Between 2019-2023 the intelligent transportation market is set to double in value.

This presents an ecosystem opportunity of US$24bn
5G+Edge technologies across the ecosystem

Each of these technologies is enabled by one or more ecosystem players, as shown here:

Next Steps
Telcos have an opportunity with 5G and edge computing to look beyond connectivity and consider moving into services, selling cloud infrastructure, installation, integration, app development, device management and data management. Specifically, some of the relevant opportunities are:

- Deliver connectivity throughout a geographic area, across solutions
- Offer design services, devices, device management, data management, edge computing, analytics, and integration for the central control centers
- Enable critical services such as automated public transit and traffic management
