaz aims to bridge the gap between technology and the Architecture, Engineering and Construction industry, by providing the option to transform 2D CAD drawings into 3D BIM models. Their ultimate aim is to facilitate increased productivity and quality, while reducing time and cost of the overall process.

Handaz

Group Builder offers software to combine building data models (BIM), a visual web-based interface, and a dynamic 3D/VR/R world into a seamless whole. These options combine into a BIM powered real estate project management software with a configurator, visualizations, and defect management.

Group Builder

Sova3D develops 3D map web applications for collaborative town planning, building permission handling, and construction project visualization, by combining 3D Building information modelling (BIM) information with 3D City Information.

Sova3D

Immersal develops and markets a technological solution that creates AR experiences that merge digital and physical realities for consumers, industrial use, ad campaigns, and more, by mapping real-world spaces with a mobile device and augmenting them with digital content. In short, the Immersal AR Cloud SDK is a tool for programmers enabling them to develop AR in any app.

Exalt3D is a company specializing in 3D for real estate. The company will offer solutions for virtual visits, home-staging or digital models and BIM. In short, the services of the start-up will encompass all services of 3D representation that we find in real estate. The start-up relies notably on the cloud to facilitate the transfer and sharing of documents.

REALIZ3D is an expert in the creation of real-time 3D models for residential, commercial real estate programs and for the development of territories. From CAD plans and BIM models, our teams create interactive, immersive and aesthetic 3D software for the design, promotion and management of real estate assets.

Syslor provides augmented reality solutions for networks, this allows construction workers to see buried networks while digging. The software is available on smartphones and tablets and offers both 2D and 3D solutions aimed at improving workers safety and increase time efficiency.

The tool developed by Snapkin allows real estate professionals with a 3D scanner to automatically create a 3D and / or 2D representation based on a scanned point cloud. The solution will retrieve the information from the scanner and make a 3D model that the professional will be able to reuse on most software sector.
**WosomTech** is a real estate startup that has positioned itself on the issues of BIM, 3D models and augmented reality in the construction and sales process. Specifically, the startup has developed tools that can instantly generate 3D and 2D plans from your phone. It has also implemented an augmented reality tool available as a white label to help brands market their goods.

![WosomTech](image)

**Beyond Visual** enhances client experience by creating photo-realistic 3D contents. They deliver a presentation tool to premium property developers to showcase and sell new build properties at the pre-completion stage. Clients can explore and experience the development and its surrounding area, such as a balcony view, without having to actually go there. Moreover, database integration enables live, up-to-date searching and filtering of available units based on price, size, floor plan etc.

![Beyond Visual](image)

**BIM-Y** has developed a web platform to assess the quality of as-built documentation for existing buildings and during the construction phase to simplify the hand-over process. To this end, BIM-Y uses 3D point clouds technology to offer a digital twin solution for clients’ buildings.

![BIM-Y](image)

**Renovai** is an AI based, virtual interior designer for e-retailers. It provides a full interior design experience and abilities, from staging every given space to designing and choosing the perfect furniture based on the customer’s taste, needs and existing furniture. It will enable a free and immediate professional interior design service, making interior design accessible and affordable for all.

![Renovai](image)
**Ninsar** develops various products in AR and PropTech, including indoor navigation in AR, personal AR-guide for autonomous interactive and personalized tours, 360degrees 3D tours, digital twin for buildings and property management tools. Their goal is to make customer’s experience more fun, interactive yet at the same time giving new opportunities for offline retailers to attract customers utilizing benefits of digitalization.

**FIMBLE** organizes property information and makes it usable, accessible and future-proof. This is performed by digitalizing and/or 3D-scanning properties. Moreover, FIMBLE supports the usage of a 3D information model (BIM). Utilizing the newly acquired information, the real estate portfolio is better understood. This offers a chance to adapt maintenance plans, NEN, escape routes and rental-drawings.

**VR Concept** develops software for VR environment applications to solve industrial challenges. The company provides users with the easy VR application for collaboration and visualization of CAD models, which can be scalable by big manufacturers.
Innobrix is an online communication and configuration platform for the residential construction sector and consumers alike, transforming BIM designs into interactive virtual homes and allowing residential construction professionals to optimally integrate the consumer in a newly improved digital construction process. This way, Innobrix creates an optimal ‘what you see is really what you get’ customer experience which reduces communication errors, failure factors, costs and constructional waste.

Leap3D provides an as-built 3D BIM model. The company measures and models the existing situation in 3D so that you have an as-built 3D model of your building, factory, installation, ship or environment. Leap3D’s strength lies in 3D laser scanning and modelling of existing situations (scan to BIM or scan2BIM) for the benefit of projects. With this clients realize a reduction in failure costs, reliable starting points and a shorter construction time.

VERO Visuals is a one-stop agency for real estate developers and architects providing branding, visual and digital data-driven solutions. The company provides a full range of visualization, marketing and IT services for real estate companies. From still images for all project stakeholders to sophisticated digital strategies designed to capture and convert wider audiences.

Smart2VR is a CMS platform to publish and distribute your Virtual Reality content quick and easy in your own branded VR app (iOS and Android), on your website and on the Samsung Gear VR. Upload and manage your VR content (images and videos), personalize your VR app easily and quickly by adding your own logo, color scheme and contact information and share your VR experience with your customers and relations.
VR & 3D Mapping

**Overstruct** is a PC software to create architectural virtual reality walkthroughs automatically and easily, from existing 3D project files. Overstruct uses your existing project files, configuration and exports high quality simulations working even on mobile and web platform.

- **Year**: 2017
- **Size**: 5-10
- **Country**: Turkey
- **Category**: Design & planning, Virtual viewing
- **Website**: [www.overstruct.com](http://www.overstruct.com)

**Fracture Reality** is a HoloLens focused partner providing bespoke building visualizations as well as tailored solutions with a focus on visualizing CAD data for buildings, cities, large facilities and developments. Their focus is to use expressive, collaborative tools offering live visualizations of client data, presented in aesthetically refined ways on a variety of concurrent displays (HoloLens/VR/ Phone/Tablet/Projector).

- **Year**: 2016
- **Size**: 5-10
- **Country**: United Kingdom
- **Category**: Property and facilities management, BIM and Digital Twin
- **Website**: [www.fracturereality.io](http://www.fracturereality.io)

**TrueSite** is an all-in-one visualization solution that assists developers and agents to sell tomorrow’s property, today.

- **Year**: 2016
- **Size**: 21-50
- **Country**: Australia
- **Category**: Transactions and leasing, Virtual viewing
- **Website**: [truesite.io](http://truesite.io)

**Propeller** is an innovation specialized in 3D mapping and data analytics solutions that give worksites the power to measure and manage themselves. With visual tools that everyone can use, Propeller is helping teams on thousands of worksites, to track, inspect, and report on-the-job progress and productivity safely and accurately. Propeller serves construction, aggregates, mining, and waste management industries globally.

- **Year**: 2014
- **Size**: 51-100
- **Country**: Australia
- **Category**: Construction, Virtual viewing
- **Website**: [www.propelleraero.com](http://www.propelleraero.com)
**Skylark Drones** aims to plan and monitor infrastructure construction, by generating high resolution survey maps for accurate land acquisition analyses and detailed project reporting using 4-K videography for near real-time project monitoring. Examples of projects include large scale road infrastructure changes that require accurate planning and monitoring. Their drone solutions address this need by offering authentic real time information.

**Snaptrude** is an AI-enabled rapid modelling platform for real estate. Snaptrude is a solution by Skylark Technologies which solves the design problem by automating digital designing with its intelligence enabled modelling and design platform. This platform applies an architects’ Building Information Modelling (BIM) approach from the concept design stage onwards. Snaptrude automatically transforms hand sketches into an accurate 2D drawing and provides the technical support for conversion of 2D drawings to a 3D model.

**Buildmedia** is an interactive digital display suite that showcases and sells unbuilt real estate, developed by Buildmedia. Realspace brings off-the-plan sales & marketing in-line with the needs of today’s home buyer by changing the show suite experience, providing real estate agents with powerful 3d visualisation tools to emotionally engage with buyers. Realspace drives emotional connections between homebuyers & property developers by showing every future option, developing trust & understanding of the unbuilt development.

**Spacely** offers cloud software that allows customers to easily create, edit and manage VR web contents using photos taken with a 360 degree camera. The company’s solution is frequently used within the real estate industry for advertisement purposes of sale and rental of properties.
Elementals Studio has developed a Property Showroom platform to connect property buyers, sellers and designers using augmented reality and 3D. This allows for optimization in every interaction with prospective clients, with the capability to provide limitless information about property features. Accessible through any mobile device, its features include viewing of the entire real estate, augmenting the design of actual physical properties using AR and touring in 3D.

www.elementalsweb.com

Graffiquo offers a real 3D digital representation of physical assets on large expanses of land using photogrammetry, feature recognition (or machine learning), business applications and virtual reality engine technologies for data capture, mining and physical representation.

Graffiquo’s solution collects data from the internet of things (IoT) sensors, equipment, and business systems, and show them on this virtual replica in real time, providing stakeholders on-the-run easy access for visualization and analytics.

www.graffiquo.com

Silver Wings provides end-to-end solutions for virtual reality, augmented reality and mixed reality. Silver Wings is hardware-agnostic and delivers turn-key solutions for the industries of real estate, gaming, automobile, and more, taking care of every aspect of the project and working with partners where needed.

“As most sectors, also the Real Estate and construction sector is in the middle of a great transformation. A transformation driven by the abilities digital innovations offer, but also by the demands of critical stakeholders. Understanding innovative capabilities, preparing your organisation to (culturally) embrace innovation and re-design strategy and business models should be priority on board agenda’s”

“As for me, PropTech is part of a much broader trend, that of the digitalization and modernization of the Real Estate sector. PropTech companies, by challenging the status quo, help the Real Estate industry to become more innovative, digital and customer-focused, all of which are essential in the 21st century.”

“With the social distancing required by the current sanitary crisis, technology will bring for sure new solutions. It will be very important in flexible offices and the new ways of working, to maintain human relationships in companies. It will be also very important in the retail business with what we call the phygital industry.”
COVID-19 itself can be considered as a sensitivity test for the developed societies and highlighted several weaknesses of the social and economic structures we live in. [...] The Real Estate sector is an industry itself, producing buildings to work and live in. The role for PropTech is to only to help saving energy, materials, labor used for the production, but PropTech is also responsible to participate in creating the built environment more human and less “expensive” in global terms.

“Construction and Real Estate are among the last sectors to be transformed by technology. I think industry leaders have finally recognized the imperative and are beginning to take significant action. Global investors and corporations are definitely also seeing the potential, given recent peak investment levels in sector firms.”

“Israel is a well-known front line hi-tech country, in the last year it seems that the PropTech sector has accelerated significantly. A lot of new and creative solutions were created, and it looks like to sector heads to a more accelerating growth in the coming years.”

“Singapore has increased the commitment towards sustainability with broader and deeper policies for the future of the nation. The Real Estate and Construction sector contributes to this through decarbonisation efforts throughout the lifecycle, labour policies and the building of a digitally talented workforce. The demand from the users has also shifted with greater awareness and shall bring about a seismic change to the landscape in the coming years.”
"Technology and sustainability are an excellent combination to address ESG concerns, resulting in a win-win outcome for real estate participants, consumers and other key stakeholders. Key innovations, including the virtualization of building design/site visits, digitization of transactions, more sustainable building materials and the sharing of equipment and services, will all decrease real estate’s environmental footprint."

"The PropTech hype in Germany has changed into a more stable relationship between real estate companies and vendors. The major requirements for projects have changed from short-term MVPs and prototype projects to long-term partnerships, which make them more reliable and also more complex. PropTech now have to prove their ability to integrate complex portfolios and assets in their systems."

"PropTech can be used in every sector of Real Estate, from construction to financing. And as technology and ideas continue to expand, PropTech combines concepts and innovative thinking. It provides products that assist on both sides of the sale, builds a business case for market newcomers, supports distribution channels, and raises awareness among users surrounding the market."

"Times of crisis will always be a major instigator for quick and rapid innovation. In the aftermath of COVID-19, we expect many CEOs in the industry to seek a leaner business model, without compromising on their core attributes. Particularly in Australian construction, tech-enabled services and an efficient data-led approach will prove to be major differentiators on the road back to profitability."

"PropTech can be used in every sector of Real Estate, from construction to financing. And as technology and ideas continue to expand, PropTech combines concepts and innovative thinking. It provides products that assist on both sides of the sale, builds a business case for market newcomers, supports distribution channels, and raises awareness among users surrounding the market."
“Real Estate companies have been on a slow journey to identify more efficient ways to capture, analyze and leverage data to improve business operations and gain competitive advantage. However, most recently PropTech has become a main focal point for Real Estate in all sectors as the need for remote, and back and front office efficiencies become more of a necessity than a luxury due to the recent impact of COVID-19.”

“Today, more than ever we are more conscious of what we consume, what we do or where we live. People, planet and profit will challenge new innovations in the Real Estate sector. The companies that are not taking those crucial topics into account all together, do not have the potential for sustainable growth and contribution to our society. I am positive that innovation within our industry could tremendously help us move forward to a sustainable future.”

“There is a growing interest in Luxem-bourg for PropTech solutions and different initiatives are underway. We expect an acceleration of PropTech solutions following the COVID-19 crisis. Furthermore, Luxem-bourg being a Fund environment could benefit from alternative financing models powered by technology, such as tokenization.”

“The current events around COVID-19, have changed our way of thinking for a number of different things and certainly, in the aftermaths of the pandemic, technological advancement in Real Estate will be enhanced to address topics like, asset management, space management, health and safety, efficient flows and more.”
Editor’s Perspective

“Technologies are adapting and advancing at a rapid pace, and our global connectivity is ever-increasing, leading to disruptions and transformations in many aspects of our lives.

In my opinion, this gives us incredible flexibility and adaptability to learn from each other and contribute to business, but also societal needs. Hence, I believe that being on top of these innovations, evaluating the challenges and opportunities, and eventually integrating them in strategy, will be (and should be) key to success of Real Estate businesses in the long-run.

It remains exciting to see that this wave of innovations within the sector is happening worldwide, and we’re pleased to capture a share in this overview and hopefully spread for better!”

““Innovation has become the cornerstone of the Real Estate and Construction sector globally, while being driven by the needs of local markets. This year’s edition underpins the broad diversity of innovations and I expect this to further accelerate through the use of (new) technologies.

We are only at the start of a technological innovation wave in the Real Estate sector and the future of Real Estate seems to be a bright one. We commit to keeping you informed!”

Introduction Global PropTech
Global PropTech is the first global innovation platform for the construction and Real Estate sector. The platform includes Global PropTech Online, Global PropTech Leaders and Global PropTech Channel. Global PropTech was founded by Wouter Truffino in 2018.

What does Global PropTech do?
Global PropTech brings together innovative corporate Real Estate and the very best PropTech companies on a global scale to facilitate joining forces and cooperation in creating a better built environment by embracing technology. The platform focusses on developing insights, sharing knowledge between different countries / SARs and matchmaking through three key formats:

• **Global PropTech Online:** a quarterly online conference offering cutting edge PropTech innovation insights, products, and services. From behind their computer, Real Estate professionals from all over the globe can attend top keynotes and interactive round tables. PropTech thought leaders and influencers share insides and the best start-ups and scale-ups get a chance to promote their product or solution to a global market.

• **Global PropTech Leaders:** a highly exclusive network for corporate Real Estate leaders to share knowledge on how the Real Estate industry is being renewed through PropTech. The first Global PropTech Leaders event took place on 13 March 2019 at the MIPIM in Cannes.

• **Global PropTech Channel:** a video streaming channel aiming to inspire global Real Estate professionals through content created at Online and Leaders events such as keynotes.

**Partners and members:** KPMG (founding partner), Spacewell, WeWork, VTS, Disruptive Technologies, Spaceti, Physee, CubiCasa, PlanRadar, BuildingMinds, Smartpixel.tv and EstateGuru.
