

KPMG Legal Function Assessment Suite

Gain a 360-degree view with one simple solution.

Legal departments are under increasing pressure to adapt to changing needs and work volumes, adopt new technology and data-driven decision making, and demonstrate value to their organizations.

Without the right data or resources, it can be hard to get a clear, measured view of where the function currently is and where it needs to go.

Simply put, many legal professionals just don't know where to begin.

How KPMG can help

KPMG's Legal Function Assessment Suite helps you gain a better understanding of your in-house legal function's maturity, and provides you with strategic recommendations and a roadmap for how to improve your legal team's delivery of legal services.

The Legal Function Assessment Suite gives a structured 360-degree view of the current state of the legal function, including who they are working for, what they are doing, how they are doing it and the value they are creating for their organisation.

Built for scale, but designed for real outcomes. It takes a hybrid approach — a mixture of automated intelligence and human analysis to generate findings that are relevant and targeted. This approach makes the Legal Function Assessment Suite a cost-effective, scalable alternative to traditional consulting.

The Legal Function Assessment Suite also helps to identify, rank and sequence the improvement projects needed and helps General Counsel build a business case for change.

The capabilities

The Legal Function Assessment Suite is a collection of digital tools built around six key pillars:

 Performance metrics  Governance  Technology	 <p>The first module includes digital survey tools tailored for different stakeholders, gathering data that is compiled into a digital report; meaning minimal disruption to the team and the freedom to go at your own pace.</p>	 <p>The Activity Estimator helps identify where members of the legal team spend their time and who they are working for day to day, without the burden or resistance associated with timesheets.</p>
 People  Processes  Resourcing	 <p>The report provides a 360-degree view of how your department currently operates.</p>	 <p>It also provides you with a bespoke roadmap for your team offering data-backed solutions and innovations tailored to improve your department's way of working.</p>
