Your Business in Armenia

kpmg.am

Ministry of Economy
Republic of Armenia
I am pleased to introduce an Investment Guide: “Your Business in Armenia.” This publication is a part of a wider Government effort aimed at the attraction and promotion of investments in Armenia.

Significant reforms have been conducted and several weighty developments have been achieved during the last decade in order to make Armenia a more favorable destination for foreign investments, including both reforms of the legal system and practical steps in easing business processes.

The principal added value of this publication is to introduce the potential investor to the peculiarities of the Armenian investment and business climate as well as to disclose the possible investment opportunities. The creation of the first free economic zone in Armenia has marked the start of a new stage for the attraction of investments. An investor can find here all the information for the set up of a new business in Armenia and making it successful.

I am confident that this publication will not only improve the understanding of business environment in Armenia, but will also encourage the use of the valuable knowledge accumulated here for new businesses representing different sectors of economy in the context of broader approaches to expand opportunities for potential investors.

Today the “voices” of businesses should be heard, their creativity engaged, and their rights respected while dealing with investment attraction issues. With this publication let us one more time commit to supporting innovative and business-led solutions for building a world of productive businesses that is a gateway to a progressively better future.
We are pleased to introduce you to the new publication issued by KPMG Armenia in cooperation with the Ministry of Economy of the Republic of Armenia “Your Business in Armenia.” The publication includes basic information for foreign businesses and individuals who are thinking about or intend to make an investment in Armenia. It includes general information about the country, economy, culture, legal and taxation requirements related to investments, government plans and priorities for the development of Armenia, as well as stories of some successful businesses – foreign companies or individuals who chose to invest in Armenia.

Armenia has started to recover after the financial crisis, which had a significant negative impact on the economy of the country. A number of sectors have shown significant growth during the last few years, including infrastructure, financial services, technologies, construction and mining. In particular there has been a significant increase in the investments from foreign companies and international financial institutions. The first Free Economic Zone was opened in Armenia in 2012 with favorable taxation terms for businesses.

It is worth mentioning that Armenia has started receiving financing from International Financial Institutions (WB, EBRD, KFW etc) to assist Armenia in post-crisis recovery in 2012 and 2013 (total over USD 200 mln). The financial resources are targeted on the improvement of tax and customs services, management of economic growth, enhancement of tax administration effectiveness and promotion of investments in agriculture. In addition these funds are intended to be utilized for the rehabilitation of rural roads, irrigation infrastructures and drinking water facilities as well as for the implementation of healthcare and education programs and international cooperation.

We believe that Armenia will continue its growth and become an increasingly attractive country to invest in. Notwithstanding the political tensions in terms of the relations with some neighboring countries, Armenia continues to move forward towards growth and prosperity.

Sincerely yours,

Andrew Coxshall

Climate: Continental
Favorable Environment for Investment

Current Investment Climate

Armenia has a positive and open attitude towards foreign investments. The reforms related to the economy and infrastructure, macroeconomic stabilization and economic growth have contributed to the development and implementation of the country’s foreign investment policy.

The main principles of the investment policy may be summarized as follows:

- A liberal attitude towards foreign investments
- An “Open door” investment principle
- Protection of investors’ rights
- Provision of equal conditions for foreign and domestic investors.

There are virtually no restrictions concerning the sectors in which a foreign investor may invest, except in certain national defense-related sectors. A prior approval for making an investment is generally not required, except for the investments made in regulated establishments, such as banks, investment companies and certain public utilities.

Government Economic Policy

The direction of the Government’s economic policy will be the creation of a diversified, export-oriented and highly competitive economy. In this context, the Government will mostly emphasize the formation of advanced industry, continuous improvement of the business and investment climates, increased access to foreign markets using the effective tools of trade settlement, enhancement of regional cooperation through regional institutions, extension of applications of knowledge and innovations in separate branches of the economy of RA.

With regards to the improvement of business climate, the Government will continue facilitating administrative procedures for businesses, reducing unnecessary state intervention, implementing corporate governance culture, promoting the development of small and medium enterprises, implementing a balanced tax and customs policy (reducing tax reporting and tax payment frequency, simplifying and specifying customs formalities).

A major component for further improvement of the investment environment will be the review of a targeted investment policy, including the improvement of legislation relating to foreign investments, through disclosure of the investment potential and competitive advantages of the Republic of Armenia.
Economic Drivers

Armenia has had positive annual real GDP growth rate during the last 5 years, except in 2009 when due to the economic crisis the real GDP decreased by 14%. The compound annual growth rate of real GDP for the years 2007 to 2011 has been 2.2%. In the period January-June 2012 GDP grew by 6.6% compared to the same period of 2011. According to the IMF, the real GDP is expected to grow by 4.2% in 2013. Later starting from 2014 to 2016 the IMF expects Armenia to have 4% annual growth rate in real GDP.

* The data relates to the period January-June 2012.

Source: NSS

The main contributors to the 2011 real GDP growth were agriculture (2.4%) and industry (2.3%), whereas construction had the lowest contribution (-2.2%).

Overall structure of GDP has been stable during the last five years; however construction share in nominal GDP has been decreasing during the last 3 years after a remarkable growth in 2005-2008. On the other hand the wholesale and retail trade sector has been experiencing stable growth in recent years.
FDI in Armenia has had an increasing balance till 2008 reaching USD 1,001 mln. Starting from 2009 FDI had a substantial decrease over the years and decreased to USD 631 mln in 2011. In January-June, 2012 FDI reduced by 59.7% compared to the same period of 2011 and amounted to USD 147 mln.

The average annual inflation rate for Armenia in 2007-2011 was 6.4%. The average inflation rate in the period January-September 2012 was 2.3%.

During the last 5 years the export from Armenia increased by 4% in average annually, while the import to the country increased by 6%, resulting the growth of the negative trade balance. The main countries from where Armenia imports are Russia, UAE, Georgia, Iran, and Ukraine. Armenia mainly exports to Russia, Germany, Bulgaria, the Netherlands and Iran.
Legal forms for establishing a business

There are certain legal options for establishing business (commercial activities) in the Republic of Armenia:

- sole entrepreneurs;
- business partnerships (full partnerships and trust partnerships);
- limited liability companies;
- supplementary liability companies;
- joint-stock companies (open and closed);
- cooperatives;
- branches.

Representative offices of foreign companies can be established in Armenia for the purposes of representation and protection of the rights of its founding company but are not entitled to perform commercial activities.

Incorporation of organizations and sole entrepreneurs

Legal entities, their separate subdivisions (branches and representative offices) and sole entrepreneurs are subject to state registration in the Republic of Armenia. State registration includes also registration with the tax authorities. The one-stop shop principle is applied in the process of state registration (including registration of the firm name, state registration of the company itself and registration with the tax authorities). The required documents can be submitted either in hard copies or electronically.

The registration of commercial entities is made immediately (if documents are submitted electronically or approved templates of the required documents are used) or within 2 working days (in other cases). State duty for registration of a commercial legal entity is AMD 17,000 (approximately USD 42), branch and representative office is AMD 12,000 (approximately USD 30).
Foreign investment legislation

The Law “On foreign investments” sets forth the rights, guarantees and privileges for foreign investors, who can make their investment in various forms, such as a joint venture or the establishment of a wholly-owned subsidiary.

The Law contains a grandfather clause, which allows foreign investors to apply the investment legislation, effective for a five-year period from the moment of making the investment.

Investments made by foreigners shall not be nationalized or confiscated. Seizure of property can be applied as an exclusive measure if authorized by a court and where a state of emergency has been declared by the Government.

Seizure of property is subject to full compensation. Foreign investors are also entitled to compensation of damages and losses (including lost profit) resulting from unlawful acts of state authorities or state officials or improper performance of their duties.

Goods (from the list established by the Government), which are imported by foreign investors with the purpose of paying up shares or the charter capital, are exempt from customs duties. However, if these goods are disposed within 3 years after their import, the customs duties shall be paid.

Insurance of bank deposits

The bank deposits of individuals are insured in the Republic of Armenia. The limit of an insured deposit amount in a bank is AMD 4 mln (approximately USD 10,000) – for deposits in Armenian currency and AMD 2 mln (approximately USD 5,000) for deposits in foreign currency.

Insurance

There is one type of mandatory insurance in Armenia: motor vehicle liability insurance. Other types of insurances are not mandatory.

Anti money-laundering and terrorism financing legislation

Armenia has detailed regulations on anti money-laundering and to combat terrorism financing. The Central Bank of Armenia exercises supervision on compliance with the legislation and imposes sanctions in the field to combat money laundering and terrorism financing.

Currency regulation

As a general rule transactions in Armenia have to be made in Armenian drams. There are several cases (mainly, transactions between resident and non-resident legal entities and sole entrepreneurs) where use of foreign currency is permitted.
The judicial system of the Republic of Armenia

A three-tier judicial system currently exists in Armenia:

I. First Instance Courts
   - Courts of general jurisdiction (hearing civil and criminal cases);
   - Administrative court (hearing claims against administrative bodies).

II. Courts of Appeal
   - Civil Court of Appeal;
   - Criminal Court of Appeal;
   - Administrative Court of Appeal.

III. Cassation Court of the Republic of Armenia

In the field of constitutional justice the highest judicial power is the Constitutional Court of the Republic of Armenia.

Note: The judicial precedent is applied in Armenia.

Labor Market

The Labor Code is the main Legal Act regulating employment relations in Armenia. The Code sets forth the main provisions related to employment agreements, collective agreements, length of a working day, rest time, duration of vacations, calculation of salaries and other payments to employees, termination of employment relations, duration and payment for special leave, etc.
In general, the following state and municipal taxes are defined in the Republic of Armenia:

**State taxes:**
- Profit Tax
- Income Tax
- Excise Tax
- Value Added Tax.

The law may specify presumptive payments or license fees as a replacement to the above mentioned taxes.

**Municipal taxes:**
- Property Tax
- Land Tax.

**Profit Tax**

*Taxpayers:* Profit Tax in Armenia is payable both by residents (organizations established in the RA) and non-residents (organizations created outside the RA and their subdivisions registered in Armenia).

*Taxable profit:* Profit Tax is calculated on the basis of the taxable profit representing the positive difference between the total income from the sale of goods, services, assets and other property, less total expenses which are deductible by law.

*Profit tax rate:* For residents and registered non-residents the rate of Profit Tax is currently 20% of the taxable profit.

Reporting period: Taxpayers have to submit their Profit Tax return to their local tax authority before April 15 of the year following the reporting year. The amount of the Profit Tax should be transferred to the State Budget not later than April 25 of the year following the reporting year. The reporting year end is 31 December for all companies. When establishing the amount of the Profit Tax liability, the income and expenditure are calculated on the accruals basis.

---

1 Based on the legislation effective 01 November 2012.
The key Profit Tax implications for resident and non-resident registered entities are presented in the table below.

<table>
<thead>
<tr>
<th>Profit Tax</th>
<th>Residents</th>
<th>Non-residents registered in Armenia</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Tax object</strong></td>
<td>Taxable profit received on the territory of Armenia, as well as outside Armenia.</td>
<td>The taxable profit derived only from Armenian sources.</td>
</tr>
<tr>
<td><strong>Tax methodology</strong></td>
<td>The taxable profit is the positive difference between income recognized for taxation purposes and allowances established by law (expenses, losses, other allowances).</td>
<td>The taxable profit can be established: 1. as the positive difference between income recognized for taxation purposes and allowances established by law (expenses, other allowances); or 2. using one of the indirect methods defined by legislation (proportion of revenue, proportion of expenses, proportion of number of staff of Armenian subdivision in overall revenue, expenses, number of staff of non-resident)</td>
</tr>
<tr>
<td><strong>Tax losses</strong></td>
<td>Tax losses that arose during the last 5 years are deducted when calculating the taxable profit.</td>
<td>Losses are not deducted.</td>
</tr>
<tr>
<td><strong>Dividends received</strong></td>
<td>Dividends received are deducted from the gross income when calculating the taxable profit.</td>
<td>Dividends received are taxed.</td>
</tr>
<tr>
<td><strong>Prepayments</strong></td>
<td>Prepayments are made on a quarterly basis in the amount of the 18.75% of the previous year actual Profit tax, if the previous year actual Profit tax exceeded AMD 500 thousand (USD 1,250).</td>
<td>Prepayments are made on a half-annual basis in the amount of 1/4 of the previous year actual Profit tax, if the previous year actual Profit tax exceeded AMD 2 mln (USD 5,000).</td>
</tr>
</tbody>
</table>
In case the non-resident company is not registered in Armenia, taxation of income derived from Armenian sources is performed by a tax agent at the following rates:

<table>
<thead>
<tr>
<th>Type of Income</th>
<th>Amount of the Profit Tax</th>
</tr>
</thead>
<tbody>
<tr>
<td>Insurance compensation, reinsurance payments and income received from freight</td>
<td>5 percent</td>
</tr>
<tr>
<td>Dividends, interests, royalty, income from the lease of property, increase in the value of property and other passive income (with the exception of the income received from the freight) as well as other income received from Armenian sources.</td>
<td>10 percent</td>
</tr>
</tbody>
</table>

**Double Taxation Treaties:** Currently Armenia has signed Double Taxation Treaties with the following countries: Austria, Belarus, Belgium, Bulgaria, Canada, China, Croatia, Cyprus, Czech Republic, Estonia, Finland, France, Georgia, Germany, Greece, Hungary, India, Iran, Italy, Kazakhstan, Latvia, Lebanon, Lithuania, Luxembourg, Moldova, the Netherlands, Poland, Qatar, Romania, Russia, Spain, Switzerland, Syria, Thailand, Turkmenistan, Ukraine, the United Arab Emirates, the United Kingdom and Ireland.
Value Added Tax

**VAT payers:** VAT payers are individuals and legal entities that carry out economic (entrepreneurial) activities and perform the VAT taxable transactions on the territory of the RA.

**Threshold:** If during the previous calendar year the taxable turnover of transactions on supply of goods, provision of services and free (or partially free) realization has not exceeded AMD 58.35 mln (USD 145,000), the person will not be considered as a VAT payer. The Law also establishes the scope of the persons to whom the above threshold of AMD 58.35 mln (USD 145,000) does not apply.

**VAT taxable transactions:**
- Delivery (supply) of goods for compensation;
- Rendering of services for any form of compensation;
- Free (partially free) delivery of goods or provision of services;
- Importation of goods under the “Import for free turnover” customs regime.

**VAT rate:** The rate of VAT is 20 percent of taxable turnover.

**Privileges:** The RA Law “On VAT” specifies the types of transactions that are not taxable by VAT (these transactions are out of the scope of VAT), the types of activities that are exempt from VAT (insurance, most banking and financial activities, scientific and research works, sales of newspapers and magazines, procurement and supply of goods and provision of services arising from loans and grants made by international organizations for the realization of programs in Armenia, etc.), as well as transactions for which zero rate of VAT is applied. The zero rate of VAT is, in general, applied to the exportation of goods and services (works) from the territory of Armenia. The main difference between zero rating and exemption is that in the case of exemption the VAT paid to the supplier is not compensated.

**Reporting period:** Every quarter (or every month, if the taxable turnover of the previous year exceeded AMD 100 mln (USD 250,000), VAT taxpayers are obliged to submit VAT reports to tax authorities and pay VAT by the 20th day of the month following the reporting period.

**Tax Invoices:** VAT payers are obliged to issue tax invoices for goods supplied and services rendered. Starting from January 1, 2011 tax invoices should be issued either electronically or by completing the paper forms of tax invoices obtained from the tax authorities.

**E-Reporting:** Starting from January 1, 2012 the companies and individual entrepreneurs which by the results of the previous reporting year have VAT taxable turnover of more than AMD 58.35 mln (USD 145,000) (exceeding the threshold of VAT) must submit tax returns to the tax authority electronically.
**Income Tax and Mandatory Social Security Payments**

Please note that from 1 January 2013 a new unified income tax rates will apply (see below).

**Income Tax**

*Tax payers:* In Armenia Income Tax is paid by RA resident and non-resident individuals.

Residents are the persons who have spent in Armenia 183 days or more in Armenia in any twelve month period starting or ending in a tax year, or whose vital interests are located in the RA (home, family, property and business), irrespective of the citizenship.

*Tax object:* For RA residents the tax object is taxable income received in Armenia and outside of Armenia, non-residents will have an Income Tax liability solely on income received from Armenian sources.

*Types of income which are subject to Income Tax:* Wages and salaries, interest, income from donations and assistance (unless specifically exempt), royalties, rental income, benefits in kind, income from entrepreneurial activities received by soul entrepreneur, etc.

*Taxable income:* The taxable income is the positive difference between the gross income of the taxpayer and the deductions made in accordance with the provisions of the RA Law “On Income Tax”.

**Deductions**

*Personal allowance:* Currently the personal allowance deductible from the taxable income is AMD 32,500 (USD 81) per month. The foreign citizens and persons without citizenship do not exercise this right of deduction during the year. They will acquire such a right if they are treated as RA residents per the results of the year. In such a case, when submitting an Annual Income Calculation they will make a recalculation to take into account the monthly personal allowances.

---

*Payments for Pension, Employment and Social Security:* When determining the taxable income, the gross income shall be reduced in the amount of mandatory payments on pension, employment and social security made at the expense of the taxpayer (employee).

*Income Tax rates:* The Income Tax rates on wages and salaries of Armenian citizens, foreign citizens and persons without citizenship are:

<table>
<thead>
<tr>
<th>Monthly Tax Base</th>
<th>Unified Tax Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to AMD 80,000</td>
<td>10%</td>
</tr>
<tr>
<td>From AMD 80,000 to AMD 2,000,000</td>
<td>AMD 8,000 + 20% of the amount exceeding AMD 80,000</td>
</tr>
<tr>
<td>Over AMD 2,000,000</td>
<td>AMD 392,000 + 25% of the amount exceeding AMD 2,000,000</td>
</tr>
</tbody>
</table>

Royalties, rental income, income from the sale of property, interest income are subject to Income Tax at 10%, without the personal allowance.

*Tax rates on some types of income received by foreign citizens*

<table>
<thead>
<tr>
<th>Type of Income</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends</td>
<td>0%</td>
</tr>
<tr>
<td>Insurance reimbursements and income from transportation (freight)</td>
<td>5%</td>
</tr>
<tr>
<td>Royalties, interests, lease payments, increase in the value of property and other passive income, as well as other income received from Armenian sources</td>
<td>10%</td>
</tr>
</tbody>
</table>
Individual obligations of Income Tax reporting: The RA residents, per the results of the tax year, have an obligation of submitting the Income Calculation before April 15 of the year following the reporting year with the exception (in particular) of the following cases:

- When income received is taxed by tax agents;
- When income received by the individual, consisted exclusively of the non-taxable types of income (deductible income).

Income Tax reporting by tax agents: An income tax report is submitted by tax agents (employers) on a quarterly basis.

Mandatory Social Security Payments

Payers: Employers and employees are obliged to make social security payments from salaries and wages and other payments deemed equal thereto. The Law also prescribes that organizations using the work of individuals on the basis of service contracts are obliged to make mandatory social security payments at the rates established for employers.

Employers are responsible for withholding amounts payable by employees and for paying the withheld amounts, together with their liabilities, to the State Budget.

Rates: When accruing income on salaries and wages and other payments deemed equal thereto the social security payments should be calculated at the following rates:

**Social Security Payments of employees**

<table>
<thead>
<tr>
<th>Monthly gross income</th>
<th>Mandatory social security payments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to AMD 2,000,000</td>
<td>3%</td>
</tr>
<tr>
<td>Over AMD 2,000,000</td>
<td>AMD 60,000 + 8% of the amount exceeding AMD 2,000,000</td>
</tr>
</tbody>
</table>

**Social Security Payments of employers**

<table>
<thead>
<tr>
<th>Monthly gross income</th>
<th>Mandatory social security payments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to AMD 20,000</td>
<td>AMD 7,000 flat</td>
</tr>
<tr>
<td>From AMD 20,000 to AMD 100,000</td>
<td>AMD 7,000 + 15% of the amount exceeding AMD 20,000</td>
</tr>
<tr>
<td>Over AMD 100,000</td>
<td>AMD 19,000 + 5% of the amount exceeding AMD 100,000</td>
</tr>
</tbody>
</table>

Reporting: The report on mandatory social security payments is submitted by tax agents (employers) on a quarterly basis.

Changes started from 1 January 2013

Starting from 1 January 2013 the new RA Law “On Unified Income Tax” adopted on 22 December 2010 will enter into force. The Law will replace the RA Laws “On Income Tax” and “On Mandatory Social Security Payments” (these laws will be repealed on 01.01.2013). The new Law mainly incorporates the current provisions of the above two laws, however there are also some changes related to the procedure of calculation and payment of unified income tax. The following rates of unified income tax will apply:

**Social Security Payments of employees**

<table>
<thead>
<tr>
<th>Monthly Tax Base</th>
<th>Unified Income Tax Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to AMD 120,000</td>
<td>24.4%</td>
</tr>
<tr>
<td>From AMD 120,000 to AMD 2,000,000</td>
<td>AMD 29,280 + 26% of the amount exceeding AMD 120,000</td>
</tr>
<tr>
<td>Over AMD 2,000,000</td>
<td>AMD 518,080 + 36% of the amount exceeding AMD 2,000,000</td>
</tr>
</tbody>
</table>
The adoption of the RA Law on Unified Income Tax is conditional upon the adoption of a funded pension system in Armenia from 2014 which will have voluntary and compulsory components. The purpose of the system is to establish that besides the state pension the employees also receive pension income directly connected to the size of contributions to the pension fund. No tax implications will arise with respect to funded contributions and pension within the scope of compulsory funded pension scheme.

The pension income received within the compulsory funded pension scheme is not taxable by unified income tax. Voluntary funded pension contributions performed by the individual and (or) a third party (including employer) are deducted from the gross income in the amount not exceeding 5% of the gross income of the individual. Pensions received within the scope of a voluntary funded pension scheme will be subject to unified income tax at the rate of 10% without considering deductions established by law.
According to the Law of RA “On Accounting,” all legal entities registered in Armenia, as well as branches and representative offices of foreign legal entities must carry out financial accounting and prepare general purpose financial statements.

The Ministry of Finance adopted Accounting Standards of the Republic of Armenia (ASRA), which was based on IFRS effective as of the end of 2000, with minor changes. However, from 2009 the transition to IFRS was initiated. Mandatory IFRS reporting for banks started from January 2009, for other financial institutions including credit, insurance and investment companies started from January 2010, for the remaining organizations with revenue exceeding AMD 100 mln (approximately equivalent to USD 250,000) started from January 2011.

The reporting currency of the financial statements is the Armenian dram. The full package of financial statements includes:

- The balance sheet;
- The income statement;
- A statement of changes in equity;
- A cash flow statement;
- Notes to the financial statements.

Where the company has a subsidiary, it should prepare consolidated financial statements for the Group.
Directors of the company are responsible for preparing and signing the financial statements. The financial statements are submitted to founders or shareholders of the company and to appropriate state authorities before 15 April following the reporting year.

All companies that have an annual turnover and/ or total assets over AMD 1 billion should publish their audited financial statements before 1 July following the reporting year.

Banks should publish their quarterly financial statement before the 15th of the month following the reporting period and their annual audited financial statements within six months following the reporting year.

If financial statements are not submitted/published on the required dates the companies are fined by AMD 50,000 (USD 125), if the delay exceeds 30 days the non-compliance fee applied amounts to AMD 500,000 (USD 1,250).

**Auditors, audit requirements and standards**

Audit of the annual financial statements carried out by an independent audit company is mandatory for certain companies, such as open joint-stock companies, banks and financial institutions, stock exchange participants, etc. Audit companies are licensed by the Ministry of Finance. In order to receive a license the audit firm should have at least two qualified auditors (this requirement will increase to five qualified auditors starting from January 1, 2013), who obtain a professional qualification from the Ministry of Finance.

Audits are performed in accordance with auditing standards of the RA, approved by the Ministry of Finance, which are based on International Standards on Auditing (ISA). There is also a Law on Audit, which regulates this field.
Armenia has a relatively developed public transportation system, which includes buses, taxi services, vans or “route taxis” in major cities and also a metro in Yerevan. Road and railroad communication exists between all the major regions of Armenia.

Two international airports are in operation: Zvartnots International Airport in Yerevan and Shirak airport in Gyumri. A new international terminal was opened on 1 June 2007. Yet another terminal, built in accordance with the newest international standards, with modern equipment and with high earthquake stability was opened on 26 September 2011. The airport is able to accept any type of aircraft.

Several local and international airlines (such as Armavia (national flagship carrier), Aeroflot, Air France, Austrian Airlines, Czech Airlines, Alitalia and Lufthansa) provide a number of flights to the largest cities in the CIS, Europe, USA, Asia and Australia. Scheduled flights operate to Amsterdam, Athens, Aleppo, Beirut, Dubai, Istanbul, Frankfurt, Kiev, London, Moscow, Munich, Paris, Prague, Rome, Tehran, Vienna, and other major cities in the world.

There are 725 km of railways of general purposes in Armenia. Of the three international railroad connections via Georgia, Azerbaijan and Turkey, only the connection through Georgia to the Black Sea ports (mainly Poti and Batumi) is in use at present. Highways of general purposes within Armenia total 7,704 km and there are connections with the neighboring states with which Armenia has diplomatic relations, including Georgia and Iran.

The Armenian telecommunications network is currently operated by three mobile operators, ArmenTel (operating under the trade mark Beeline), which is fully owned by Russia’s VimpelCom, K-Telecom (operating under the trademark VivaCell MTS), a subsidiary of Russia’s MTS and Orange Armenia, a subsidiary of France Telecom.

Main competitors in 3G internet services in Armenia are Orange Armenia, VivaCell MTS and Beeline. Armenia is also the 10th country in the world that launched the 4G Internet communication network also introduced by VivaCell MTS. Currently one of the main DSL highline internet suppliers in Armenia is Beeline. Optical fiber network suppliers are Ucom telecom company and GNC Alpha (corporate only). Ucom has also built up the first FTTH (Fiber to the home) Network in Armenia providing convergent Triple play services including Internet, IPTV and Digital Phone services.
Financial Market

As of 30 September 2012 the Armenian Financial Market comprised of 21 commercial banks, one development bank, 32 credit organizations (with a total of 78 branches), 8 insurance companies, 8 investment companies, NASDAQ OMX Armenia and the Armenian Central depositary, 231 exchange offices and 123 pawnshops. Since 1 January 2006 the CBA has been acting as regulator and supervisor of the Armenian Financial Market.

Per the Government decision the head offices of banks and the CBA move to Dilijan city (about 110 km from Yerevan), which will become the financial center of Armenia starting from 2013.

Banking Sector

As of the end of September 2012 the 21 commercial banks operating in Armenia had 464 branches in Armenia and in Nagorno Karabakh, from which 192 are located in Yerevan. The total number of employees in Armenian commercial banks is 10,896.

Total assets of the Armenian banking system were about AMD 2,297 billion as of September 30 of 2012 including total loan portfolio of AMD 1,451 billion. This figure makes the Armenian banking system the biggest part of the Armenian financial market.

The total equity amounted to AMD 395 billion and total liabilities were about AMD 1,902 billion including AMD 1,206 billion of total deposits.

As of 30 September 2012 “ACBA-Credit Agricole Bank” CJSC is leading the Armenian commercial banks list with almost all of the key financial figures. Below we present key indicators of 10 biggest banks of Armenia, which totaled about 75% of the total assets of the banking system. Nevertheless, the banking industry concentration is not high and is defined as unconcentrated according to the Herfindahl-Hirschman Index, which has the value of 0.0682.

Bank Assets

Source: CBA

---

2 Index below 0.1 indicates an unconcentrated index; index between 0.1 and 0.18 indicates moderate concentration; index above 0.18 indicates high concentration. U.S. Department of Justice and the Federal Trade Commission.
The shareholder structure of the Armenian banks is very different. There are both resident and non-resident shareholders. Meanwhile, almost in all the Armenian banks non-resident shareholders are presented. Non-resident participants, both legal entities and individuals, are mainly from Russia, Switzerland, Iran, Lebanon, Liechtenstein, France, United Kingdom, USA and Kazakhstan. There are several international organizations that have shares in several Armenian banks (e.g. IFC, DEG, EBRD, and KfW).
In 2011 there were 1,175.1 thousand persons employed in Armenia which is 39% of the total population. In the second quarter of 2012 the average number of employed persons in Armenia was 1,166.5 thousand, which is 3.2% less than the amount of the same period of 2011.

About 45% of employed persons in 2010 worked in the agricultural sector.

The geographical concentration rate of employment is high: about 30% of the total employed persons are in Yerevan, while the share of the other regions in the total number of employed persons ranges from 2% to 11%.

Source: NSS
The average employee turnover rate (the number of employees who left the company during the year in relation to the average total number of employees) in 2010 was 18.7%, while the average employee acceptance rate (the number of employees who joined the company during the year in relation to the average total number of employees) was 20.4%.

As per the National Statistics Service of Armenia the official unemployment rate in 2011 was 18.4%. In the second quarter of 2012 the unemployment rate was 17.4%.

The average monthly nominal wages increased by 5.3% in 2011 compared to 2010 and comprised AMD 108,092 (USD 290). In the third quarter of 2012, with an increase of about 5.3% compared with the same period of 2011, the average monthly nominal wages reached AMD 120,116 (USD 294). The growth of monthly nominal wages surpassed the CPI for the period from 2007 to 2011 resulting in the real growth of wages: CAGR of monthly nominal wages for the mentioned period was about 12.4% compared to the CPI CAGR of 5.5% for the same period. The minimum wage in Armenia is currently AMD 32,500 (USD 81) and will increase to AMD 35,000 (USD 88) in January 2013.

Since 2008 the indicators are not comparable with the data of previous years. The number of unemployed has been calculated by the NSS of RA since 2008 based on the ILO standard definition used by EU countries. The later partially differs from the methodology used in 2001-2007, which is based on the expanded definition of unemployment, recommended by the ILO for use in transition countries (by opinion of country).
Country Rating

In July 2012 Moody’s rating agency left unchanged Armenia’s Ba2 (negative outlook) government foreign and local currency issuer ratings⁴.

Since August 2009 Fitch ratings for Armenia for long-term foreign currency and local currency Issuer Default Ratings (IDR) was Stable BB-⁵, which indicates an elevated vulnerability to default risk, particularly in the event of adverse changes in business or economic conditions over time⁶.

Based on the Doing Business 2013 prepared by IFC (the WB Group) Armenia was ranked 32 out of 185 economies improving its position by 18 places compared with 2011 ranking⁷.

**Industrial Policy**

Driven by the imperative to increase economic competitiveness and ensure sustainable economic growth, the Government has initiated the implementation of an active industrial policy that will target the expansion of the exportable sector of the economy by identifying and utilizing export potential.

The Government has declared building a knowledge-based economy as its long-term strategic objective. On this basis, the guiding vision for the industrial policy will be to turn Armenia into a country producing high-value and knowledge-intensive goods and services with creative human capital at its core. Achieving this vision requires a phased approach that entails a gradual transition from resource-intensive production to capacity and skills, and subsequently knowledge-based production to play a dominant role in the longer term.

**Small and Medium Enterprises**

SME development policy targets at contribution to the activation of entrepreneurship in the country, ensuring balanced regional development, enlargement of the role of SMEs in the process of economic diversification, growth of the level of employment and self-employment. In this context, an important tool is the expansion of direct support to the SMEs, particularly diversification of state support tools aimed at the development of the SME sector, as well as provision of better targeting of state support given to the SMEs.

Based on the SME development policy the state support to SME sector is planned in the following areas:

- Implementation of measures aimed at creation of most favorable environment for existing and start-up SMEs, particularly improvement of legal framework in the fields of tax, customs and public procurement services;
- Implementation of measures aimed at strengthening the infrastructure supporting the SMEs and development of new supporting institutions;
- Provision of continuity and expansion of the support for business initiatives (financial, consulting, etc for start-up and existing enterprises), particularly in the RA marzes;
- Enlargement of opportunities for women to be engaged in entrepreneurship;
- Introduction of new tools for state support to SMEs, in favor of the formation of industrial clusters on regional and community levels, as well as regional development;
- Internationalization of SME activities, including: support for “aggressive” promotion of SME innovative initiatives, as well as support for prospective SMEs with export potential, particularly in the form of integration to international structures and networks supporting SMEs; etc.
IT and High Tech

The Government will take measures for the development of an advanced electronic society in Armenia. Among the most important preconditions for this purpose will be the technical education corresponding to high international standards, the development of information and communication technology infrastructure and the improvement of computer literacy levels.

The Government will activate the initiatives aimed at proper representation of the field in Armenia and abroad, increasing the volume of exports and investments in the field, training and retraining of highly qualified personnel, promoting entrepreneurship, establishing new businesses and creating jobs, expanding the applications of industry products, innovative technology and e-services in other areas of the economy, encouraging creation of venture funds supporting up-to-date technologies, promoting cooperation with international organizations in the IT sector, attracting world-famous IT companies, developing a country rating as a regional IT center.

The program of starting an Armenian center for oncology will continue within the framework of the initial strategy of innovative economic development, and will include equipping the radio-isotope production center with cyclotrons and integrated devices acquired by the state for the needs of nuclear medicine, as well as receiving the necessary permissions for the operation of cyclotrons and for the production of radiation sources. The Government will continue the activities aimed at attracting investors and private partners into the implementation of the program. Cancer diagnosis and high-quality therapy services will be offered after the completion of the project.
Free Economic Zones

FEZ based on “RAO Mars” CJSC and “The Yerevan Computer R&D Institute” CJSC

The FEZ based on “RAO Mars” CJSC and “The Yerevan Computer R&D Institute” CJSC has been established and a contract with “Sytronics Armenia” CJSC on operation of the free economic zone was signed on April 26, 2012.

The zone is oriented to the production and exports of high and innovative technologies in the field of electronics, precision engineering, pharmaceutics and biotechnologies, information technologies, alternative energy, industrial design and telecommunications (elaboration and production of technological equipment, systems and materials for data/information transfer).

Planned FEZ

The second FEZ for the jewelry and diamonds production sectors is planned to be established during 2013.

Gyumri Technopark

The Government introduced a program to rebuild Gyumri into a technocity within the framework of a broader strategy of regional development and job creation. Gyumri technopark is an essential component of Gyumri technocity. The implementation of Gyumri technopark is aimed at reducing the disproportion between Yerevan and the marzes by developing high-quality infrastructure and supporting the business climate and the economic growth of the city, as well as the whole Shirak marz in the future.

The Government recognized the Gyumri economic development fund as the main operator of the project.

Investment Proposals

The Ministry of Economy has recently established the Investment Policy Department, an official institution to deal with foreign investments, including the very important task of taking arrangements for introducing the potential investors and investment seeking projects. The department has developed an investment project teaser, in order to be able to collect all the projects in the same format and make them precise and presentable for foreign investors.

The teasers of the projects can be found at the official Webpage of the Ministry of Economy [www.mineconomy.am/](http://www.mineconomy.am/).

State investment projects and Public Private Partnership (PPP) initiatives in Armenia can be found at the official country profiles of the Republic of Armenia on the Webpages of regional and international banks, such as:

- ADB at [http://www.adb.org/countries/armenia/main](http://www.adb.org/countries/armenia/main)
More information regarding available investment projects can also be found on the official webpages of the following organizations:

- ADA which serves as a central point of contact for the investment process all at no charge to the investor. The agency helps companies from all parts of the world to start new business ventures in Armenia as well as expand existing operations. 
  [www.ada.am/](http://www.ada.am/)

- The Competitiveness Foundation of Armenia which aims to achieve breakthrough development toward national competitiveness in key areas of economic activity. The Foundation operates through PPPs, mobilizing strategic investments which have the potential of catalyzing development and accelerating progress toward competitiveness.

They Chose Armenia
Hovnanian International LTD

Mr. Hovnanian visited Armenia many times. When he was here after the earthquake of 1988 he visualized his dream: to construct houses which will have appropriate seismic safety for a region like Armenia.

After the collapse of the Soviet Union when the economy of Armenia was opened up to foreign investments Mr. Hovnanian wrote a letter to the President of Armenia asking to give him permission to build a residential community for local people, as well as for Armenian retired Diaspora, who would live in Armenia bringing with them their experience and money.

He started from wooden houses, promoted them among locals and Diasporas. Over time Mr. Hovnanian made the Vahakni community more and more attractive for both locals and foreigners by adding stone houses and custom built houses constructed by customers per their designs.

Knowledge of the local language and culture of the local people, more than 50 years of expertise in the sector; individual treatment of each client; successful partnerships with local professionals; high quality; cooperation with local banks and introduction of the new concepts, including retirement community, golf course and first long-term payment allowance by customers turned the business idea into a successful business.

Mr. Hovnanian thinks that good educational background of local people, the presence of high quality audit and accounting companies and the developed banking sector of Armenia created a favorable environment for the business to succeed.

Vahak S. Hovnanian enjoys living and working in Armenia and he has a number of interesting projects in the pipeline, which include:

- Vahakni Residential Community and resort in the town of Yerevan
- Light industry factories in the town of Gyumri, Armenia
- Residential and resort complex in the town of Dilijan, which is now becoming the financial center of Armenia
- New constructions in Vahakni bringing 2,300 new apartments, a commercial center and a school.

“…Armenia is a great place to live and to work…”
All began in 1999, when Renco (an Italian company founded in 1979 by Rinaldo Gasparini) won the tender for the refurbishment of Yerevan Hotel (currently Golden Tulip Armenia). When the project was completed they chose to stay in Armenia for the long term as they saw good opportunities to invest and work in Armenia.

During already 13 years in Armenia they developed and operated a number of real estate projects, including:

- hotel in Yerevan – Congress hotel
- office buildings – Piazza Grande, Yerevan Plaza, Italian Embassy
- residential buildings – Italian Ambassador’s residence, Park Residence, Sole and Luna, Piazza Grande
- civil projects – Opera underground parking, Tatev ropeway, Halizor cafeteria

Renco cooperates with the Armenian Government participating in a private public partnership initiative. The Yerevan Municipality gave a land plot to the company in the city center in exchange of for the company’s commitment to construct the Opera underground parking and a new velodrome.

According to Mr. Talevi, the Armenia Branch Director, great local people and Government support encourage the company to stay here for many other more years. They plan to start new projects (residential buildings, hotel and office buildings in the Yerevan’s center) after completing the current projects in progress, including:

- The building of the Central Bank of Armenia in the town of Dilijan
- Central Bank of Armenia Village in the town of Dilijan
Green Bean Coffee Shop

All began about 5 months ago when a group of young and talented people from Armenia, USA and Switzerland decided to develop a new “home grown” business concept in Armenia.

The fully non-smoking and eco friendly coffee shop was launched in the heart of Yerevan and gained quick success and popularity. The owners consider that the business success is mainly backed up by:

- Availability of new business opportunities in Armenia
- Understanding of the local market and culture of the local people
- Focusing on the appropriate target market
- Expertise in the sector
- Cooperation with local experts
- New concepts and openness of local people to new ideas

The Green Bean was designed and constructed to feature the utilization of eco-friendly, renewable, and green materials. Besides, they expected to come up with a business that would provide benefits for many layers of the local economy, including producers, as they buy all the consumables (except coffee) from the local market. On the other side the cheaper labor and material costs in Armenia made the establishment of the new business concept easier.

The success in Armenia inspired the investors for new achievements. They are planning to use Armenia as a jumping point to franchise their business concept to neighboring countries in the near future.

“…there is lot of room for new business ideas in Armenia… Armenia is a great jumping point to develop a business concept and extend to other countries”
