

Restarting the UK

KPMG's methods and digital accelerators in response to COVID-19

Supporting the safe return to the workplace

Managing the return of employees to the physical workplace where needed or preferred, creates an unrivalled enterprise resource planning challenge. At the beginning of the COVID-19 pandemic, the crucial challenge organisations had to overcome was the ability to scale infrastructure to facilitate remote working. As we look towards the future and the new reality of the workplace - a combination of virtual and physical workspaces used for various interactions and employee segments, balancing the availability of employees with the readiness of locations will entail serious management.

Restart Solution

KPMG have developed a comprehensive approach to assessing, developing and delivering the capabilities required to successfully navigate the availability of physical locations for effective operation.

Restart app

Capture employee availability, assess and manage employee risk, track location readiness, enable access via mobile workplace passports – all with executive dashboards to monitor and support decision making.

Restart methods

A pre-packaged set of processes and controls, supported by ready-to-use checklists, technology options and risk frameworks.

— Built from KPMG's experiences globally in restarting our business.

— Engineered by our leading people, finance operations, risk, tax, legal and supply chain domain experts in the UK and globally.

— Codifies government guidelines into workflows, controls and reporting.

— Available on leading platforms including ServiceNow, Salesforce and MS PowerApp.

Benefits of KPMG's Restart Assets

Speed of set up:

- **Ready to go assets** enable organisations to focus on the differentiated elements for them.
- **Out of the box automation** results in faster, easier scenario planning and response to lockdown changing.
- **Breadth of assets** covering key dimensions of resilience including workforce planning, supply chain and financial planning.

Richness of content:

- **200+ assets** Distilled into 50+ core processes with workflows, controls, checklists and other supporting assets.
- **Global insights** from restarts in the UK and in countries further ahead.
- **Aligned with government guidelines** with local implementation considerations defined for other countries.

Technology leverage:

- **Enriches platform assets** (ServiceNow, Salesforce, Microsoft) with country-specific, detailed processes.
- **Ongoing roadmap** of new processes and assets as the situation develops.
- **Integrates with existing systems** and can be hosted on your own environment.

→ Core capabilities

Foundational capabilities

Core to physical return

Differentiating capabilities

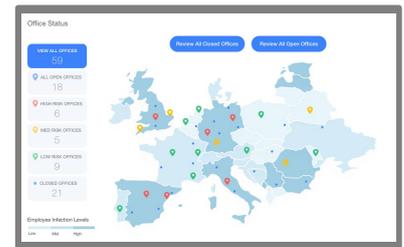

Sector-specific or opportunity to excel

We significantly extend COVID-19 dedicated functionality in the underlying platforms with:

- Extended processes including country and sector-specific guidelines
- Pre-configured assessments and reporting to enhance the use cases
- Analytics to optimise scenario planning

Further reducing configuration time, enhancing the level of controls and allowing enterprises to focus on scenario planning and differentiated capabilities.

▲ Enterprise dashboard for tracking overall organisation readiness and availability

◀ Workforce app for capturing employee risk assessment and managing workplace passport

→ Our global alliances

KPMG has established a number of powerful global strategic alliances with some of the world's leading cloud technology providers, including Microsoft, ServiceNow and Salesforce. We will bring these partnerships to bear in creating and extending our Restart technology assets.
