<td></td>
<td>In both the FBiH and the RS, prices for the sale of goods and services between related parties should be at arm’s length; if not, the difference exceeding the arm’s length value will be added to the tax base and is therefore taxable. New CPT Laws for both the RS and the FBiH took effect as of January 1, 2016 and March 5, 2016 respectively. The new FBiH and RS CPT Laws contain more detailed transfer pricing rules. Both CPT Laws require taxpayers to include transfer pricing documentation in their tax returns as proof that transactions with related parties were at arm’s length. Further details with regard to transfer pricing rulings are set out in applicable Rulebooks on transfer prices of the FBiH and the RS. Documentation requirement? Yes (see above).</td>

<tr>
<td><strong>Thin capitalization rules</strong></td>
<td>There are no thin capitalization rules in the RS. In the RS, total interest expense is not deductible for CPT purposes in the amount of net interest expense (i.e. interest expense over interest income), which exceeds 30 percent of the tax base that excludes interest income and interest expense. In the FBiH, financial expenses for interest per financial agreements and instruments to related parties are generally recognized for tax purposes. However, if the ratio between these obligations per financial agreements and the registered share capital of a taxpayer exceeds the ratio of 4:1, then the financial expenses exceeding the 4:1 are not recognized for tax purposes and cannot be transferred to another tax period. However, this does not apply to banks and insurance companies.</td>
