

e-Invoices as a Service and more

Document processing is not as efficient as you would expect, even if having implemented different tools? **Are you aiming at 100% rate of electronic processing** but the tool implementation is lengthy and the efficiency not as expected?

We can help you to bridge the gap between the paper of today and the electronic tools of tomorrow. For suppliers not able to send electronic data and/or still sending PDF invoices, we will process the invoices, send back electronic data or even record the

accounting entries, in real time, with 100% accuracy, using robots with a human touch.

We use **RPA** and **Kofax Document Processing** technology which is one of the Market Leader for Cognitive Capture/OCR.

Even if the electronic supplier platform tool has developed its own OCR/data capture tool that is being implemented, or you have an in-house OCR tool that you want to use, we can work on the dedicated OCR, so that **you can be fully released from the supplier invoice capturing process.**

But it is not only about invoices

We can transform whatever type of documents you use into workable data.

We work as your back office partner.

Our price list is **transparent**

COST EFFICIENT END-TO-END PROCESSING

variable, pay per use using our internal Kofax solution:

- 1. For invoices:** we offer a **very competitive & transparent price per invoice**, depending on the complexity of data extraction needs. We offer both header and line level extraction.
- 2. For other documents:** we quote upfront per document depending on the data to be extracted.

MANUAL VALIDATION IN ANY OTHER DATA

CAPTURE TOOL: at a very competitive price/hour, pay per use
